***Achtung-Panzer!* Heinz Guderian,1995** This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Maria Merian's Butterflies Kate Heard,2016 In 1699, the German artist and

entomologist Maria Sibylla Merian set sail for Suriname, in South America. There she would spend two years studying the animals and plants which she encountered, aiming to explore the life-cycle of insects (then only partially understood). Those studies led to the publication of the *Metamorphosis Insectorum Surinamensium* (the Metamorphosis of the Insects of Suriname), a luxury volume which brought the wonders of Suriname to Europe.--

The Art of Color Photography John Hedgecoe,1998 The ability to move beyond ordinary snapshots is not a matter of expensive equipment or complicated techniques. No matter what technical advances are made, creative choice will always lie in the hands of the photographer and his/her artistic perception. The aim of this book is to reveal which choices are available so that what is a pleasurable pastime can become an absorbing art. The photographs in this volume range from startling landscapes to startling close-ups taken at high speed, and not only make up an exhibition of varied and beautiful color pictures but also represent a coherent exploration of the very nature of color. Supported by detailed technical sections, John Hedgecoe's photographs lead up from the basic theory of light to the subtle harmonies of color in all its aspects, and illustrate the theory and practice of all the essential techniques for using cameras, lenses and filters, choosing color film and composing the perfect shot. Completely revised and updated, this book covers all the technical knowledge required to take stunning color photographs. Sections on autofocus and digital cameras, together with advice on using the latest computer manipulation programs, ensure that this is one of the most up-to-date guides available.

Introducing Transformational Grammar Jamal Ouhalla,1999 The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar, it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition introduces students with no previous training to Transformational Grammar. Covering the framework known as Principles and Parameters as well as the more recent framework known as Minimalism, it includes a range of new exercises, making it ideal for students at all levels.
