*Frostgrave: Perilous Dark* Joseph A. McCullough 2019-10-31 There are many tales of the Frozen City, and not all of them tell of battles between rival wizards. Often, the greatest adventures are those that pit a wizard and his trusty warband against the myriad perils found amidst the ruins of Felstad. This new supplement for Frostgrave presents rules for playing solo and cooperative games in which the focus shifts from the feuds of wizards to exploring the city, unlocking its mysteries... and surviving what is discovered. With guidelines for scaling game difficulty, dungeon crawls, monster generation, and more, as well as ten scenarios demonstrating these

options, this volume offers players everything they need to venture alone – or with allies – into Frostgrave. Why should wizards fight amongst themselves? There is plenty of treasure for all and the Frozen City is enemy enough!

*From Cave Man to Cave Martian* Manfred "Dutch" von Ehrenfried 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept

requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars.

Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of

working and living in lunar and Martian caves and lava tubes.

Embroidered Botanicals Yumiko Higuchi 2019-08-27 Stitch simple and striking embroidery designs with wool, cotton, pearl cotton, and metallic threads.

Japanese artist Yumiko Higuchi is celebrated for her embroidery designs with a Scandinavian flair. The motifs and patterns she offers here are true to her trademark zakka style: simple and graphic yet softened with organic shapes and imagery drawn from nature. The result is embroidery that feels modern and nostalgic all at once. In Embroidered Botanicals, Higuchi offers 39 embroidery projects highlighting the distinctive quality of different threads. With motifs created specifically for different types of thread-wool, cotton, pearl cotton, and metallic-makers will

become better versed in the materials available to them. With beautiful photographs, clear step-by-step instructions, and detailed diagrams, this book will be an inspiring guide for those new to embroidery and a fresh and unique offering for those experienced with needle and thread.

**Senna Versus Prost** Malcolm Folley  
2009-05-07 In the late eighties and early nineties, Formula One was at its most explosive, with thrilling races, charismatic drivers, nail-biting climaxes - and the most deadly rivalry ever witnessed in sport. Two of Formula One's most honoured champions and iconic figures drove together for McLaren for two seasons, and their acrimonious and hostile relationship extended even after one of them had left the team. ALAIN

PROST, France's only F1 world champion, the intelligent, smooth driver with the epithet 'Le Professeur'. Ayrton Senna, the mercurial kid from a privileged background in Sao Paulo who would become the most intense and ruthless racing driver the world has ever seen. It was a story that would have a tragic ending. As the great rivals raced to victory, their relationship deteriorated badly, beginning with the breaking of a gentleman's agreement, and public spats followed, culminating in Prost accusing Senna of deliberately trying to ride him off the circuit, and fearful that the Brazilian would get someone killed with his daring overtaking feats. And the final, sad act of this drama happened at the San Marino Grand Prix at Imola in May 1994, when Senna was

killed. Featuring a rare interview with Prost, and insight from Martin Brundle, Damon Hill, Sir Frank Williams, Bernie Ecclestone, Derek Warrick, Johnny Herbert, Gerhard Berger, plus McLaren insiders and other F1 figures, Malcolm Folley provides us with a breath-taking account of one of the all-time classic sporting rivalries.

**Sustainability in Denim** Subramanian Senthilkannan Muthu 2017-06-12 Sustainability in Denim provides the latest information on sustainable fabrics and practices. From cotton farming, to manufacture and end of life disposal, denim has extensive effects on the environment, inclusive of water consumption and contamination, destruction of large-scale ecosystems and transportation pollution. Additionally, recent

developments in the manufacture of denim, such as the use of textiles, including elastane and polyester, have led to limitations in the high end recycling of denim. This book includes an introduction covering the history, manufacture and lifecycle of denim. It deals with the sustainability aspects of denim by addressing three important pillars of sustainability, the environmental, social and economic aspects, that when combined, present a unique approach in comparison to other books on the topic. The book primarily uses case studies to examine sustainability challenges throughout the denim lifecycle, and to evaluate new green initiatives and recycling processes. It will be of great use to industry professionals, sustainability managers, textile

industry researchers and denim manufacturers. Reviews and studies denim from a sustainability perspective, addressing its major environmental, social and economic impacts Provides the reader with a fundamental knowledge of the history, manufacture and lifecycle of denim, thus enabling a holistic view of denim sustainability Presents new green initiatives for the processing and recycling of denim products for promotion and use amongst sustainability groups

Dumbing Down America James Delisle  
2021-09-03 At a time when the U.S. education system consistently lags behind its international peers, Dumbing Down America shows exactly why America can't keep up by providing a critical look at the nation's schools through the eyes of the children whose minds are languishing in countless classrooms. Filled with specific examples of how gifted children are being shortchanged by a nation that believes smart kids will succeed on their own, Dumbing Down America packs a powerful message: If we want our nation to prosper, we must pay attention to its most intelligent youth. With more than 35 years of experience working with and for gifted children, author James R.

Delisle provides a template of what can and must happen in America's schools if they are to fulfill their mission of educating every child to the fullest potential. Dumbing Down America is a must-read for any individual who believes that the unfulfilled promises to gifted children must begin to be met in America's schools today, not someday.

Hearing Happiness Jaipreet Viridi 2020-08-31 At the age of four, Jaipreet Viridi's world went silent. A severe case of meningitis left her alive but deaf, suddenly treated differently by everyone. Her deafness downplayed by society and doctors, she struggled to "pass" as hearing for most of her life. Countless cures, treatments, and technologies

led to dead ends. Never quite deaf enough for the Deaf community or quite hearing enough for the "normal" majority, Viridi was stuck in aural limbo for years. It wasn't until her thirties, exasperated by problems with new digital hearing aids, that she began to actively assert her deafness and reexamine society's—and her own—perception of life as a deaf person in America. Through lyrical history and personal memoir, Hearing Happiness raises pivotal questions about deafness in American society and the endless quest for a cure. Taking us from the 1860s up to the present, Viridi combs archives and museums in order to understand the long history of curious cures: ear trumpets, violet ray apparatuses, vibrating massagers, electrotherapy machines, airplane diving,

bloodletting, skull hammering, and many more. Hundreds of procedures and products have promised grand miracles but always failed to deliver a universal cure—a harmful legacy that is still present in contemporary biomedicine. Weaving Viridi's own experiences together with her exploration into the fascinating history of deafness cures, *Hearing Happiness* is a powerful story that America needs to hear.

**A History of Cornell** Morris Bishop  
2014-10-15 Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly

president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: "I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of

character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader." The distinct personalities of Ezra Cornell and first president Andrew Dickson White

dominate the early chapters. For a vignette of the founder, see Bishop's description of "his" first buildings (Cascadilla, Morrill, McGraw, White, Sibley): "At best," he writes, "they embody the character of Ezra Cornell, grim, gray, sturdy, and economical." To the English historian, James Anthony Froude, Mr. Cornell was "the most surprising and venerable object I have seen in America." The first faculty, chosen by President White, reflected his character: "his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy"; while the "romantic upstate gothic" architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be

said to "portray the taste and Soul of Andrew Dickson White." Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in A History of Cornell is at times kindly, at times caustic, and always illuminating.

#### Profiles in Operations Research

Arjang A. Assad 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research

(OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied

research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific

contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's

e-journal, Inside OR., Sept 2011. "I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [stet] the pioneers of O.R. for many years to come." \*For a list of all known typos, plus further discussion on the book, please visit <http://profiles.inoperationsresearch.com>.

The International Space Station

Robert C. Dempsey 2017 Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight

directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies – discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included – to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to

encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW! Russian San Francisco Lydia B. Zaverukha 2009-12-01 Even before San Francisco was founded as a city, Russian visitors, explorers, and scientists sailed to the area and made contact with both the indigenous people and representatives of the Spanish government. Although the Russian commercial colony of Fort Ross closed in 1842, the Russian presence in San Francisco continued and the community expanded to include churches, societies, businesses, and newspapers. Some came seeking opportunity, while others were fleeing religious or political

persecution. In the 1920s, San Francisco's Russian population grew exponentially as refugees of the Russian Revolution and civil war arrived, and by the 1950s, a vibrant and culturally rich Russian A(c)migrA(c) community was thriving in San Francisco. Today the 75,000 Russian speakers who live in the San Francisco Bay Area continue to pass on their heritage to their children. A History of Mass Communication  
Irving Fang 1997-02-27 This exciting new text traces the common themes in the long and complex history of mass communication. It shows how the means of communicating grew out of their eras, how they developed, how they

influenced the societies of those eras, and how they have continued to exert their influence upon subsequent generations. The book is divided into six periods which are identified as 'Information Revolutions' writing, printing, mass media, entertainment, the 'toolshed' (which we call 'home' now), and the Information Highway. In looking at the ways in which the tools of communication have influenced and been influenced by social change, A History of Mass Communication provides students of media and journalism with a strong sense of the way their chosen field affects how society functions. Providing a broad-based approach to media history, Dr. Fang encourages the reader to take a careful look at where our culture is headed through the tools we use to communicate with

one another. A History of Mass Communication is not only the most current text on communication history, but also an invaluable resource for anyone interested in how methods of communication affect society.

*The Food Explorer* Daniel Stone  
2019-02-05 The true adventures of David Fairchild, a turn-of-the-century food explorer who traveled the globe and introduced diverse crops like avocados, mangoes, seedless grapes—and thousands more—to the American plate.

“Fascinating.”—The New York Times Book Review • “Fast-paced adventure writing.”—The Wall Street Journal • “Richly descriptive.”—Kirkus • “A must-read for foodies.”—HelloGiggles  
In the nineteenth century, American meals were about subsistence, not

enjoyment. But as a new century approached, appetites broadened, and David Fairchild, a young botanist with an insatiable lust to explore and experience the world, set out in search of foods that would enrich the American farmer and enchant the American eater. Kale from Croatia, mangoes from India, and hops from Bavaria. Peaches from China, avocados from Chile, and pomegranates from Malta. Fairchild’s finds weren’t just limited to food: From Egypt he sent back a variety of cotton that revolutionized an industry, and via Japan he introduced the cherry blossom tree, forever brightening America’s capital. Along the way, he was arrested, caught diseases, and bargained with island tribes. But his culinary ambition came during a formative era, and through him,

America transformed into the most diverse food system ever created. "Daniel Stone draws the reader into an intriguing, seductive world, rich with stories and surprises. The Food Explorer shows you the history and drama hidden in your fruit bowl. It's a delicious piece of writing."—Susan Orlean, New York Times bestselling author of *The Orchid Thief* and *The Library Book*
