Paper Works Shaoqiang Wang,2012 From classic Mexican papel picado to the art of origami, paper has long been a source of inspiration to artists and designers across the globe. *Paper Works* brings together an eclectic mix of designs and techniques, taking the reader on a visual journey of progression and transformation. Featuring sculptural carved book arts and installation art to avant-garde paper couture fashion, and examining the work of artists such as Jen Stark and Nikki McClure, this is an essential guide to one of the most fundamental, versatile but often overlooked materials.

Worst Song, Played on Ugliest Guitar Chris Onstad,2009 Strips from the comic Achewood and comments from the author.

Badenheim Nineteen-thirty-nine Aharon Apelfeld,1980 A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but Badenheim and its summer residents go about life as normal.

The Kaiser's Battlefleet Aidan Dodson,2016-11-30 This illustrated study of the German Imperial Navy presents a ship-by-ship history from the dreadnaught era through WWI. The battleships of the Third Reich have been written about exhaustively, but there is little in English devoted to their predecessors of the Second Reich. In *The Kaiser's Battlefleet*, Aidan Dodson fills this significant gap in German naval history by covering these capital ships and studying the full span of battleship development during this period. *Kaiser's Battlefleet* presents a chronological narrative that features technical details, construction schedules and the ultimate fates of each ship tabulated throughout. With a broad synthesis of German archival research, Dodson provides fresh data and corrects significant errors found in standard English-language texts. Heavily illustrated with line work and photographs drawn from German sources, this study will appeal to historians of WWI German as well as battleship modelmakers.

Spoils of War Aidan Dodson,Serena Cant,2020-03-30 While a large number of books have dealt with the navies and war at sea during the World Wars, the immediate aftermaths have generally received only minimal coverage. However, the fates of defeated navies are of enormous interest from a number of perspectives. These include the relative priorities of the victorious powers, acquisition and testing of ex-enemy materiel and the intended future capabilities of those ex-enemy navies that were to be allowed to continue to exist. This new book traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders through to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. In doing this, much use is made of material drawn from archival, and in some cases archaeological, sources, some of which has never previously been used. Through these, a wide range of long-standing myths are busted, and some badly distorted modern views and assessments of events in the wake of the conflicts put right. The fascinating narrative will be accompanied by tabulated lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These will include key dates in their careers and their ultimate fates. This highly original book, drawing on archaeological evidence as well as archival sources, and including numerous photographs will become an essential reference tool for all those interested in the naval history of the two World Wars.

Historical Dictionary of Naval Intelligence Nigel West,2010 The *Historical Dictionary of Naval Intelligence* relates the long and fascinating history of naval

intelligence through a chronology, an introduction, a bibliography, and hundreds of cross-referenced dictionary entries on the organizations, operations, and events that made Naval intelligence what it is today.

Naval Battles of the First World War Geoffrey Bennett, 2014-06-30 From a British Royal Navy officer, a detailed history of World War I's principal battles at sea. With the call to action stations in August 1914, the Royal Navy faced its greatest test since the time of Nelson . . . This classic history of the Great War at sea combines graphic and stirring accounts of all the principal naval engagements—battles overseas, in home waters and, for the first time, under the sea—with analysis of the strategy and tactics of both sides. Geoffrey Bennett brings these sea battles dramatically to life, and confirms the Allied navies' vital contribution to victory. Praise for *Naval Battles of the First World War* "Strongly recommended." —RUSI Journal "Excellent balanced accounts and judgements." —Richard Hough, historian and author "Extensive photographs, include key aspects such as the German battle cruiser Blucher at the Dogger Bank battle, the destruction of the British battle cruiser Queen Mary, as well as the German dreadnaught Bayern sinking after being scuttled at Scapa Flow. A fascinating diagram shows Battleship Turrets, which provides insight into the process of action, such as the shell room, cordage charge, magazine, to the cordite hoist and gun." —Jon Sandison, historian

Admiral Von Hipper Tobias R. Philbin, 1982 This work aims to constitute an objective analysis of a German World War I naval combat commander within his proper context, by closely defining both the military-technical and military-political milieux in which Franz Hipper operated. The description of Hipper's actions in the battles of Dogger Bank and Jutland and his handling of communications, airships, and the new technologies of war demonstrate the importance of the military environment. The volume also provides a glimpse into the decision-making process involved in the construction of German battle cruisers and the impact these decisions had in combat.

Dreadnought Gunnery and the Battle of Jutland John Brooks, 2005-03-09 This new book reviews critically recent studies of fire control, and describes the essentials of naval gunnery in the dreadnought era. With a foreword by Professor Andrew Lambert, it shows how, in 1913, the Admiralty rejected Arthur Pollen's Argo system for the Dreyer fire control tables.

Building the Kaiser's Navy Gary E. Weir, 1992 His considerable talents as a politician, shipbuilder, strategist, propagandist and manager were to a great degree responsible for the High Seas Fleet encountered by the Royal Navy at Jutland. Ironically, von Tirpitz never commanded the navy he built. Weir does not fail to delineate the shortcomings of his naval system, which was responsible for the fact that those in charge of the fleet's operations played little part in its creation. Von Tirpitz's system also resulted in a disregard of the significance of U-boat potential and a lack of geographic, strategic, and operational considerations. Nevertheless, his profound influence in the navy persisted through the Weimar Republic and into the Third Reich, in the policies of Admiral Erich Raeder, veteran of Jutland.

German Battlecruisers of World War One Gary Staff, 2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of *Battle on the Seven Seas* Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class

were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. German Battle Cruisers of World War One presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

'Luxury' Fleet: (RLE The First World War) Holger H. Herwig, 2014-04-24 Originally published in 1980 'Luxury' Fleet (the phrase was Winston Churchill's) was the first history of the Imperial German navy from 1888 to 1918. After tracing the historical background to German naval ambitions, the first two sections of the book analyse Admiral Tirpitz's programme of building a battle fleet strong enough to engage the Royal Navy in the North Sea. The author shows the fleet in its European setting and describes the warships and the attitudes of the officer corps and seamen. The final section of the book discusses the tactical deployment of the German fleet during the First World War, both in home waters and overseas; and it weighs the balance between those who supported fleet actions in preference to those who favoured cruiser and submarine warfare.
