Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Uninhabitable Earth David Wallace-Wells,2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times Book Review* • *Time* • *NPR* • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (*The Guardian*) and “this generation’s *Silent Spring*” (*The Washington Post*), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. LONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD “The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids

the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, The New York Times
"The book has potential to be this generation's Silent Spring."—The Washington Post
"The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."—Alan Weisman, The New York Review of Books

The West in Early Cinema Nanna Verhoeff, 2006-01-01 Verhoeff investigates the emergence of the western genre, made in the first two decades of cinema (1895-1915). By analyzing many unknown and forgotten films from international archives she traces the relationships between films about the American West, their surrounding films, and other popular media such as photography, painting, (pulp) literature, Wild West Shows and popular ethnography. Through this exploration of archival material she raises new questions of historiography and provides a model for historical analysis. These first traces of the Western film reveal a preoccupation with presence and actuality that informs us about the way in which film, as new medium, took shape within the context of its contemporary visual culture. In *The West in Early Cinema* gaat Nanna Verhoeff op zoek naar de nog onbekende beginjaren van het westerngenre tijdens de eerste twee decennia van het medium film (1895-1915). Aan de hand van onbekende en vergeten films uit internationale filmarchieven traceert zij de relaties tussen films over het Westen, omringende filmgenres uit deze periode, en andere populaire media als fotografie, schilderkunst, (pulp)literatuur, Wild West Shows en populaire etnografie. Deze sporen van het genre tonen een grote actualiteit en variatie, die laat zien op welke manier de film als nieuw medium een vorm vond binnen de toenmalige visuele cultuur.

Austerlitz W.G. Sebald, 2011-12-06 Austerlitz, the internationally acclaimed masterpiece by "one of the most gripping writers imaginable" (The New York Review of Books), is the story of a man's search for the answer to his life's central riddle. A small child when he comes to England on a Kindertransport in the summer of 1939, one Jacques Austerlitz is told nothing of his real family by the Welsh Methodist minister and his wife who raise him. When he is a much older man, fleeting memories return to him, and obeying an instinct he only dimly understands,

he follows their trail back to the world he left behind a half century before. There, faced with the void at the heart of twentieth-century Europe, he struggles to rescue his heritage from oblivion.

Accelerando Charles Stross, 2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

100 Atmospheres The Meco Network, 2019-07-17 100 Atmospheres is an invitation to think differently. Through speculative, poetic, and provocative texts, thirteen writers and artists have come together to reflect on human relationships with other species and the planet.

Zoological Collections of Germany Lothar A. Beck, 2018-02-05 This book is devoted to the knowledge of up to 250 years of collecting, organizing and preserving animals by generations of scientists. Zoological Collections are a huge resource for modern animal research and should be available for national and international scientists and institutions, as well as prospective public and private customers. Moreover, these collections are an important part of the scientific enterprise, supporting scientific research, human health, public education, and the conservation of biodiversity. Much of what we are beginning to understand about our world, we owe to the collection, preservation, and ongoing study of natural specimens. Properly preserved collections of marine or terrestrial animals are libraries of Earth's history and vital to our ability to learn about our place in its future. The approach employed by the editor involves not only an introduction to the topic, but also an external view on German collections including an assessment of their value in the international and national context, and information on the international and national collection networks. Particular attention is given to new approaches of sorting, preserving and researching in Zoological Collections as well as their neglect and/or threat. In addition, the book provides information on all big Public Research Museums, on important Collections in regional Country and local District Museums, and also on University collections. This is a highly informative and carefully presented book, providing scientific insight for readers with an interest in biodiversity, taxonomy, or evolution, as well as natural history collections at large.

Killing Time Nicholas J Saunders, 2011-11-08 The Great War of 1914-1918 now stands at the furthest edge of living memory. And yet, hardly a month passes without some dramatic and sometimes tragic discovery being made along the old killing fields of the Western Front. Graves of British soldiers buried during battle – still lying in rows seemingly arm in arm or found crouching at the entrance to a dugout; whole 'underground cities' of trenches,

dugouts and shelters have been preserved in the mud; field hospitals carved out of the chalk country of the Somme marked with graffiti; unexploded bombs and gas canisters – all of these are the poignant and sometimes deadly legacies of a war we can never forget. Killing Time digs beneath the surface of war to uncover the living reality left behind. Nicholas J. Saunders brings together a wealth of discoveries to offer fresh insights into the human and often barbaric aspect of warfare. He uses discoveries in the trenches, family photographs, diaries and souvenirs to give the dead a voice. You cannot fail to be fascinated and moved by what he unearths.

Karma Of Brown Folk Vijay Prashad, 2001-03-12 Village Voice Favorite Books of 2000 The popular book challenging the idea of a model minority, now in paperback! "How does it feel to be a problem?" asked W. E. B. Du Bois of black Americans in his classic *The Souls of Black Folk*. A hundred years later, Vijay Prashad asks South Asians "How does it feel to be a solution?" In this kaleidoscopic critique, Prashad looks into the complexities faced by the members of a "model minority"-one, he claims, that is consistently deployed as a weapon in the war against black America. On a vast canvas, *The Karma of Brown Folk* attacks the two pillars of the "model minority" image, that South Asians are both inherently successful and pliant, and analyzes the ways in which U.S. immigration policy and American Orientalism have perpetuated these stereotypes. Prashad uses irony, humor, razor-sharp criticism, personal reflections, and historical research to challenge the arguments made by Dinesh D'Souza, who heralds South Asian success in the U.S., and to question the quiet accommodation to racism made by many South Asians. A look at Deepak Chopra and others whom Prashad terms "Godmen" shows us how some South Asians exploit the stereotype of inherent spirituality, much to the chagrin of other South Asians. Following the long engagement of American culture with South Asia, Prashad traces India's effect on thinkers like Cotton Mather and Henry David Thoreau, Ravi Shankar's influence on John Coltrane, and such essential issues as race versus caste and the connection between antiracism activism and anticolonial resistance. *The Karma of Brown Folk* locates the birth of the "model minority" myth, placing it firmly in the context of reaction to the struggle for Black Liberation. Prashad reclaims the long history of black and South Asian solidarity, discussing joint struggles in the U.S., the Caribbean, South Africa, and elsewhere, and exposes how these powerful moments of alliance faded from historical memory and were replaced by Indian support for antiblack racism. Ultimately, Prashad writes not just about South

Asians in America but about America itself, in the tradition of Tocqueville, Du Bois, Richard Wright, and others. He explores the place of collective struggle and multiracial alliances in the transformation of self and community-in short, how Americans define themselves.

Modelling the Late Panzerkampfwagen IV Tom Cockle, Gary Edmundson, 2012-02-20 The Panzerkampfwagen IV has often been referred to as the 'workhorse' of the German Army in World War II. This important weapon went through several upgrades and improvements during its lifetime and is the only German tank to have been produced continuously throughout the entire war. In his previous title, Modelling the Early Panzerkampfwagen IV, Tom Cockle covered the early production Panzer IV. This book will cover the later versions of the tank from those that were initially equipped with the 7.5cm KwK 40 L/43 to later versions which were mounted with the L/48 gun. Step-by-step photographs show how to model this tank across various scales and at various skill levels, making this book ideal for both beginners as well as advanced modellers interested in minuscule detail, scratch built extras and rare tank markings.

Tabletop Wargames: A Designers' and Writers' Handbook Rick Priestley, John Lamshead, 2016-11-30 Unlike chess or backgammon, tabletop wargames have no single, accepted set of rules. Most wargamers at some point have had a go at writing their own rules and virtually all have modified commercially available sets to better suit their idea of the ideal game or to adapt favourite rules to a different historical period or setting. But many who try soon find that writing a coherent set of rules is harder than they thought, while tweaking one part of an existing set can often have unforeseen consequences for the game as a whole. Now, at last, help is at hand. Veteran gamer and rules writer John Lamshead has teamed up with the legendary Rick Priestley, creator of Games Workshop's phenomenally successful Warhammer system, to create this essential guide for any would-be wargame designer or tinkerer. Rick and John give excellent advice on deciding what you want from a wargame and balancing 'realism' (be it in a historical or a fantasy/sci-fi context) with playability. They discuss the relative merits of various mechanisms (cards, dice, tables) then discuss how to select and combine these to handle the various essential game elements of turn sequences, combat resolution, morale etc to create a rewarding and playable game that suits your tastes and requirements

The Landscape of Contemporary Infrastructure Marcel Smets, Kelly Shannon, 2016 Around the globe the importance of infrastructure as the motor of economic development rising owing to increasing mobility and the need to make urban territories accessible. As a result, infrastructure networks are among the most complex and significant design tasks today. This book investigates how the design of infrastructure actively influences the organization of the inhabited landscape. Works of infrastructure are analyzed as footprints of civilization, as physical presence, as transformers of perception, and as new vessels of collective life. The authors identify these characteristics, together with the conditions that influence them, and suggest a typology of design attitudes as revealed in recent practice around the world. Each chapter is illustrated with key works by some of the world's most inspiring designers, including Vito Acconci, Paul Andreu, Bentham Crouwel, Dietmar Feichtinger, Diller Scofidio + Renfro,

Terry Farrell, Norman Foster, Nicholas Grimshaw, Antoine Grumbach, Zaha Hadid, Arata Isozaki, Bruno Mader, Maxwan, Montgomery Sisam, OMA, Tonkin Zulaikha Greer, UN Studio, and Zwarts & Jansma. The authors demonstrate how the combined creative potential of architecture, landscape architecture, and urban design is essential to putting into place an efficient, modern infrastructure. The result is an indispensable instrument for everyone involved in the design of infrastructure, and for all observers of the contemporary city. --

Film museum practice and film historiography Bregt Lameris, 2017-07-07 This book is an elaborate study of the interrelationships between film historical discourse and archival practices, such as the collecting, restoration and exhibition of films. It delineates how film historiographical discourses always leave traces in the film archive, and vice versa. The book investigates and analyzes the history of three important collections from the archive of EYE Film Museum: the Uitsluitend-collection, the Desmet-collection, and Dutch silent films. The histories of these collections have different connections to film historiography, and as such allow us to investigate these interrelationships from various perspectives. It shows how archival films and collections always carry the historical traces of selection policies, restoration philosophies, and exhibition strategies. As such the book aims to demonstrate how film archives cannot be innocent or neutral sources of film history. In addition, it shows that current EYE Film Museum activities semi-automatically refer to this history of which the archive carries the material traces.

Tales of the San Francisco Cacophony Society Kevin Evans, John Law, Carrie Galbraith, 2019-06-27 A template for pranksters, artists, adventurers and anyone interested in rampant creativity, this is the history of the most influential underground cabal that has never been exposed by the mainstream media. Rising from the ashes of the mysterious and legendary Suicide Club, the Cacophony Society at its zenith hosted chapters in most major US cities and influenced much of what was once called the 'underground'. Packed with original art, never before published photographs, original documents and incredulous news stories this is an homage to the San Francisco group.
