1800s which were featured on cigarette trading cards. From silly to serious, the subjects of the high-quality ephemera art in this book have been carefully selected for their artistic beauty and content, as well as its likely appeal to crafters and junk journalists. Images have been digitally enhanced to provide the best possible clarity and color. All of the illustrations in this book are copyright-free. Images are part of the Public Domain archives and can be copied and reused for both personal and commercial uses. Image sizes vary, with the average size being 2" x 3.5". Images have been carefully placed on the pages to provide room to trim around them. Some images are in portrait, while others have been placed in landscape for this reason. They are on a black

background, which carries to the backside of each page. Non-perforated, single-sided pages can be torn or cut out to be copied as desired. The paper for this book is 60# (100 GSM) which has a slight sheen. It's similar to the paper found in most magazines, and it's perfect for mixed media and other papercraft projects. The vintage artwork illustrations in this collection reflect several different series of cigarette trading cards from various companies. Most do not have cigarette brand-specific advertising on the image, and none are photographs. Perfect For:

spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear "wire frame" approach, which results in a very complex-looking model that reveals the

interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York, and was recently a featured artist at the "Surface to Structure" exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or shelf!

book, author Sue DiCicco and Sadako's older brother Masahiro tell her complete story in English for the first time—how Sadako's courage throughout her illness inspired family and friends, and how she became a symbol of all people, especially children, who suffer from the impact of war. Her life and her death carry a message: we must have a wholehearted desire for peace and be willing to work together to achieve it. Sadako Sasaki was two years old when the atomic bomb was dropped on her city of Hiroshima at the end of World War II. Ten years later, just as life was starting to feel almost normal again, this athletic and enthusiastic girl was fighting a war of a different kind. One of many children affected by the bomb, she had contracted leukemia. Patient and

determined, Sadako set herself the task of folding 1000 paper cranes in the hope that her wish to be made well again would be granted. Illustrations and personal family photos give a glimpse into Sadako's life and the horrors of war. Proceeds from this book are shared equally between The Sadako Legacy NPO and The Peace Crane Project.
