The Economy of Literature Marc Shell, 1993-09 Why did coinage, tyranny, and philosophy develop in the same time and place? Marc Shell explores how both money and language give worth by providing a medium of exchange, how the development of money led to a revolution in philosophical thought and language, and how words transform mere commodities into symbols at once aesthetic and practical. Offering carefully documented interpretations of texts from Heraclitus, Herodotus, Sophocles, Plato, Aristotle, Rousseau, and Ruskin, Shell demonstrates the kinship between literary and economic theory and production, introduces new methods of analyzing texts, and shows how literary and philosophical fictions can help us understand the world in which we live.

Literary Bondage William Luis, 2014-05-23 In the nineteenth century, the Cuban economy rested on the twin pillars of sugar and slaves. Slavery was abolished in 1886, but, one hundred years later, Cuban authors were still writing antislavery narratives. William Luis explores this seeming paradox in his groundbreaking study *Literary Bondage*, asking why this literary genre has remained a viable means of expression. Applying Foucault's theory of counter-discourse to a vast body of antislavery literature, Luis shows how these narratives have always served to undermine the foundations of slavery, to protest the marginalized status of blacks in Cuban society, and to rewrite the canon of acceptable history and literature. He finds that emancipation did not end the need for such counter-discourse and reveals how the antislavery narrative continues to provide a forum for voices that have been silenced by the dominant culture. In addition to such well-known works as Cecilia Valdés, *The Kingdom of This World*, and *The Autobiography of a Runaway Slave*, Luis draws on many

literary works outside the familiar canon, including Romualdo, uno de tantos, Aponte, Sofía La familia Unzúazu, El negrero, and Los guerrilleros negros. This comprehensive coverage raises important questions about the process of canon-formation and brings to light Cuba's rich heritage of Afro-Latin literature and culture.

Plotting Women Jean Franco, 1989 Where is the common ground for feminist theory and Latin American culture? Jean Franco explores Mexican women's struggle for interpretive power in relation to the Catholic religion, the nation, and post-modern society; and examines the writings of women who wrote under the shadow of recognized male writers, as well as the works of more marginal figures. In this original and skillfully written book Franco demonstrates the many feminisms that emerge in apparently rigid and adverse situations, and provides the foundation for a more comprehensive, less ethnocentric feminist theory.

Linguistic Criticism Roger Fowler, 1986 A particularly fruitful development in literary studies has been the application of ideas drawn from linguistics. Precise analytical methods help the practical criticism of texts, while at the same time the theory of language has illuminated literary theory. *Linguistic Criticism* is an accessible introduction to this often confusing subject. Fowler sets out clearly and simply a variety of analytical techniques whose application he demonstrates in discussions of a wide range of texts drawn from fiction, poetry, and drama. He concentrates on structures that relate literature to ordinary language, stressing the importance of the reader's everyday language skills. This second edition has clarified and expanded sections on the role of the reader in literary criticism and includes more twentieth-century texts and examples.

Manuel Puig and the Spider Woman Suzanne Jill Levine, 2001 This is the first biography, now available in paperback, of Manuel Puig (1932-1990), Argentinian author of *Kiss of the Spider Woman*

and pioneer of high camp. Suzanne Jill Levine, his principal English translator, draws upon years of friendship as well as copious research and interviews

Fans, Bloggers, and Gamers Henry Jenkins, 2006 Henry Jenkins at Authors@Google (video) Henry Jenkins's pioneering work in the early 1990s promoted the idea that fans are among the most active, creative, critically engaged, and socially connected consumers of popular culture and that they represent the vanguard of a new relationship with mass media. Though marginal and largely invisible to the general public at the time, today, media producers and advertisers, not to mention researchers and fans, take for granted the idea that the success of a media franchise depends on fan investments and participation. Bringing together the highlights of a decade and a half of groundbreaking research into the cultural life of media consumers, Fans, Bloggers, and Gamers takes readers from Jenkins's progressive early work defending fan culture against those who would

marginalize or stigmatize it, through to his more recent work, combating moral panic and defending Goths and gamers in the wake of the Columbine shootings. Starting with an interview on the current state of fan studies, this volume maps the core theoretical and methodological issues in Fan Studies. It goes on to chart the growth of participatory culture on the web, take up blogging as perhaps the most powerful illustration of how consumer participation impacts mainstream media, and debate the public policy implications surrounding participation and intellectual property.

Irony's Edge Linda Hutcheon, 2003-09-02 The edge of irony, says Linda Hutcheon, is always a social and political edge. Irony depends upon interpretation; it happens in the tricky, unpredictable space between expression and understanding. *Irony's Edge* is a fascinating, compulsively readable study of the myriad forms and the effects of irony. It sets out, for the first time, a sustained, clear analysis of the theory and the political contexts of irony, using a wide range of references from contemporary culture. Examples extend from Madonna to Wagner, from a clever quip in conversation to a contentious exhibition in a museum. *Irony's Edge* outlines and then challenges all the major existing theories of irony, providing the most comprehensive and critically challenging theory of irony to date.

Practising Feminist Political Ecologies Wendy Harcourt, Ingrid L. Nelson, 2015-05-14 Destined to transform its field, this volume features some of the most exciting feminist scholars and activists working within feminist political ecology, including Giovanna Di Chiro, Dianne Rocheleau, Catherine Walsh and Christa Wichterich. Offering a collective critique of the 'green economy', it features the latest analyses of the post-Rio+20 debates alongside a nuanced reading of the impact of

the current ecological and economic crises on women as well as their communities and ecologies. This new, politically timely and engaging text puts feminist political ecology back on the map.

The Castration of Oedipus Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual movements of psychoanalysis, postmodernism, and feminism have redefined the ways in which we think about human experience. And yet, an integration of these movements has been elusive, if not impossible. In this landmark book, J.C. Smith and Carla J. Ferstman combine these disparate traditions to create a provocative, unified, and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory. The dialectics of domination and submission are central to Smith and Ferstman's argument. Men and women, they insist, must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche, or, in Nietzsche's terms, the Will to Power. They argue that the unification of psychoanalysis, postmodernism, and feminism leads us to a shocking conclusion--that women and men cannot move beyond the suffering which so haunts the human condition, unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women. And women, conversely, must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality. A work of tremendous insight and extraordinary intellectual energy, The Castration of Oedipus will provoke strong reactions in all readers regardless of ideology.

Learning Sequences in Music Edwin Gordon, 2012 Learning Sequences in Music: Skill, Content, and Patterns is a milestone in music education. This book is perhaps the most provocative exploration ever written of how we learn music, from infancy to adulthood, and what we should do to teach music more effectively. Revised, expanded, and completely rewritten for this eighth and final

edition, Professor Edwin E. Gordon's continued research reaffirms his place as perhaps the world's principal thinker and researcher in music education. Early controversial ideas championed by Gordon have now been widely accepted in the field: the importance of standardized tests, the crucial role of early childhood music education, and the fundamental need to teach audiation as a precursor to music reading. Professor Gordon continues to present a feast of ideas in this new edition, combining the latest experimental and observational research in music learning with his own experience teaching students of all ages. Topics covered include: the state of music today, audiation, individual differences, aptitude, readiness, and measurement and evaluation. This book is a monumental achievement sure to be read and reread by generations of music educators to come.--Publisher's description.

Ekphrasis in the Age of Cervantes Frederick Alfred De Armas, 2005 This collection of essays seeks to open up this complex interdisciplinary field of study by including essays on many aspects of visual writing in sixteenth- and seventeenth-century Spain.--Jacket.

The Reading Environment Aidan Chambers, 1996 Reading is a provocative act; it makes things happen. It is a fact of our psychological make-up that we cannot read anything without experiencing some kind of response. If we are forced to read as a duty, expecting no delight, we are likely to find it a boring business. We cannot easily read for ourselves what we haven't heard said. Some people say they don't like reading stories, but I've never come across anyone who doesn't like hearing one. With such forthright statements Aidan Chambers ensures that *The Reading Environment* will make things happen about the ways reading is presented in schools. For Chambers, reading is a life-enhancing occupation, not a pastime. Drawing memorably on his own experience as a teacher and a reader, he

offers a multitude of stimulating ideas for opening the rewards of thoughtful reading to all children. Concerned with the practical aspects of creating an environment that supports children as they become readers, he provides suggestions on school book fairs and displays, reading areas, author visits, and book selection. But having enabled children to become readers is only part of the issue, and he also addresses ways of keeping track of children's reading and helping them develop responses to what they read. Concise and elegantly written, *The Reading Environment* will be a valuable book for preservice and inservice teachers, and its distinctive blend of reflective and active comment make it an enlightening reminder to parents, media specialists, and librarians. *Tell Me: Children, Reading, and Talk* is the companion volume to *The Reading Environment*.

Symmetries Luisa Valenzuela, 1998 Stories by an Argentinian writer. They range from *The Charm Against Storms*, on the Sandinista revolution in Nicaragua, to *Tango*, in which a woman describes the sort of relationship the dance can create between two people.
