**Music Scenes** Andy Bennett, Richard A. Peterson, 2004 While more than 80 percent of the world's commercial music is controlled by four multinational

firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hiphop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

*From Cave Man to Cave Martian* Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential

lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Lena's heart tore at the seams as she struggled to understand him. Would they find common ground over the course of the United Kingdom operation? Or would they drift further apart...?
