**Out of Hand** Museum of Arts and Design (New York, N.Y.), 2013 Out of Hand: Materializing the Postdigital examines the increasingly important role of digital fabrication in contemporary art, design, and architecture practice from 2005 to the present. New levels of expression will demonstrate the reciprocal relationship between art and innovation as seen through the lens of emerging twenty first century aesthetics. Out of Hand, the first publication to examine this interdisciplinary trend, accompanies a major exhibition at the Museum of Arts and Design, New York, bringing together for the first time an array of seminal works by more than 80 international artists, architects, and designers, including Ron Arad, Barry X Ball, Wim Delvoye, Zaha Hadid, Stephen Jones, Anish Kapoor, Marc Newson, Hiroshi Sugimoto, and Frank Stella. The book is organised around six themes. Magnus Larsson's proposed mobile 3D printer in Modeling Nature uses microbes to create habitable structures from desert sand. In New Geometries mathematical formulae inform the creation of intricate designs with distinctive angles and whorls. Historical decorative styles inspire the artists in Rebooting Revivals to rework the past for the present. 280 colour and b/w illustrations

Printmaking has changed radically in the past two decades- the fine art print now encompasses everything from billboards and badges to clothes, cakes and carrier bags. In a series of case studies dealing with individual artists, new media and techniques, *Prints Now* explores these new directions and expanded definitions. Illustrated with one hundred wide-ranging examples, it is not only an invaluable resource for collectors and students of the new, but a revelation about the possibilities and potential of this infinitely flexible, infinitely accessible art form. It is the first general survey of contemporary printmaking to be published for ten years.

Anticorruption in History Ronald Kroeze, André Vitória, Guy Geltner, 2018  
Anticorruption in History is a timely and urgent book: corruption is widely seen today as a major problem we face as a global society, undermining trust in government and financial institutions, economic efficiency, the principle of equality before the law and human wellbeing in general. Corruption, in short, is a major hurdle on the path to Denmark a feted blueprint for stable and successful statebuilding. The resonance of this view explains why efforts to promote anticorruption policies have proliferated in recent years. But while the subject of corruption and anticorruption has captured the attention of politicians, scholars, NGOs and the global media, scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place, with the attendant diversity in how to define, identify and address corruption. Economists, political scientists and policy-makers in particular have been generally content with tracing the differences between low-corruption and high-corruption countries in the present and enshrining them in all manner of rankings and indices. The long-term trends & social, political, economic, cultural; potentially undergirding the position of various countries plays a very small role. Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to a

country's image (of itself or as construed from outside) as being more or less corrupt. It is precisely this scholarly lacuna that the present volume intends to begin to fill. The book addresses a wide range of historical contexts: Ancient Greece and Rome, Medieval Eurasia, Italy, France, Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania, the Ottoman Empire, the Netherlands, Germany, Denmark, Sweden and the former German Democratic Republic.

Seamus Heaney Helen Vendler, 2000 Join Professor Helen Vendler in her course lecture on the Yeats poem Among School Children. View her insightful and passionate analysis along with a condensed reading and student comments on the course. Poet and critic are well met, as one of our best writers on poetry takes up one of the world's great poets. Where other books on the Nobel

laureate Seamus Heaney have dwelt chiefly on the biographical, geographical, and political aspects of his writing, this book looks squarely and deeply at Heaney's poetry as art. A reading of the poet's development over the past thirty years, Seamus Heaney tells a story of poetic inventiveness, of ongoing experimentation in form and expression. It is an inspired and nuanced portrait of an Irish poet of public as well as private life, whose work has given voice to his troubled times. With characteristic discernment and eloquence, Helen Vendler traces Heaney's invention as it evolves from his beginnings in *Death of a Naturalist* (1966) through his most recent volume, *The Spirit Level* (1996). In sections entitled *Second Thoughts*, she considers an often neglected but crucial part of Heaney's evolving talent: self-revision. Here we see how later poems return to the themes or genres of the earlier volumes, and reconceive them in light of the poet's later attitudes or techniques. Vendler surveys all of Heaney's efforts in the classical forms--genre scene, elegy, sonnet, parable, confessional poem, poem of perception--and brings to light his aesthetic and moral attitudes. Seamus Heaney's development as a poet is inextricably connected to the violent struggle that has racked Northern Ireland. Vendler shows how, from one volume to the next, Heaney has maintained vigilant attention toward finding a language for his time--symbols adequate for our predicament, as he has said. The worldwide response to those discovered symbols suggests that their relevance extends far beyond this moment.
