The incredible splendors of some of the worlds' most recognized architectural feats are brought to life within the pages of Origami Architecture. With this paper craft book, some card stock paper, and a hobby knife, anyone can build spectacular re-creation's of the most famous buildings in the world. Once the structure is attached to the base not only will does it look amazing, but it can be folded up and taken anywhere. This origami book includes: Over 900 photographs Full-color instructional assembly diagrams Brief histories of each building Downloadable CD content

Science and Civilisation in China: Volume 5, Chemistry and Chemical Technology, Part 1, Paper and Printing Joseph Needham,Tsien Tsuen-Hsuin,1985-07-11 Part one of the fifth volume of Joseph Needham's great enterprise is written by one of the project's collaborators. Professor Tsien Tsuen-Hsuin, working in regular consultation with Dr Needham, has written the most comprehensive account of every aspect of paper and printing in China to be published in the West. From a close study of the vast mass of source material, Professor Tsien brings order and illumination to an area of technology which has been of profound importance in the spread of civilisation. The main body of the book is a detailed study of the invention, technology and aesthetic development of printing in China. From the growth and ultimate refinements of early woodcut printing to the spread of printing from movable type and the development of book-binding, Professor Tsien carries the story forward to the beginning of the nineteenth century when 'more printed pages existed in Chinese than in all other languages put together'.
