First Day Critter Jitters Jory John

2020-07-07 First-day-of-school
jitters have never been funnier or
more reassuring than in this picture
book by the New York Times
bestselling author Jory John and
critically acclaimed illustrator Liz
Climo It's almost the first day of
school, and the animals are nervous.
Sloth worries about getting there on
time, snake can't seem to get his
backpack fastened onto his body, and
bunny is afraid she'll want to hop
around instead of sitting still. When
they all arrive at their classroom,
though, they're in for a surprise:
Somebody else is nervous too. It's
their teacher, the armadillo! He has
rolled in as a ball, and it takes him
a while to relax and unfurl. But by
the next day, the animals have all
figured out how to help one another
through their jitters. School isn't

so scary after all.

Fabric Formwork Alan Chandler 2007

Fabric-cast concrete involves casting
concrete in forms made with flexible
formwork. This provides the potential
to produce forms that are both
structurally efficient and
architecturally exciting in a
relatively inexpensive and practical
manner. By careful shaping of the
fabric it is possible to produce
complex shapes that would otherwise
be difficult and expensive to produce
using conventional formwork systems.
This book contains six essays that
describe the collaboration between
the Universities of Edinburgh and
East London, together with the Centre
for Architectural and Structural

Technology (CAST) at the University of Manitoba, in their detailed and practical research into concrete casting and formwork. Richly illustrated with photographs and diagrams and containing new and innovative research this book offers the architect, engineer and student inspiration and technical guidance in this re-emerging material.
