The Disneyfication of Animals Rebecca Rose Stanton,2020-09-17 This book critically examines how Walt Disney Animation Studios has depicted – and sometimes failed to depict – different forms of harming and objectifying non-human animals in their films. Each chapter addresses a different form of animal harm and objectification through the theories of speciesism, romanticism, and the ‘collapse of compassion’ effect, from farming, hunting and fishing, to clothing, work, and entertainment. Stanton lucidly presents the dichotomy between depictions of higher order, anthropomorphised and neotonised animal characters and that of lower-order species, showing furthermore how these depictions are closely linked to changing social attitudes about acceptable forms of animal harm. An engaging and novel contribution to the field of Critical Animal Studies, this book explores the use of animals not only in Disney’s best known animated films such as 101 Dalmatians, but also lesser known features including Home on the Range and Fun and Fancy Free. A quantitative appendix supplying data on how often each animal species appears and the amount of times animal harm or objectification is depicted in over fifty films provides an invaluable resource and addition to scholars working in both Disney and animal studies.

*100 Greatest American and British Animated Films* Thomas S. Hischak,2018-04-20 Animation has been a staple of the filmmaking process since the early days of cinema. Animated shorts had been produced for decades, but not until 1937 did a major studio venture into animated features when Walt Disney produced Snow White and the Seven Dwarfs. Of the hundreds of animated feature films made since, many have proven their importance over the years while also entertaining generations of audiences. There are also many recent animated movies that promise to become classics in the field. In 100 Greatest American British Animated Films, Thomas S, Hischak looks at the most innovative, influential, and entertaining features that have been produced since the late 1930s—from traditional hand-drawn works and stop-motion films to computer-generated wonders. These movies have been selected not simply because of their popularity or critical acceptance but for their importance. Entries in this volume contain plot information production history critical reaction commentary on the film’s cinematic quality a discussion of the film’s influence voice casts production credits songs sequels, spin-offs, Broadway versions, and television adaptations awards and nominations Each movie is also discussed in the context of its original release as well as the ways in which the film has lived on in the years since.
