**Great Crossings** Christina Snyder 2017-02-01 In *Great Crossings: Indians, Settlers, and Slaves in the Age of Jackson*, prize-winning historian Christina Snyder reinterprets the history of Jacksonian America. Most often, this drama focuses on whites who turned west to conquer a continent, extending "liberty" as they went. *Great Crossings* also includes Native Americans from across the continent seeking new ways to assert anciently-held rights and people of African descent who challenged the United States to live up to its ideals. These diverse groups met in an experimental community in central Kentucky called Great Crossings, home to the first federal Indian school and a famous interracial family. *Great Crossings* embodied monumental changes then transforming North America. The United States, within the span of a few decades, grew from an East Coast nation to a continental empire. The territorial growth of the United States forged a multicultural, multiracial society, but that diversity also sparked fierce debates over race, citizenship, and America's destiny. *Great Crossings*, a place of race-mixing and cultural exchange, emerged as a battleground. Its history provides an intimate view of the ambitions and struggles of Indians, settlers, and slaves who were trying to secure their place in a changing world. Through deep research and compelling prose, Snyder introduces us to a diverse range of historical actors: Richard Mentor Johnson, the politician who reportedly killed Tecumseh and then became schoolmaster to the sons of his former foes; Julia Chinn, Johnson's enslaved concubine, who fought for her children's freedom; and Peter Pitchlynn, a Choctaw intellectual who, even in the darkest days of Indian removal, argued for the future of Indian nations. Together, their stories demonstrate how this era transformed colonizers and the colonized alike, sowing the seeds of modern America.

**No Way Home** David S. Wilcove 2012-09-26 Animal migration is a magnificent sight: a mile-long blanket of cranes rising from a Nebraska river and filling the sky; hundreds of thousands of wildebeests marching across the Serengeti; a blaze of orange as millions of monarch butterflies spread their wings to take flight. Nature's great migrations have captivated countless spectators, none more so than premier ecologist David S. Wilcove. In *No Way Home*, his awe is palpable—as are the growing threats to migratory animals. We may be witnessing a dying phenomenon among many species. Migration has always been arduous, but today's travelers face unprecedented dangers. Skyscrapers and cell towers lure birds and bats to untimely deaths, fences and farms block herds of antelope, salmon are caught en route between ocean and river, breeding and wintering grounds are paved over or plowed, and global warming disrupts the synchronized schedules of predators and prey. The result is a dramatic decline in the number of migrants. Wilcove guides us on their treacherous journeys, describing the barriers to migration and exploring what compels animals to keep on trekking. He also brings to life the adventures of scientists who study migrants. Often as bold as their subjects, researchers speed wildly along deserted roads to track birds soaring overhead, explore glaciers in search of frozen locusts, and outfit dragonflies with transmitters weighing less than one one-hundredth of an ounce. Scientific discoveries and advanced technologies are helping us to understand migrations better, but alone, they won't stop sea turtles and songbirds from going the way of the bison or passenger pigeon. What's required is the commitment and cooperation of the far-flung countries migrants cross—long before extinction is a threat. As Wilcove writes, "protecting the abundance of migration is key to protecting the glory of migration." *No Way Home* offers powerful inspiration to preserve those glorious journeys.
