The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system, and the operational, political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet.

Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Relentless Strike Sean Naylor,2015-09-01 The New York Times Bestseller and Winner of the 2015 Army Historical Foundation Distinguished Writing Award for Unit History Since the attacks of September 11, one organization has been at the forefront of America's military response. Its efforts turned the tide against al-Qaida in Iraq, killed Bin Laden and Zarqawi, rescued Captain Phillips and captured Saddam Hussein. Its commander can direct cruise missile strikes from nuclear submarines and conduct special operations raids anywhere in the world. Relentless Strike tells the inside story of Joint Special Operations Command, the secret military organization that during the past decade has revolutionized counterterrorism, seamlessly fusing intelligence and operational skills to conduct missions that hit the headlines, and those that have remained in the shadows-until now. Because JSOC includes the military's most storied special operations units-Delta Force, SEAL Team 6, the 75th Ranger Regiment-as well as America's most secret aviation and intelligence units, this is their story, too. Relentless Strike reveals tension-drenched meetings in war rooms from the Pentagon to Iraq and special operations battles from the cabin of an MH-60 Black Hawk to the driver's seat of Delta Force's Pinzgauer vehicles as they approach their targets. Through exclusive interviews, reporter Sean Naylor uses his unique access to reveal how an organization designed in the 1980s for a very limited mission set transformed itself after 9/11 to become the military's premier weapon in the war against terrorism and how it continues to evolve today.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are

referenced and described. This ongoing work is moreextensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

366 Days of World War II Richard Binder,2015-02-21 World War II lasted six years. That's 2,194 days. What happened in those six years? In this new diary, author Richard Binder takes a radical new approach to telling the story of the worst conflict humanity has ever experienced. Instead of trying to cover everything, he relates the happenings of just 366 days, the length of a single year. Choosing events great and small from the beginning of the war to its bitter end, he gives you a fascinating and sometimes shocking look at things you know from your high-school history and things you may never have heard of.
