International Law Documents Jan Klabbers

2016-10-06 This concise collection of the most important international law instruments is an essential resource for all students of international law. In addition to standard instruments such as the UN Charter, human rights documents and the UN Convention on the Law of the Sea, the volume also features topics not usually included in similar collections, such as international labour instruments, the work of the G20, and bilateral and unilateral instruments. Taking a global approach, the collection incorporates American, African and Asian instruments alongside UN, EU and other international documents, to reflect the diverse nature of international law courses. The two-colour design aids student navigation through the materials, and lengthier documents such as UNCLOS and the ICC statute are presented in shortened form, making the volume concise and clear. An ideal companion for students of international law, the book is also valuable for students of international human rights law, international relations, global governance and international politics.

The Legal Order of the Oceans A.V. Lowe 2009-08-15 This compendium of documents brings together, for the first time in an affordable format, the essential documents needed to gain a thorough knowledge of the laws of the sea. There has been a long felt need for such a collection to provide students, scholars and practitioners with a working library of the key materials. This collection integrates documents of the International Maritime Organisation (which are not available anywhere on the web in consolidated form), of regional fisheries organizations, security related documents, treaties concerning resource exploitation, environmental protection measures and much more, into the framework created by the Law of the Sea Convention. The book is aimed at teachers and practitioners in the area and can be used as a class room companion for law of the sea courses.

The International Law Commission 1949-1998: Volume One: The Treaties Arthur Watts 1999-09-09 This is the first of a three volume set, the publication of which will mark the

fiftieth anniversary of the International Law Commission, the UN body principally responsible for the codification and development of international law. Together, the three volumes will collect the full texts of the Commission's final draft Articles and Commentaries, and other final reports, on all the topics on which it has completed work during its first fifty years, up to and including 1998. They will also contain the texts of all the treaties which have been concluded on the basis of the Commission's draft Articles.

A handbook on the new law of the sea. 2 (1991) René Jean Dupuy 1991-10-16 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference. Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200-nautical-mile fishery zones and drawn on the principles laid down for exploiting living resources. Although these laws have been formulated unilaterally by states, international custom, since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951, is derived from concordant national rules. This shift began even before the Conference ended, and has been consolidated since then. Moreover, the régime governing the sea-bed beyond the limits of national jurisdiction defined by Part XI, which was the stumbling block of the Conference, is subject to transitional arrangements on the basis of two resolutions adopted in the Conference Final Act, one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors. This two-volume work, an earlier edition of which appeared in French, has been written by a team of experts of international renown. It presents an analysis of the Convention with an additional Chapter on the legal régime governing underwater archaeological and historical objects.

Communism in Eastern Europe Melissa Feinberg 2021-12-30 Communism in Eastern Europe is a ground-breaking new survey of the history of Eastern Europe since 1945. It examines how Communist governments came to Eastern Europe, how they changed their societies and the legacies that persisted after their fall. Written from the perspective of the 21st century, this book shows how Eastern Europe's trajectory since 1989 fits into the longer history of its Communist past. Rather than focusing on high politics, Communism in Eastern Europe concentrates on the politics of daily life, melding political history with social, cultural and gender history. It tells the history of this complicated era through the voices and experiences of ordinary people. By focusing on the complex interactions of everyday life, Communism in Eastern Europe illuminates the world Communism made in Eastern Europe, its politics and culture, values and dreams, successes and failures. This book is an engaging introduction to the history of Communist Eastern Europe for any reader. It is ideal for adoption in a wide array of undergraduate and graduate courses in 20th century European history.
