Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book – used as a textbook by Panzer officers in the war – has an introduction and extensive background notes by the modern English historian Paul Harris.

Triplanetary E. E. Smith,2023-06-30 Hundreds of millions of years ago, two near-omnipotent alien races encountered each other, beginning a conflict that will shape the history of the entire universe. The benevolent Arisians covertly influence humanity, hoping to create a people capable of one day defeating the vile Eddorians, who are waging their own campaign for the fate of civilization on Earth. This sets the stage for a clash between the Triplanetary League of the inner solar system, the enigmatic pirate-scientist Roger, and the Nevians, interlopers whose first appearance wreaks havoc among the other parties. Triplanetary is the first of Edward E. “Doc” Smith’s Lensman series, an early and influential entry in the space opera genre. Originally serialized in Amazing Stories in 1934 as a stand-alone story, Triplanetary was collected in book form in 1948 with six new chapters and numerous additions, changing the story to be a prequel to the rest of the Lensman series.

Computer War Mack Reynolds,2019-10-24 The odds were right for victory. The problem with computer warfare is that the computer is always logical while the human enemy is not – or doesn't have to be. And that's what the Betastani enemy were doing—nothing that the Alphaland computers said they would. Those treacherous foemen were avoiding logic and using such unheard-of devices as surprise and sabotage, treason and trickery. They even had Alphaland's Deputy of Information believing Betastani propaganda without even realizing it. Of course he still thought he was being loyal to Alphaland, because he thought that one and one must logically add up to two. And that kind of thinking could make him the biggest traitor of them all.
