**Big Sid's Vincati** Matthew Biberman,2009-04-30 Read Matthew Biberman's posts on the Penguin Blog. The two men hadn't spoken in years-but called a truce to attempt a shared dream. *Handbook of Materials for String Musical Instruments* Voichita Bucur,2016-08-29 This book addresses core questions about the role of materials in general and of wood in particular in the construction of string instruments used in the modern symphony orchestra - violins, violas, cellos and basses. Further attention is given to materials for classical guitars, harps, harpsichords and pianos. While some of the approaches discussed are traditional, most of them depend upon new scientific approaches to the study of the structure of materials, such as for example wood cell structure, which is visible only using modern high resolution microscopic techniques. Many examples of modern and classical instruments are examined, together with the relevance of classical techniques for the treatment of wood. Composite materials, especially designed for soundboards could be a good substitute for some traditional wood species. The body and soundboard of the instrument are of major importance for their acoustical properties, but the study also examines traditional and new wood species used for items such as bows, the instrument neck, string pegs, etc. Wood species' properties for musical instruments and growth origins of woods used by great makers such as Antonio Stradivari are examined and compared with more recently grown woods available to current makers. The role of varnish in the appearance and acoustics of the final instrument is also discussed, since it has often been proposed as a 'secret ingredient' used by great makers. Aspects related to strings are commented. As well as discussing these subjects, with many illustrations from classical and contemporary instruments, the book gives attention to conservation and restoration of old instruments and the physical results of these techniques. There is also discussion of the current value of old instruments both for modern performances and as works of art having great monetary value. The book will be of interest and value to researchers, advanced students, music historians, and contemporary string instrument makers. Musicians in general, particularly those playing string instruments, will also find its revelations fascinating. It will also attract the attention of those using wood for a variety of other purposes, for its use in musical instruments uncovers many of its fundamental features. Professor Neville H. Fletcher Australian National University, Canberra

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Quest for Justice* Richard Jaffe, 2020-03-23 Richard Jaffe's explosive second edition of *Quest for Justice: Defending the Damned* affirms the vital role criminal defense lawyers play in the balance between life and death, liberty and lockup. It is a compelling journey into the legal and human drama of life or death criminal cases that often reads more like hard to imagine fiction, yet these cases are real. *Quest for Justice* invites readers into the courtroom and into the field with Richard Jaffe, a powerhouse Alabama defense attorney with more than four decades of experience, who has successfully defended hundreds of individuals accused of murder, including more than seventy cases where the defendant faced the death penalty, including the Olympic bomber Eric Robert Rudolph. According to the Equal Justice Initiative, in Alabama, nine people have been exonerated from death row—Jaffe represented four of them: James Willie Bo Cochran, Randal Padgett, Gary Drinkard, and Wesley Quick. Though every chapter reveals more alarming, gut-wrenching cases, and impediments to justice, Jaffe's unwavering determination, hope, and strategies in the courtroom yield many momentous victories for his clients and the cause of justice. In *Quest for Justice: Defending the Damned*, Richard Jaffe offers all audiences an accessible, page-turning perspective borne out of a life representing the damned in America's criminal justice system.
