Geneza legendarului Olcit Aurică IVAȘCU,2022-12-19 Cartea prezintă, într-un mod original și bine documentat, povestea fabuloasă a nașterii uzinei de automobile de la Craiova – pe atunci, Societatea Mixtă OLTCIT S.A. – și a genezei autoturismelor Olcit (comercializate de partea română), respectiv Axel (comercializate de partea franceză). Este, așadar, doar partea de început a unei lucrări monografice mai ample, pe care autorul intenționează să o dedice uzinei de automobile din Bănie, care – în curând – va împlini o jumătate de veac de existență. Pe lângă expunerea cronologică a evenimentelor ce au marcat istoria acestui obiectiv economic major al Craiovei și al României, cartea prezintă și o mulțime de fotografii–document, mărturisiri și dezvăluiri inedite, insistând pe lămurirea și îndreptarea, pe cât posibil, a unor informații total false sau ușor derutante, în legătură cu această geneză. Elaborată fiind într-un mod mai puțin academic, dar credibilă în sensul adevărat al cuvântului – făcând trimitere, pas cu pas, la peste 300 de referințe bibliografice și la alte peste 300 note de subsol –, această lucrare este presărată cu picanterii de tot felul, astfel încât cititorul să o poată parcurge cu mare plăcere și cu o curiozitate mereu în alertă. Lucrarea se adresează, în primul rând, iubitorilor de istorie locală și de istorie a automobilului, în general, dar și analiștilor politici și economici, foștilor și actualilor salariați ai uzinei de automobile de la Craiova, precum și fanilor Olcit și Citroën, deopotrivă, din țară și de pretutindeni. Însemnătatea acestei lucrări monografice este marcată, așadar, atât de consemnarea, clarificarea și glorificarea genezei uzinei de automobile de la Craiova, cât și de documentarea și evocarea, ușor sentimentală, a devenirii legendarului

Oltcit.

Citroen John Reynolds,2004 Citroen has always been a pioneering car manufacturer, with a long line of original, advanced designs and a tradition of engineering excellence and innovation. In over 80 years of production, Citroen has produced no fewer than 28 distinct families of vehicles, many achieving cult status with enthusiasts of the marque. Told with great expertise and panache, here is the full post-war story of Citroen cars, encompassing such favorites as the radical Traction Avant, iconic DS and cheeky 2CV. This installment of the popular Enthusiast Color Series introduces today's customs to the casual enthusiast. It features supply ideas and detailed information for the dedicated customizer, and shows a wide variety of customs and custom techniques, as well as what influenced the builders. The author examines 15 cars in full-color, detailed photographs.

Citroen DS Malcolm Bobbit,2005 The most radical of Citroen's idiosyncratic offerings, the DS was sensational when it was introduced in 1955. Twenty years and 1.45 million cars later it was still technically advanced to most other cars. Revolutionary in driving characteristics and comfort, it remains one of the most innovative cars of all time.

Andre Citroen John Reynolds,1999 The French automobile pioneer and entrepreneur Andre Citroen is one of the neglected founding figures of the industry. Although his name remains a familiar household word, his colourful personality and spectacular achievements are now largely unrecognized. This illustrated biography reviews Citroen's life and work and catalogues the cars he produced. It restores his reputation as one of the most progressive and imaginative characters in the history of the motor car.

The Automotive Industry and the Environment P

Nieuwenhuis, P Wells, 2003-07-25 The automotive industry currently faces huge challenges. The fundamental technological paradigm it relies on, volume production, has become progressively more unprofitable in the face of increasingly segmented niche markets. At the same time it faces increasing regulatory and social pressures to improve both the sustainability of its products and methods of production. Building on a wealth of research, *The automotive industry and the environment* addresses those challenges and how they can be met in producing a sustainable and profitable industry for the future. The authors first discuss the development of the automotive industry and the problems it currently faces. They then consider the solutions the industry can adopt. The book reviews trends in more environmentally-friendly technologies such as the use of more sustainable fuel sources and new types of modular design with built-in recyclability. However, these technologies can only be fully exploited if methods of manufacture change. The book also describes models of decentralised production, particularly the micro factory retailing (MFR) model, which provide an alternative to volume production and promise to be both more sustainable and more profitable. *The automotive industry and the environment* provides both a cogent diagnosis of the environmental and other problems facing the industry and a blueprint for a better future. It will be widely welcomed by the industry, policy makers and all those concerned with sustainable transport. Addresses the challenges facing the automotive industry, from the increasing unprofitability of volume production to regulatory and social pressures to improve environmental and product sustainability Examines how the automotive industry can meet the current challenges in producing a sustainable and profitable industry for the future Reviews trends in

Transport Design Gregory Votolato,2007-08-15 We are a world of travelers. Technologies have enabled us to connect with others around the world at incredible speed, and now both business and pleasure operate on a global scale. The process of getting from point A to point B is therefore of more interest than ever, and Gregory Votolato here charts the history of that journey in all its complexity and variety. From limousines to canoes to the Apollo spacecraft, Votolato chronicles the ever-evolving design of vehicles, nautical crafts, and other objects of transportation. *Transport Design* explores the relationship between mass transportation and the travel experience, probing such issues as design styles, economics, entertainment, and, most importantly, customized comfort. Elements such as nineteenth-century railway sleeping couches or the heated car seats of today, Votolato demonstrates, were among the pioneering technologies that set the precedent for personal home and office furnishings. Ultimately, *Transport Design* contends that today's pressures of global commerce and environmental threats demand a radical reappraisal of how and why we travel. A compelling and readable study, *Transport Design* is a must-have for transport design scholars, transit buffs, and reluctant commuters alike.

The Classic Citroens, 1935-1975 John Reynolds,2012-08-22 When the final list for the Car of the Century competition was announced in November 1999, only one company had three finalists: Automobiles Citroen. All three models--the Traction Avant, the 2CV and the DS 19--were developed during the era when the company was owned by the Societe Michelin (Michelin Tire Company). All three were created by the engineer Andre Lefebvre and the stylist Flaminio

Bertoni. This industry recognition highlighted the unique Citroen-Michelin affiliation, demonstrating anew how this relationship made the automaker the benchmark for progressive design and creative engineering within both the international automotive community and the general motoring public. This work provides the first in-depth examination of the Citroen-Michelin era, focusing on the interrelationship between these firms in the development of the revolutionary Michelin X radial tire and its impact on Citroen's avant-garde automobiles. From its origins in 1919 under the watchful eye of Andre Citroen, a history of the automaker's early years is provided. Next, the author takes a detailed look at the cars of the golden age of Citroen: the Traction Avant, the 2CV, the DS/ID, the Ami-6 and Ami-8, the GS/GSA, the CX, and the Citroen-Maserati SM. The innovations, the unique designs, and the new standards of technical excellence that these cars offered are all fully covered, heavily illustrated with rare photographs of the classic automobiles.

Original Citroen DS John Reynolds, Jan De Lange, Rein Van Der Zee, 2006-11-15 The Citroen DS launched in 1955 and continued for 20 years. It remains highly collectible and desirable for enthusiasts of European auto. As with all of our Original titles, this book aims to guide collectors, restorers, and enthusiasts through the various production changes between model years to make sure their restoration or prospective purchase is correct, original, and legitimate. With thorough text and detailed photography, every part of the car is cataloged.

Subhuman Redneck Poems Les Murray, 2015-09-29 In this collection of poems, farmers, fathers, poverty-stricken pioneers, and people blackened by the grist of the sugar mills are exposed to the blazing midday sun of Murray's linguistic powers. Richly inventive,

tenderly perceptive, and fiercely honest, these poems surprise and bare the human in all of us.

Citroen Lance Cole,2014-03-31 In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.
