Russia's Cosmonauts Rex D. Hall, Shayler David, Bert Vis, 2007-10-05 There is no competition since this is the first book in the English language on cosmonaut selection and training. Offers a unique and original discussion on how Russia prepares its cosmonauts for spaceflight. Contains original interviews and photographs with first-hand information obtained by the authors on visits to Star City. Provides an insight to the role of cosmonauts in the global space programme of the future. Reviews the training both of Russian cosmonauts in other countries and of foreign cosmonauts in Star City.

**The First Soviet Cosmonaut Team** Colin Burgess, Rex Hall, 2009-03-27 The First Soviet Cosmonaut Team will relate who these men were and offer far more extensive background stories, in addition to those of the more familiar names of early Soviet space explorers from that group. Many previously-unpublished photographs of these "missing" candidates will also be included for the first time in this book. It will be a detailed, but highly readable and balanced account of the history, training and experiences of the first group of twenty cosmonauts of the USSR. A covert recruitment and selection process was set in motion throughout the Soviet military in August 1959, just prior to the naming of America's Mercury astronauts. Those selected were ordered to report for training at a special camp outside of Moscow in the spring of 1960. Just a year later, Senior Lieutenant Yuri Gagarin of the Soviet Air Force (promoted in flight to the rank of major) was launched aboard a Vostok spacecraft and became the first person ever to achieve space flight and orbit the Earth.

**Starman** Jamie Doran, Piers Bizony, 2011-05-01 Profiles the life of the Soviet cosmonaut who became the first man to orbit the Earth in 1961, including his childhood as a farm boy, how the Soviet Union used him after the historic feat, and the mysteries surrounding his death.

**Yuri Gagarin and the Race to Space** Ben Hubbard, 2015-07-02 Join Yuri Gagarin on his journey into space! This book examines the extraordinary life of the first astronaut in space, from his early life to his first trip aboard a Russian spacecraft. Discover what the space race was and other developments happening at the time. Find out about the rigorous training that astronauts undergo and how they prepare for a journey into the unknown.

Yuri Gagarin, As part of StarChild, the High Energy Astrophysics Science Archive Research Center (HEASARC) within the Laboratory for High Energy Astrophysics (LHEA) at the Goddard Space Flight Center (GSFC) of NASA, located in Greenbelt, Maryland, presents biographical information about the Soviet cosmonaut Yury Alekseyevich Gagarin (1934-1968). The information is intended for children. Gagarin became the first human being to orbit in space in April 12, 1961. A sketch of Gagarin is available.

The Cosmonaut Who Couldn't Stop Smiling Andrew L. Jenks, 2019-01-15 Let's go! With that, the boyish, grinning Yuri Gagarin launched into space on April 12, 1961, becoming the first human being to exit Earth's orbit. The twenty-seven-year-old lieutenant colonel departed for the stars from within the shadowy world of the Soviet military-industrial complex. Barbed wires, no-entry placards, armed guards, false identities, mendacious maps, and a myriad of secret signs had hidden Gagarin from prying outsiders—not even his friends or family knew what he had been up to. Coming less than four years after the Russians launched Sputnik into orbit, Gagarin's voyage was cause for another round of capitalist shock and Soviet rejoicing. The Cosmonaut Who Couldn't Stop Smiling relates this twentieth-century icon's remarkable life while exploring the fascinating world of Soviet culture. Gagarin's flight brought him massive international fame—in the early 1960s, he was possibly the most photographed person in the world, flashing his trademark smile while rubbing elbows with the varied likes of Nehru, Castro, Queen Elizabeth II, and Italian sex symbol Gina Lollobrigida. Outside of the spotlight, Andrew L. Jenks reveals, his tragic and mysterious death in a jet crash became fodder for morality tales and conspiracy theories in his home country, and, long after his demise, his life continues to provide grist for the Russian popular-culture mill. This is the story of a legend, both the official one and the one of myth, which reflected the fantasies, perversions, hopes and dreams of Gagarin's fellow Russians. With this rich, lively chronicle of Gagarin's life and times, Jenks recreates the elaborately secretive world of space-age Russia while providing insights into Soviet history that will captivate a range of readers.

*The First Manned Spaceflight* Vladimir Suvorov, Alexander Sabelnikov, 1997 This book is about the early era of the Russian space challenge. It is based on the notes of Vladimir Suvorov, a distinguished chief documentary cinematographer, who eyewitnessed and described in his top secret diary all these events from 1959 to 1969. He and his team made 35 films on the Russian conquest of space. He worked closely with the key scientists including Chief Designer Sergey Korolev, the President of the Academy of Sciences Mstislav Keldish and other high ranking military officers who were in charge of the Soviet space program. Many cosmonauts, especially the first ones like Yuri Gagarin, German Titov, et al., became his friends. This book is the first close up and personal account of these remarkable events.

Yuri Gagarin Mitchell R. Sharpe, 1969 A biography of the Russian cosmonaut who was the first man to leave earth and to orbit the planet in a spacecraft on April 12, 1961.

**Soviet Man in Space** Yuri Gagarin, 2001 The first manned space flight in history was accomplished on April 12, 1961, when the Soviet spaceship Vostok (East) orbited the earth and made a safe landing. The first man in space was 27 year old Yuri Alexeyevich Gagarin, a citizen of the Union of Soviet Socialist Republics. After successful launching in the multi-stage space rocket the satellite ship, having attained orbital velocity and separated from the last stage of the carrier-rocket, had begun free orbital flight round the earth. According to preliminary data, orbital period of the spaceship is 89.1 minutes; its minimum distance from the earth's surface (perigee) is 175 kilometers and its maximum (apogee), 302 kilometers; the orbit is inclined to the equator at 65°4'. Together with its pilot, the spaceship weighs 4,725 kilograms excluding the weight of the last stage of the launching rocket. Two-way radio communication has been established, and is being maintained, with the spaceman, Major Gagarin. The ship's short-wave transmitters are operating on 9.019 megacycles and 20.006 megacycles, and on 143.625 megacycles in the ultra short -wave band. The condition of the space pilot during flight is being observed by means of radio telemetering and television systems. Major Gagarin, the space pilot, withstood the period of acceleration satisfactorily and at present feels quite well. The systems enduring the necessary life conditions in the cabin of the spaceship are functioning normally. The flight of the Vostok with Major Gagarin on board continues...

**Road to the Stars** Yuri Alekseyevich Gagarin, 1962

**Yuri Gagarin** Vix Southgate, 2016

**Starman** Jamie Doran, Piers Bizony, 2011-04-04 On April 12 1961, Yuri Gagarin became the first human to leave the Earth's atmosphere and venture into space. An icon of the 20th century, he also became a danger to himself and a

threat to the Soviet state. At the age of 34, he was killed in a plane crash. Based on KGB files, restricted documents from Russian space authorities, and interviews with his friends and colleagues, this biography of the Russian cosmonaut reveals a man in turmoil: torn apart by powerful political pressures, fighting a losing battle against alcoholism and rebelling against the cruelties of a corrupt totalitarian regime. 2011 marks the fiftieth anniversary of Gagarin's flight. This new edition of *Starman* includes a new afterword that celebrates the importance of that momentous expedition and reflects on Gagarin's legacy.

*Soviets in Space* Colin Burgess, 2022-08-08 A beautifully illustrated history of the Soviet Union's leading role in the space race. In this deeply researched chronology, Colin Burgess describes the then Soviet Union's extraordinary success in the pioneering years of space exploration. Within a decade, the Soviets not only launched the world's first satellite, Sputnik, in 1957, but they also were the first to send an animal and a human being into Earth orbit. In the years that followed, their groundbreaking missions sent a woman into space, launched a three-man spacecraft, and included the first person to walk in space. Six decades on from the historic spaceflight of cosmonaut Yuri Gagarin, Burgess guides us through the amazing achievements of Russia's spaceflight program through to the present day, introducing the men and women who have flown the missions that drive us to delve ever deeper into the wonders and complexities of the cosmos.

*Yuri Gagarin in London and Manchester* Gurbir Singh, 2011-07-04 The first human spaceflight on 12th April 1961 shocked the West and made cosmonaut Yuri Gagarin the most famous person on the planet. As one of human civilisation's seminal accomplishments, it was borne out of technology designed for weapons of mass destruction. Following the launch of Sputnik in 1957, the Soviet Union charged headlong into the exploration of the Moon, Venus and Mars, demonstrating and honing their weapons of war in the name of science. Three months after his flight, still the only person to have been in Earth orbit, he came to Britain. Declassified confidential and secret government documents reveal for the first time the frantic diplomatic efforts to achieve a balance between celebrating one of humanity's greatest achievements whilst grappling with the political dynamite of the unprecedented propaganda opportunity of a Soviet air force Major's success being celebrated, first by the Prime Minister and then by the Queen at Buckingham Palace. Chronicled for the first time in these pages are the personal recollections, including never before published pictures, from people in Manchester and London of the impact of this handsome, charismatic cosmonaut who captured the hearts of ordinary working people in Britain. With an engaging permanent smile, this unassuming diminutive Major brought hope to a world at the brink of thermonuclear war. For many in Britain during the coldest days of the Cold War, this cosmonaut was the only Russian they would ever see.

*Gagarin and Armstrong* Clint Twist, 1995 Describes the space race and the pioneering explorations achieved by the Soviet cosmonaut Yuri Gagarin and American astronaut Neil Armstrong.

**The First Man in Space** David Cullen, 2004 Describes the 1961 flight of Soviet astronaut Yuri Gagarin, the first man in space, as well as the scientific background to that flight and space exploration since then.

With this rich, lively chronicle of Gagarin's life and times, Jenks recreates the elaborately secretive world of space-age Russia while providing insights into Soviet history that will captivate a range of readers.

Yuri Gagarin , 2011

**Vostok 1** Michael D. Cole, 1995 Yuri Gagarin, hero of the Soviet Union and first person in space, took the first big steps that led to the era of manned spaceflight. Details of the historic flight of Vostok 1 are discussed through his eyes, including his exciting first view of Earth and the stars from space.

**The Secrets of Soviet Cosmonauts** Maria Rosa Menzio, 2022-08-31 This book sheds new light on an amazing history, only partially known in the west: Russian cosmonautics and its spectacular record. From Laika, the cosmonaut dog, to Yuri Gagarin, the first man in space, to Valentina Tereshkova, the first woman in space, to the first spacewalk, the Soviets set many goals that they subsequently achieved. But there are shadows behind these headline moments, moments involving human loss, some of which are known, others only rumored. Questions remain, such as: · What was the "flying coffin"? · What secrets are still hidden inside the Russian archives, despite two rounds of declassification? · Why didn't Marina Popovich ("Madame Mig") become a cosmonaut? · What problems made it necessary to film Valentina Tereshkova's return? · What (scientific) hypotheses exist concerning Gagarin's mysterious disappearance? The author addresses all of these issues, with help from the documents now available. This book will benefit a broad readership, from interested laypersons to graduate and undergraduate students to those who merely enjoy good history-based stories.
