Ship Models, how to Build Them Charles Gerard Davis,1925

The Built-Up Ship Model Charles G. Davis,2012-08-09 A highly detailed, superbly illustrated manual introducing serious model builders to hand-crafting ship models from the bottom up. Not for beginners. 133 illustrations.

The Ship Model Builder's Assistant Charles G. Davis,2012-04-30 Invaluable guide offers detailed descriptions, drawings of masting, rigging, and major fittings of American clippers and packets. Also includes wealth of details on deck furniture. 279 line drawings.

The Built-up Ship Model Charles Gerard Davis,1966

American Ship Models and How to Build Them V. R. Grimwood,2003-06-23 Easy-to-learn techniques, arranged in order of difficulty, range from relatively simple models to complicated square-riggers. Starting with the construction of a half-hull ship model, the book advances to a whole-hull model and replicas of twelve vessels, with separate chapters on rigging, gear and furniture, and tools and materials.

The Built-up Ship Model Charles Gerard Davis,1989

Building Ship Models George B. Douglas,Joseph T. Higgins,1998-01-12 Clearly written text, detailed illustrations, and full-size working plans provide novices and experienced model builders with all the information they need to create exact replicas of two 19th-century sailing ships—the Benjamin F. Packard, a classic American clipper, and the Alice Mandell, a famous whaler. The one-volume edition of two rare model-building manuals also devotes chapters to ship's rigging (ancient and modern) and abundant information on clippers and old-time whaling ships. A treasury of essential information for hobbyists, model builders, and devotees of the great age of sail.

Basics of Ship Modeling Mike Ashey,2000 Covers the basics of building ships from kits. This skill-building how-to book offers you step-by-step photo instructions covering basic assembly of hulls, superstructures, guns, railings, anchors, and more. Also includes information on detailing and painting.

Ship Models from the Age of Sail Kerry Jang,2022-04-30 The vast majority of period ship models are built from kits, usually primarily of wood with some ready-made fittings. Although these commercial offerings have improved significantly in recent years, all of them can be enhanced in accuracy or detail by an experienced modelmaker. This book, by an expert ship modeller, distils lessons gleaned from a lifetime practising the hobby to the highest standards, setting out methods of improving basic kits and gradually developing the skills and confidence to tackle the construction of a model from scratch. Using a variety of kits as the starting point, each chapter demonstrates a technique that can be readily improved or a feature that can be replaced to the advantage of the finished model. Topics include hull planking, representing copper sheathing, many aspects of more accurate masting and rigging, and how to replace kit parts and fittings from scratch. Ultimately, the impact of a period model depends on its accuracy, and the book also provides guidance on plans and references, where to find them and how they are best used. The plank-on-frame model, sometimes with exposed frames in the Navy Board style, has always been considered the crowning achievement of period ship modeling, and this book concludes with coverage of the very latest kits that put fully framed models within the reach of ordinary mortals. Offering advice, expertise and inspiration, *Ship Models from the Age of Sail* has something for anyone interested in building a period ship model, whatever their level of skill.

How To Make Old-Time Ship Models Edward W. Hobbs,2013-01-04 This vintage book contains a comprehensive guide to building old-fashioned model ships and boats. Written in clear, simple language and full of helpful illustrations and detailed diagrams, this book is ideal for the novice model builder, and will be of considerable utility to those with a practical interest in building model ships. The chapters of this book include: "Some Famous Old Ships", "Building Old-Time Ship Models", "Making a Waterline Model of a Carrack", "Making Scenic Models", "Hulls and their Construction", "Modelling the Royal Albert", "Building the Stern Gallery", "Making the Masts and Spars", etcetera. Many antiquarian books such as this are increasingly hard to come by and expensive, and it is with this in mind that we are republishing this book now in an affordable, modern, high quality edition - complete with a specially commissioned new introduction on model building.

Building Model Ships from Scratch Kent Porter,1977

Ship Modeling from Scratch: Tips and Techniques for Building Without Kits Edwin B. Leaf,1993-10-22 Building a model from a kit is an excellent way to develop your modeling skills. But once you've mastered the basics, where do you go? If you're looking for a challenge, you move on to scratchbuilding. And that can be imposing: With a kit, you worked with someone else's plans, materials, and building instructions. Scratchbuilding makes you master of your own fate. You do the research, choose the subject, the scale, the material. The choices are limited only by your enthusiasm. Edwin B. Leaf scratchbuilt his first model--a Baltimore clipper--nearly fifty years ago, and he's been refining and building on his skills ever since. In *Ship Modeling from Scratch* he lays out the principles--from concept to construction to display--on which scratchbuilding is based. In clear, concise language complemented by detailed illustrations he tells how to interpret existing drawings or create your own, what materials to choose, what tools to buy, and what techniques to use to build everything from plank-on-frame, plank-on-bulkhead, or modern steel hulls to creating sharp and properly scaled details--paint to portholes. Building a model from scratch is a singular pursuit that requires patience, confidence, and ingenuity. With *Ship Modeling from Scratch* open on your workbench, you have your own private tutor guiding you through the troublespots. *Ship Modeling from Scratch* expands the horizon of any kit builder looking for a challenge, including choosing the right subject finding and interpreting historical material building from plans drawing scaled plans from photographs buying tools and materials building everything from half models to plank-on-frame or plank-on-bulkhead versions of traditional sailing craft to modern steel cargo ships painting and displaying your model

Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini,1990-03-22 In *Ship Modeling Simplified*, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding

coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects. Ship Modeling Simplified even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

Ship Model Book George Bruce Douglas,2012-09-01 With A Special Set Of Full-Sized Paper Patterns For The Famous Ship Benjamin F. Packard And A Chapter On American Clipper Ships And The Lines And Plans Of A New Bedford Whaler.

The Building of a Wooden Ship Charles Davis,2014-01-25 When the United States entered World War I the United States Shipping Board Emergency Fleet Corporation ramped up construction of cargo ships for the war effort. Even though steel was the modern material from which to construct ships, the EFC decided to use the many shipyards still building ships of wood to quickly meet the need for more ships. To train new employees in how to build wooden ships, naval architect Charles Davis wrote The Building of a Wooden Ship. Instead of the poor quality copies of this book available from most publishers, ours was carefully scanned from an original copy at a resolution intended for print reproduction. The fold-out plan pages (not present in other available reprints) have been moved to the back of the book and scanned as multiple separate single-sided pages so they can be removed and reassembled if the reader should so choose.
