**Urban Paper** Matt Hawkins, 2009-04-21 Join the Papertoy Revolution! This is a collection of 26 of the coolest designer paper toys in existence, ready to be cut out and built. Each papertoy has step-by-step instructions, complete with easy-to-use diagrams, so even a novice will be able to make amazing papertoys with the help of a pair of scissors and a few dabs of glue. Interviews with contributors such as Shin Tanaka, Ben the Illustrator, NiceBunny, Cubotoy and Kenn Munk are included. You'll find out more about where their ideas came from—and they might even inspire you to create your own papertoy! In addition, there is a foreword by Andy Heng from [www.toysrevil.net](http://www.toysrevil.net). The DVD includes lots of bonus features, such as all 26 toy templates in PDF format (so you can build cities full of papertoys); basic shapes (so you can learn the building blocks of papertoys); blank templates (so you can create your own skin); longer, unabridged interviews with all the designers in the book; and 33 bonus templates. So grab your scissors, your glue and your imagination, and get ready to enter an inspiring new world of papertoys!

**Radiotherapy of Intraocular and Orbital Tumors** Winfried E. Alberti, Robert H. Sagerman, 2012-12-06 Radiotherapy of Intraocular and Orbital Tumors presents a new approach to the role of radiation therapy in the management of ophthalmic cancer. The indications for ultrasonography, computed tomography, and magnetic resonance imaging studies are analyzed, and treatment techniques, together with their results, are described for each tumor. Particle beam and plaque irradiation are reviewed, and conservative and surgical management of radiation effects are detailed. In the past, most books on this subject included a chapter on radiotherapy but emphasized the dangers of radiation complications. However, great progress in understanding the effects of irradiation upon the tissues of the eye and orbit, new therapeutic equipment, and new imaging techniques (CT, MRI) allow for careful treatment planning. This book has taken the long overdue step of reconsidering the role of irradiation of the eye so that it may take its place as a respected, rather than feared, treatment in the combined modality approach so important today. Together with experts in relevant fields, the editors have produced a refreshingly clear and thoroughly referenced volume which will be a valuable asset to all ophthalmologists, radiation oncologists, pediatricians, endocrinologists, oncologists, and residents in training, as well as to students in these disciplines.

**The Annotated Turing** Charles Petzold, 2008-06-16 Programming Legend Charles Petzold unlocks the secrets of the extraordinary and prescient 1936 paper by Alan M. Turing. Mathematician Alan Turing invented an imaginary computer known as the Turing Machine; in an age before computers, he explored the concept of what it meant to be computable, creating the field of computability theory in the process, a foundation of present-day computer programming. The book expands Turing's original 36-page paper with additional background chapters and extensive annotations; the author elaborates on and clarifies many of Turing's statements, making the original difficult-to-read document accessible to present day programmers, computer science majors, math geeks, and others. Interwoven into the narrative are the highlights of Turing's own life: his years at Cambridge and Princeton, his secret work in cryptanalysis during World War II, his involvement in seminal computer projects, his speculations about artificial intelligence, his arrest and prosecution for the crime of gross indecency, and his early death by apparent suicide at the age of 41.

**Growing Without Schooling** Patrick Farenga, John Holt, Carlo Ricci, 2016-06-14 After years of working to change schools from within—testifying

before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded Growing Without Schooling magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of How Children Learn and How Children Fail, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly interested in how children learn outside of school. The magazine he founded, Growing Without Schooling (GWS), reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

**Electronic Systems and Intelligent Computing** Pradeep Kumar Mallick,Preetisudha Meher,Alak Majumder,Santos Kumar Das,2020-09-22 This book presents selected, high-quality research papers from the International Conference on Electronic Systems and Intelligent Computing (ESIC 2020), held at NIT Yupia, Arunachal Pradesh, India, on 2 – 4 March 2020. The applications and solutions featured provide valuable reference material for future product development.

**Multi-Drug Resistance in Cancer** Jun Zhou,2012-08-09 Chemotherapy is one of the major treatment options for cancer patients; however, the efficacy of chemotherapeutic management of cancer is severely limited by multidrug resistance, in that cancer cells become simultaneously resistant to many structurally and mechanistically unrelated drugs. In the past three decades, a number of mechanisms by which cancer cells acquire multidrug resistance have been discovered. In addition, the development of agents or strategies to overcome resistance has been the subject of intense study. This book contains comprehensive and up-to-date reviews of multidrug resistance mechanisms, from over-expression of ATP-binding cassette drug transporters such as P-glycoprotein, multidrug resistance-associated proteins, and breast cancer resistance p- tein to the drug ratio-dependent antagonism and the paradigm of cancer stem cells. The book also includes strategies to overcome multidrug resistance, from the development of compounds that inhibit drug transporter function to the modulation of transporter expression. In addition, this book contains techniques for the detection and imaging of drug transporters, methods for the investigation of drug resistance in animal models, and strategies to evaluate the efficacy of resistance reversal agents. The book intends to provide a state-of-the-art collection of reviews and methods for both basic and clinician investigators who are interested in cancer multidrug resistance mechanisms and reversal strategies. **The Zimbabwe Culture** Innocent Pikirayi, 2001 Since the monumental architecture of the Zimbabwe Plateau first became known to Westerners in the 16th century, speculation about the people that created it has been continuous and inventive. Tales of strongholds in the interior were taken home by the first Portuguese chroniclers of the Swahili coast, and their narratives became part of the geographic lore of the 17th and 18th centuries. In the mid-19th century, the lore was spun into fantastic and mysterious yarns about long-lost riches that lured adventurers and traders. Pikirayi (history, U. of Zimbabwe) aims to set the record straight by examining the growth of precolonial states on the plateau and adjacent regions, with a focus on the their historical and cultural development during the second millennium AD. c. **Leksell Radiosurgery** A. Niranjan, L.D. Lunsford, H. Kano, 2019-05-20 Since its introduction 52 years ago, Leksell radiosurgery has become a widely applied technique for the management of a diverse group of vascular, neoplastic, and functional disorders. This publication presents an update on state-of-the-art radiosurgery technology, including outcomes, by the pioneers in the field. Experts have contributed chapters on various topics. They provide a history of the development of Leksell Gamma Knife and its evolution from frame-based to the inclusion of mask-based radiosurgery in the latest Gamma Knife model. For beginners, there is valuable information related to imaging, quality assurance, patient care, anesthesia, and regulatory requirements. Advance users will appreciate the summary of the long-term outcome of important indications. Additional chapters on cavernous malformation, orbital, uveal, and ocular disorders clarify the role of radiosurgery. This book is a concise overview for physicians interested in radiosurgery. It will be of great value to neurosurgeons, radiation oncologists, and medical physicists concerned with learning about the indications of radiosurgery.

*To the Cloud* Vincent Mosco, 2015-11-17 Cloud computing and big data are arguably the most significant forces in information technology today. In the wake of revelations about National Security Agency (NSA) activities, many of which occur in the cloud, this book offers both enlightenment and a critical view. Vincent Mosco explores where the cloud originated, what it means, and how important it is for business, government and citizens. He describes the intense competition among cloud companies like Amazon and Google, the spread of the cloud to government agencies like the controversial NSA, and the astounding growth of entire cloud cities in China. Is the cloud the long-promised information utility that will solve many of the world's economic and social problems? Or is it just marketing hype? *To the Cloud* provides the first thorough analysis of the potential and the problems of a technology that may very well disrupt the world.

*The Big Switch: Rewiring the World, from Edison to Google* Nicholas Carr, 2009-01-19 Offers predictions about the shift from private computer systems to Internet-based networks for computer-based businesses, and how the change will impact economics, culture, and society.

*250 Great Movies for Latter-day Families* Jonathan Decker, 2023-02-14 The theatre, the theatre, what's happened to the theatre? This is what many LDS parents are also asking. Finding films is not hard with the unlimited resources available for entertainment including Netflix, YouTube, Hulu, and Amazon instant video. But finding movies that are entertaining, well-made, and wholesome is a challenge. Jonathan Decker, host of the KJZZ Movie Show and certified marriage and family therapist, offers this review guide—complete with easy-to-navigate indexes—on movies that range from Bing Crosby's *Going My Way* (1944) to the more modern *Avengers* (2012). Each film receives a discussion of artistic value, a general content review, and

suggestions for gospel parallels. This guide has something for everyone and is an essential tool when planning movie nights, dates, family home evenings, and other gatherings.

**The Power of Words in International Relations** Charlotte Epstein, 2008-10-03 The role of discursive power in shaping international relations analyzed through the lens of whaling politics. In the second half of the twentieth century, worldwide attitudes toward whaling shifted from widespread acceptance to moral censure. Why? Whaling, once as important to the global economy as oil is now, had long been uneconomical. Major species were long known to be endangered. Yet nations had continued to support whaling. In *The Power of Words in International Relations*, Charlotte Epstein argues that the change was brought about not by changing material interests but by a powerful anti-whaling discourse that successfully recast whales as extraordinary and intelligent endangered mammals that needed to be saved. Epstein views whaling both as an object of analysis in its own right and as a lens for examining discursive power, and how language, materiality, and action interact to shape international relations. By focusing on discourse, she develops an approach to the study of agency and the construction of interests that brings non-state actors and individuals into the analysis of international politics. Epstein analyzes the “society of whaling states” as a set of historical practices where the dominant discourse of the day legitimated the killing of whales rather than their protection. She then looks at this whaling world's mirror image: the rise from the political margins of an anti-whaling discourse, which orchestrated one of the first successful global environmental campaigns, in which saving the whales ultimately became shorthand for saving the planet. Finally, she considers the continued dominance of a now taken-for-granted anti-whaling discourse, including its creation of identity categories that align with and sustain the existing international political order. Epstein's synthesis of discourse, power, and identity politics brings the fields of international relations theory and global environmental politics into a fruitful dialogue that benefits both.

**The Singer of Tales in Performance** John Miles Foley, 1995 A great book... -- Choice ... a groundbreaking work of scholarship... -- Asian Folklore Studies This extremely fascinating study opens an important chapter in the ethnography of speech, brilliantly confirming the views advanced by Dell Hymes, Albert Lord and Richard Baumann. -- The Journal of Indo-European Studies Building on his work in *Traditional Oral Epic and Immanent Art*, John Foley dissolves the perceived barrier between oral and written, creating a composite theory from oral-formulaic theory and the ethnography of speaking and ethnoepics. ...a groundbreaking work of scholarship that clears the path for solving the perennial problem of the interpretation of oral-derived texts. The book will be of immense value to students of folklore and literature, and to those seriously interested in the interface of the two traditionally divided disciplines. -- Asian Folklore Studies

**A Nation Rising** Noelani Goodyear-Ka'opua, Ikaika Hussey, Erin Kahunawaika'ala Wright, 2014-08-27 *A Nation Rising* chronicles the political struggles and grassroots initiatives collectively known as the Hawaiian sovereignty movement. Scholars, community organizers, journalists, and filmmakers contribute essays that explore Native Hawaiian resistance and resurgence from the 1970s to the early 2010s. Photographs and vignettes about particular activists further bring Hawaiian social movements to life. The stories and analyses of efforts to protect land and natural resources, resist community dispossession, and advance claims for sovereignty and self-determination reveal the diverse objectives and strategies, as well as the inevitable tensions, of the broad-tent sovereignty movement. The collection explores the Hawaiian political ethic of *ea*, which both includes and exceeds dominant notions of state-based sovereignty. *A Nation Rising* raises issues that resonate far beyond the Hawaiian archipelago, issues such as Indigenous cultural revitalization, environmental justice, and demilitarization.
