Magic Circles Devin McKinney, 2003 No one expressed the heart and soul of the Sixties as powerfully as the Beatles did through the words, images, and rhythms of their music. In Magic Circles Devin McKinney uncovers the secret history of a generation and a pivotal moment in twentieth-century culture. He reveals how the Beatles enacted the dream life of their time and shows how they embodied a kaleidoscope of desire and anguish for all who listened--hippies or reactionaries, teenage fans or harried parents, Bob Dylan or Charles Manson. The reader who dares to re-enter the vortex that was the Sixties will appreciate, perhaps for the first time, much of what lay beneath the social trauma of the day. Delving into concerts and interviews, films and music, outtakes and bootlegs, Devin McKinney brings to bear the insights of history, aesthetics, sociology, psychology, and mythology to account for the depth and resonance of the Beatles' impact. His book is also a uniquely multifaceted appreciation of the group's artistic achievement, exploring their music as both timeless expression and visceral response to their historical moment. Starting in the cellars of Liverpool and Hamburg, and continuing through the triumph of Beatlemania, the groundbreaking studio albums, and the last brutal, sorrowful thrust of the White Album, Magic Circles captures both the dream and the reality of four extraordinary musicians and their substance as artists. At once an entrancing narrative and an analytical montage, the book follows the drama, comedy, mystery, irony, and curious off-ramps of investigation and inquiry that contributed to one of the most amazing odysseys in pop culture.

The Wednesday Wars Gary D. Schmidt, 2007 During the 1967 school year, on Wednesday afternoons when all his classmates go to either Catechism or Hebrew school, seventh-grader Holling Hoodhood stays in Mrs. Baker's classroom where they read the plays of William Shakespeare and Holling learns much of value about the world he lives in.

*The Beatles Guitar (Songbook)* The Beatles, 1987-06-01 (Guitar Book). This unique publication contains 52 favorite Beatles songs arranged exclusively for the guitar. It is designed to provide an accurate look into the lead and rhythm guitar styles of George Harrison and John Lennon. Instead of providing transcriptions of the guitars off the record, these arrangements use the musical elements of the bass, drums, keyboards and guitars all incorporated into one guitar so that they can be played alone or in a band. Written in tablature, this book also provides numbers, strums, accents and picking patterns for those who do not read music.

Along with The Beatles' feature movies and promos, this analysis also contains documentaries, such as The Complete Beatles and Anthology, as well as dramatizations of the band's history, such as Backbeat, The Hours and Times, and Two of Us.

**Dark Ecology** Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

**Art Perception** David Cycleback,2014-05-21 A complex and fascinating question is why do humans have such strong emotional reactions and human connections to art? Why do viewers become scared, even haunted for days, by a movie monster they know doesn't exist? Why do humans become enthralled by distorted figures and scenes that aren't realistic? Why do viewers have emotional attachments to comic book characters? The answer lies in that, while humans know art is human made artifice, they view and decipher art using the same often nonconscious methods that they use to view and decipher reality. Looking at how we perceive reality shows us how we perceive art, and looking at how we perceive art helps show us how we perceive reality. Written by the prominent art historian and philosopher Cycleback, this book is a concise introduction to understanding art perception, covering key psychological, cognitive science, physiological and philosophical concepts.

It was fifty years ago today! Some 80,000 leagues beneath the sea, a colorful land of music and laughter existed called Pepperland – a place where Sgt. Pepper's Lonely Hearts' Club Band was always playing your song. That is, until the Blue Meanies burst onto the scene and chased all the magical music away. . . . So began the classic 1968 film Yellow Submarine,inspired by the eponymous song. **Made to Stick** Chip Heath,Dan Heath,2007-01-02 NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. “Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book.”—The Washington Post Mark Twain once observed, “A lie can

get halfway around the world before the truth can even get its boots on.” His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them “stick.” In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “kidney theft ring” hoax to a coach’s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It’s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.
