The Photomontages of Hannah Höch Hannah Höch 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Höch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

Quest for the Killers GOODFIELD 2013-06-29 The five stories in this book are tales about human beings and the human condition in which

they find themselves. They are stories of scientists - but not of white-coated laboratory figures, happy to leave to others the practical application of their discoveries. In the circumstances I recount, the scientists were brought face to face, sometimes in dramatic confrontations, with the very people whose problems their work might help solve. As I came to realize, there now exists an international network of unusual scientists whose members are concerned individuals, determined that their scientific work should help alleviate the human condition. This book was conceived as an account of some exciting episodes in contemporary biomedicine. But during the four years it took to complete, several other themes emerged. First, each story illustrates aspects of the relation between Western science and technology and those major health problems which are often of dreadful significance for the Third World. In this relation the fruits of Western research are not simply applied to

global health problems. Rather the relation is reciprocal, for scientific research, whether prompted by the medical problems of the Third World or actually conducted there, is yielding vital clues to many fundamental aspects of human biology, as well as pointing toward possible therapies for the serious diseases of Western society, such as cancer or the dementia of old age. After I had written the first draft a second theme emerged.

A Saint in Seattle David P. Jackson 2003 A Saint in Seattle is the inspiring and unlikely life story of a modern buddha. In 1960, the Tibetan lama Dezhung Rinpoche (1906-87) arrived in Seattle after being forced into exile from his native land by the Communist Chinese. Already a revered master of the teachings of all Tibetan Buddhist schools, he would eventually become a teacher of some Western Buddhism's most noted scholars.

The Mobile Workshop Clapperton Chakanetsa Mavhunga 2018-06-01 How the presence of the tsetse fly turned the African forest into an open laboratory where African knowledge formed the basis of colonial tsetse control policies. The tsetse fly is a pan-African insect that bites an infective forest animal and ingests blood filled with invisible parasites, which it carries and transmits into cattle and people as it bites them, leading to n'gana (animal trypanosomiasis) and sleeping sickness. In The Mobile Workshop, Clapperton Chakanetsa Mavhunga examines how the presence of the tsetse fly turned the forests of Zimbabwe and southern Africa into an open laboratory where African knowledge formed the basis of colonial tsetse control policies. He traces the pestiferous work that an indefatigable, mobile insect does through its movements, and the work done by humans to control it. Mavhunga's account restores the central role not just of African labor but of African intellect in the production of knowledge

about the tsetse fly. He describes how European colonizers built on and beyond this knowledge toward destructive and toxic methods, including cutting down entire forests, forced “prophylactic” resettlement, massive destruction of wild animals, and extensive spraying of organochlorine pesticides. Throughout, Mavhunga uses African terms to describe the African experience, taking vernacular concepts as starting points in writing a narrative of *uzivo* (knowledge) rather than viewing Africa through foreign keywords. The tsetse fly became a site of knowledge production—a mobile workshop of pestilence.

International Humanitarian Action Hans-Joachim Heintze 2017-10-04 This textbook examines a wide range of humanitarian action issues in five parts, presented by specialists from different academic fields. The respective parts reflect the five core modules of the International NOHA Joint Master's Programme “International Humanitarian Action”: a) World Politics, b) International Law, c) Public Health, d) Anthropology, and e) Management. The book serves as a common basis for teaching at all NOHA universities and aims at imparting the basic knowledge and skills needed to excel in a complex interdisciplinary and international learning context. It provides in-depth information on key international humanitarian

principles and values, professional codes of conduct, and the commitment to their implementation in practice. The book will thus be useful for all students of the NOHA Joint Master's Programme and participants of any courses with a similar content, but also for academics and practitioners affiliated with entities such as international organisations and NGOs. It may also serve as an introduction to anyone with an interest in understanding the numerous and inter-linked facets of humanitarian action.

The Production of Space Henri Lefebvre
1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. *The Production of Space* is his major philosophical work and its translation has been long awaited by scholars in many different fields.

The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Maximum Mini Jeroen Booi 2009-03-15 This

book focuses solely on the cars derived from the classic Mini. Small GTs, sports cars, roadsters and fun cars: Mini-derivatives that changed the specialist motoring market completely in the early sixties, and new designs kept it busy for nearly four decades. from the well known Mini Marcos and Unipower GT that raced at Le Mans, to the very obscure but as exciting Coldwell GT or Sarcon Scarab, almost 60 cars are thoroughly researched, described and photographed in this book.

The Mini's creator, Alec Issigonis, was given a free hand to make a proper small car and his innovative design not only redefined the family car, but also started a revolution as a performance car. Classic Mini Specials and Moke explores the diverse range of vehicles that used the Mini shape, as well as the only variation actually

designed by Alec Issigonis, the Mini Moke. In addition to the famous race and rally cars, coachbuilt conversions and highly modified saloons and commercials, Keith Mainland looks at overseas Mini and Moke production and the many factory-produced limited edition Minis. There is also advice about buying and owning your own special Mini.

Mini Christy Campbell 2016-03-17 From its birth in 1959, the Mini grew to become a national treasure and huge success: Princess Margaret owned one, as did Steve McQueen, Paul Newman, the Beatles, Peter Sellers and Marianne Faithfull. Its popularity with women in particular marked it out from the crowd, and sales soared as the car was taken up by the new urban elite and took a starring role in *The Italian Job*. But there was trouble - the basic Mini sold for less than it cost to produce, and by the early eighties the miracle machine had become a symbol of manufacturing incompetence. The end came in 2000, but a new generation of Mini was

just around the corner, and today this motoring pin-up is as iconic as ever. Mini features contributions from those who have known and loved this troubled star, as well as its scornful critics. Full of fascinating facts and vivid stories, this is a fabulous celebration of a living national treasure that reads more like the life story of a wayward royal than a machine.

Unburning Fame Ola Wikander 2017 "In this book, Ola Wikander studies Indo-European influences in the literary world of the Hebrew Bible and the Ugaritic texts, tracing a number of poetic motifs and other concepts originating in the Indo-European linguistic milieu of the greater Ancient Near East (e.g., among Anatolians and in Indo-European traditions transmitted through Mitanni)--and possibly at earlier, reconstructible levels--as they influenced what became Northwest Semitic poetic culture. The methodology used is what Wikander refers to as "etymological poetics": the study of poetic and mythological structures as transmitted

through specific lexical material. One of the motifs discussed is that of destroying heat being used as a metaphor for forgetting important cultural memories and, consequently, of the resilience of such memories being expressed as resistance to burning. Thus, bringing these ancient connections between Indo-European and Northwest Semitic culture into the open is, in a sense, showing their "Unburning Fame"--

MINI 50 Years Rob Golding 2007-04-15 It's not the size that matters, Austin Powers tells his son as they look over the MINI, "but how you use it." And the diminutive MINI has made it big -- from the beginning. This book tells the full story of the iconic car from its initial launch in the late 1950s through its current super-hip BMW-built incarnation -- right up to the revised version set for release in 2006. Packaged in a clever "under the hood" flap with magnetic clasp (the front flap opens to show the engine), MINI 50 Years captures both the sense of fun and style that

have made Mini one of the most popular compacts in the history of the automotive industry. The threads that tie together the original MINI and today's are numerous and fascinating, and as interesting as the differences that set the two cars apart. MINI 50 Years follows them all. From the swingin' star of movies—immortalized in the original film *The Italian Job* in 1961 and again in the 2003 remake, as well as in *The Bourne Identity*—to the racing champ and now the 21st-century hipster vehicle of choice, Minis are small, fun, memorable, and cool. Author and mini expert Rob Golding treats readers to every thrill that marks the MINI.

The book traces the Mod

youth culture from its genesis in the dimly lit clubs of London's Soho. where it began as a way for young people to reconfigure modernity after the chaos of World War II, to its contemporary, country-specific expressions. By examining Mod culture in the United States, Germany, and Japan alongside the United Kingdom, "We Are the Mods" contrasts the postwar development of Mod in those countries that lost the war with those that won. The book illuminates the culture's fashion, music, iconography, and gender aesthetics, to create a compelling portrait of a transnational subculture." --Book Jacket.

Forbidden Friendships Michael Roche 1998-03-05 "This is a superb work of scholarship, impossible to overpraise.... It marks a milestone in the 20-year rise of gay and lesbian studies."--Martin Duberman, *The Advocate* The men of Renaissance Florence were so renowned for sodomy that "Florenzer" in German meant "sodomite." In the late fifteenth century, as many as one in two Florentine men had come to the attention of the authorities for sodomy by the time they were thirty. In 1432 The Office of the Night was created specifically to police sodomy in Florence. Indeed, nearly all Florentine males probably had some kind of same-sex experience as a part of their "normal" sexual life. Seventy years of denunciations, interrogations, and sentencings left an extraordinarily detailed record, which author Michael Roche has used in his vivid depiction of

this vibrant sexual culture in a world where these same-sex acts were not the deviant transgressions of a small minority, but an integral part of a normal masculine identity. Rocke roots this sexual activity in the broader context of Renaissance Florence, with its social networks of families, juvenile gangs, neighbors, patronage, workshops, and confraternities, and

its busy political life from the early years of the Republic through the period of Lorenzo de' Medici, Savonarola, and the beginning of Medici princely rule. His richly detailed book paints a fascinating picture of Renaissance Florence and calls into question our modern conceptions of gender and sexual identity.
