Amy Wu and the Patchwork Dragon Kat Zhang, 2020-12-15 In this sweet and brightly illustrated picture book, Amy Wu must craft a dragon unlike any other to share with her class at school in this unforgettable follow-up to *Amy Wu and the Perfect Bao*. Amy loves craft time at school. But when her teacher asks everyone to make their own dragon, Amy feels stuck. Her first dragon has a long, wingless body, stag-like horns, and eagle claws, but her friends don't think it's a real dragon. Then she makes dragons like theirs, but none of them feels quite right...None of them feels like hers. After school, a story from Grandma sparks new inspiration, and Amy rounds up her family to help her. Together, can they make Amy's perfect dragon?

Becoming Good Ancestors David Ehrenfeld, 2009 Ehrenfeld is one of America's leading conservation biologists. *Becoming Good Ancestors* unites in a single, up-to-date framework pieces written over two decades, spanning politics, ecology, and culture, and illuminating the forces in modern society that thwart our efforts to solve today's hard questions about society and the environment. Our society has an inherent sense of what is right, says Ehrenfeld, and the creativity and persistence to make good things happen. It is now time to apply our intelligence to the very large problems we all face.

Badenheim Nineteen-thirty-nine Aharon Apelfeld, 1980 A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but

Badenheim and its summer residents go about life as normal.

Anticorruption in History Ronald Kroeze, André Vitória, Guy Geltner, 2018

Anticorruption in History is a timely and urgent book: corruption is widely seen today as a major problem we face as a global society, undermining trust in government and financial institutions, economic efficiency, the principle of equality before the law and human wellbeing in general. Corruption, in short, is a major hurdle on the path to Denmark a feted blueprint for stable and successful statebuilding. The resonance of this view explains why efforts to promote anticorruption policies have proliferated in recent years. But while the subject of corruption and anticorruption has captured the attention of politicians, scholars, NGOs and the global media, scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place, with the attendant diversity in how to define, identify and address corruption. Economists, political scientists and policy-makers in particular have been generally content with tracing the differences between low-corruption and high-corruption countries in the present and enshrining them in all manner of rankings and indices. The long-term trends & social, political, economic, cultural; potentially undergirding the position of various countries plays a very small role. Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to

a country's image (of itself or as construed from outside) as being more or less corrupt. It is precisely this scholarly lacuna that the present volume intends to begin to fill. The book addresses a wide range of historical contexts: Ancient Greece and Rome, Medieval Eurasia, Italy, France, Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania, the Ottoman Empire, the Netherlands, Germany, Denmark, Sweden and the former German Democratic Republic.

Adrian Frutiger – Typefaces Heidrun Osterer, Philipp Stamm, 2014-05-08 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate

types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture. This second, revised and expanded study edition, which now has an index, makes Frutiger's achievement even more accessible.

The Canterbury Puzzles H. E. Dudeney, 2002-10-01 This book includes 110 puzzles, not as individual problems but as incidents in connected stories. The first 31 are amusingly posed by pilgrims in Chaucer's Canterbury Tales. Additional puzzles are presented using different characters. Many require only the ability to exercise logical or visual skills; others offer a stimulating challenge to the mathematically advanced.
