**Overtourism** Harald Pechlaner, Elisa Innerhofer, Greta Erschbamer, 2019-09-02 Overtourism explores a growing phenomenon in tourism that is currently creating tensions in both urban and rural tourist destinations worldwide. This volume proposes a framework for a series of possible solutions and management strategies for dealing with overtourism and the various negative impacts that large quantities of tourists can impose. Questioning the causes of this phenomenon – such as increased prosperity and mobility, technological development, issues of security and stigma for certain parts of the world, and so on – this book supposes that better visitor management strategies and distribution of tourists can offset the negative impacts of overtourism. Individual chapters focus on a range of destinations including Venice, Barcelona and Dubrovnik, as well as UNESCO cultural and natural heritage sites, where local political actors and public authorities are not always able to deal with the situation effectively. Integrating research and practice, this book will be of great interest to upper-level students, researchers and academics in tourism, development studies, cultural studies and sustainability, as well as professionals in the field of tourism management.

*Travel Marketing, Tourism Economics and the Airline Product* Mark Anthony Camilleri, 2017-10-03 This book provides a comprehensive introduction to travel marketing, tourism economics and the airline product. At the same time, it provides an overview on the political, socio-economic, environmental and technological impacts of tourism and its related sectors. This publication covers both theory and practice in an engaging style, that will spark the readers' curiosity. Yet, it presents tourism and airline issues in a concise, yet accessible manner. This will allow prospective tourism practitioners to critically analyze future situations, and to make appropriate decisions in their workplace environments. Moreover, the book prepares undergraduate students and aspiring managers alike with a thorough exposure to the latest industry developments. "Dr. Camilleri provides tourism students and practitioners with a clear and comprehensive picture of the main institutions, operations and activities of the travel industry." Philip Kotler, S.C. Johnson & Son Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University, Evanston/Chicago, IL, USA "This book is the first of its kind to provide an insightful and well-structured application of travel and tourism marketing and economics to the airline industry. Student readers will find this systematic approach invaluable when placing aviation within the wider tourism context, drawing upon the disciplines of economics and marketing." Brian King, Professor of Tourism and Associate Dean, School of Hotel and Tourism Management, The Hong Kong Polytechnic University, Hong Kong "The remarkable growth in international tourism over the last century has been directly influenced by technological, and operational innovations in the airline sector which continue to define the nature, scale and direction of tourist flows and consequential tourism development. Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." Richard Sharpley, Professor of Tourism, School of Management, University of Central Lancashire, UK "The book's unique positioning in terms of the importance of and the relationships between tourism marketing, tourism economics and airline product will create a distinct niche for the book in the travel literature." C. Michael Hall, Professor of Tourism, Department of Management, Marketing and Entrepreneurship, University of Canterbury, Christchurch,

New Zealand “A very unique textbook that offers integrated lessons on marketing, economics, and airline services. College students of travel and tourism in many parts of the world will benefit from the author's thoughtful writing style of simplicity and clarity.” Liping A. Cai, Professor and Director, Purdue Tourism & Hospitality Research Center, Purdue University, West Lafayette, IN, USA “An interesting volume that provides a good coverage of airline transportation matters not always well considered in tourism books. Traditional strategic and operational issues, as well as the most recent developments and emerging trends are dealt with in a concise yet clear and rational way. Summaries, questions and topics for discussion in each chapter make it a useful basis for both taught courses or self-education.” Rodolfo Baggio, Professor of Tourism and Social Dynamics, Bocconi University, Milan, Italy “This is a very useful introductory book that summarises a wealth of knowledge in an accessible format. It explains the relation between marketing and economics, and applies it to the business of airline management as well as the tourism industry overall.” Xavier Font, Professor of Sustainability Marketing, School of Hospitality and Tourism Management, University of Surrey, UK and Visiting Professor, Hospitality Academy, NHTV Breda, Netherlands “This book addresses the key principles of tourism marketing, economics and the airline industry. It covers a wide range of theory at the same time as offering real-life case studies, and offers readers a comprehensive understanding of how these important industries work, and the underpinning challenges that will shape their future. It is suitable for undergraduate students as well as travel professionals, and I would highly recommend it.” Clare Weeden, Principal Lecturer in Tourism and Marketing at the School of Sport and Service Management, University of Brighton, UK “In the current environment a grasp of the basics of marketing to diverse consumers is very important. Customers are possessed of sophisticated knowledge driven by innovations in business as well from highly developed technological advances. This text will inform and update students and those planning a career in travel and tourism. Mark Camilleri has produced an accessible book, which identifies ways to accumulate and use new knowledge to be at the vanguard of marketing, which is both essential and timely.” Peter Wiltshier, Senior Lecturer & Programme Leader for Travel & Tourism, College of Business, Law and Social Sciences, University of Derby, UK “This contemporary text provides an authoritative read on the dynamics, interactions and complexities of the modern travel and tourism industries with a necessary, and much welcomed, mixture of theory and practice suitable for undergraduate, graduate and professional markets.” Alan Fyall, Orange County Endowed Professor of Tourism Marketing, University of Central Florida, FL, USA

**Tourism Management** Stephen Page, 2011-01-03 Tourism Management: managing for change is a complete synthesis of tourism, from its beginnings through to the major impacts it has on today's global community, the environment and economy. Provocative and stimulating, it challenges the conventional thinking and generates reflection, thought and debate. This bestselling book is now in its third edition and has been fully revised and updated to include complete set of brand new case studies, a new four colour page design to enhance learning and improved online companion resources packed with must have information to assist in learning and teaching. Tourism Management covers the fundamentals of tourism, introducing the following key concepts: \* The development of tourism \* Tourism supply and demand \* Sectors involved: transport, accommodation, government \* The future of tourism: including forecasting and future issues affecting the global nature of tourism In a user-friendly, handbook style, each chapter covers the material required for at least one lecture within a degree level course.
