Profiles in Operations Research Arjang A. Assad, Saul I. Gass, 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul

I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [stet] the pioneers of O.R. for many years to come. *For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Rain of the Ghosts Greg Weisman, 2013-12-03 Rain of the Ghosts is the first in Greg Weisman's series about an adventurous young girl, Rain Cacique, who discovers she has a mystery to solve, a mission to complete and, oh, yes, the ability to see ghosts. Welcome to the Prospero Keys (or as the locals call them: the Ghost Keys), a beautiful chain of tropical islands on the edge of the Bermuda Triangle. Rain Cacique is water-skiing with her two best friends Charlie and Miranda when Rain sees her father waiting for her at the dock. Sebastian Bohique, her maternal grandfather, has passed away. He was the only person who ever made Rain feel special. The only one who believed she could do something important with her life. The only thing she has left to remember him by is the armband he used to wear: two gold snakes intertwined, clasping each other's tails in their mouths. Only the armband . . . and the gift it brings: Rain can see dead people. Starting with the Dark Man: a ghost determined to reveal the Ghost Keys' hidden world of mystery and mysticism, intrigue and adventure.

The Checkout Girl Susan Zettell, 2008 It's 1970, and the optimism of Trudeaumania is starting to give way to fears of wage and price controls. In Varnum, Ontario, where the smell of industry is the

smell of money, a lot of that money's heading south, just like Bobby Orr. The Checkout Girl is the story of Kathy Rausch, whose life these days is something that just seems to happen to her. After sneaking out on her boyfriend in Vancouver, Kathy moves back to Varnum and hides out in the basement of her high school buddy, Penny Lehman, in a room she shares with Penny's skittish boa constrictor, Freddie. When Kathy isn't checking out groceries, she practices hockey drills. And when she isn't practicing, she's warding off advances from fellow basement dweller Little Barry Bender, ignoring her well-meaning mother Connie, hanging out with her best friend, champion baton twirler Darlyn Smola, and dealing a bit of marijuana for Penny's husband Pete. But when Kathy stumbles upon a brutal murder she is finally driven to put her hockey stick where her heart is: on the ice.

In Search of the Lost Emily Jane,Jeffrey Eugene Elliott,2013-07 Since the publication of the first volume of In Search of the Lost, Volume Two, still the poems in this work are a humble attempt to explore our human search for meaning and purpose. We hope you enjoy the poems in Volume Two. We believe both works should be explored together. Included in the Second Volume of In Search of the Lost, by Emily Jane Elliott and Jeffrey Eugene Elliott are four poems originally included in the First Volume of In Search of the Lost. The four poems from the first volume also included in this volume are, Streets of Fire, Gausius Dia, Heaven Descends to Dwell, Amelia and Memories. Additionally, the poem, Search was added upon from the version found in Volume One. We hope that you enjoy Volume Two as much as readers indicated they enjoyed Volume One. This poetry is dedicated to Owen, Ryder, Matthew and Trace with great love and pride.

Spirits of Ash and Foam Greg Weisman,2014-07-08 Welcome to the Prospero Keys (or as the locals call them: the Ghost Keys), the beautiful chain of tropical islands on the edge of the Bermuda Triangle where Rain Cacique lives. When Rain's maternal grandfather passed away, he left her his special armband: two gold snakes intertwined, clasping each other's tails in their mouths. Rain soon discovers that the armband is actually a zemi – a very powerful talisman created by the island's native Arawak Taino Indians – and that it allows Rain to see ghosts, including her own grandfather who is determined to help her uncover the Ghost Keys' hidden world of mystery and mysticism, intrigue and adventure. Now, Rain Cacique's looking for a few answers – and the second zemi, a Taino relic that allows her to see dead people. But it's the first week of school, so she's pretty busy juggling teachers, homework, baby-sitting duties, new friends, missing tourist kids... and a vampire with a tribal twist. Spirits of Ash and Foam is the second installment in Greg Weisman's Rain of the Ghosts series.

Digital Design of Nature Oliver Deussen,Bernd Lintermann,2006-03-30 What is computer graphics

and what are the conceptual tasks of research in this area? To the average person the term still conveys more or less the design of - gos and the manipulation of pictures with the help of image-editing programs. However, during the past four decades, computer graphics has evolved into an innovative multifaceted ?eld of research and computing that affects many other sciences. In many areas and for many problems we can best convey an und- standing through images that trigger our sense with the highest capability: our eye. And, what is more, aside from algorithms, formulas, and tables, the c- puter graphics scientist often is able to create beauty. Though it is a beauty of its own, it often fascinates the viewer, especially when complex aesthetic images emerge from simple mathematical concepts. Also, there are only a few other areas that advance as dynamically as inf- matics and especially computer graphics. While CPU capacity still increases and is almost doubled every 18 months, the rendering speed and ef?ciency of graphics boards has increased even more during recent years. Today, images can be rendered in real time that some years ago still required several hours of computing. Parallel to the rapid improvement of computer hardware, many newalgorithms weredevelopedthattoday form the basis for some fundamental changes and achievements in graphics.

Methods of Operations Research Philip M. Morse,George E. Kimball,2012-12-04 Operations research originated during World War II with the military's need for a scientific method of providing executives with a quantitative decision-making basis. This text explores strategical kinematics, tactical analysis, gunnery and bombardment problems, more.

Materializing Six Years Catherine Morris,Brooklyn Museum,2012-08-24 Lucy R. Lippard's famous book, itself resembling an exhibition, is now brought full circle in an exhibition (and catalog) resembling her book. "Conceptual art, for me, means work in which the idea is paramount and the material form is secondary, lightweight, ephemeral, cheap, unpretentious and/or 'dematerialized.'" —Lucy R. Lippard, Six Years In 1973 the critic and curator Lucy R. Lippard published Six Years, a book with possibly the longest subtitle in the bibliography of art: The dematerialization of the art object from 1966 to 1972: a cross-reference book of information on some esthetic boundaries: consisting of a bibliography into which are inserted a fragmented text, art works, documents, interviews, and symposia, arranged chronologically and focused on so-called conceptual or information or idea art with mentions of such

vaguely designated areas as minimal, anti-form, systems, earth, or process art, occurring now in the Americas, Europe, England, Australia, and Asia (with occasional political overtones) edited and annotated by Lucy R. Lippard. *Six Years*, sometimes referred to as a conceptual art object itself, not only described and embodied the new type of art-making that Lippard was intent on identifying and cataloging, it also exemplified a new way of criticizing and curating art. Nearly forty years later, the Brooklyn Museum takes Lippard's celebrated experiment in curated concatenation as a template, turning a book that resembled an exhibition into an exhibition materializing the ideas in her book. The artworks and essays featured in this publication recall the thrill that was tangible in Lippard's original documentation, reminding us that during the late sixties and early seventies all possible social and material parameters of art (making) were played with, worked over, inverted, reduced, expanded, and rejected. By tracing Lippard's own activities in those years, the book also documents the early blurring of boundaries among critical, curatorial, and artistic practices. With more than 200 images of work by dozens of artists (printed in color throughout), this book brings Lippard's curatorial experiment full circle.

The Archaeological Imagination Michael Shanks, 2016-06-03 Archaeology is a way of acting and thinking—about what is left of the past, about the temporality of what remains, about material and temporal processes to which people and their goods are subject, about the processes of order and entropy, of making, consuming and discarding at the heart of human experience. These elements, and the practices that archaeologists follow to uncover them, is the essence of the archaeological imagination. In this extended essay, renowned archaeological theorist Michael Shanks offers his colleagues and students a window on this imaginative world of past and present and the creative role archaeology can play in uncovering it, analyzing it, and interpreting it.

Booktrek Clive Phillpot, Lionel Bovier, 2013 Examines the evolution of the artists' book and their perception in the art world.

Tag Town Martha Cooper, 2008 Every graffiti writer began his or her writing career with a tag. For those who learn to read tags, a world of aesthetic expression and communication opens up. Tags are a universal language - the jazz of lettering. The photos in *Tag Town*, dating back to the 1960s, introduce readers to the origins of New York style graffiti, containing rare photos of work on the street by Jean-Michel Basquiat, Keith Haring and Kenny Scharf. Accompanying text is based on interviews with New York graffiti pioneers Blade, Part I and Snake I.

One for Me and One to Share Gregory Elstrand, Dave Dymont, 2012 Illustrated with over thirty-six

colour reproductions, the essays and interviews in *One For Me and Once To Share: Artists' Multiples and Editions* addresses artists' multiples as a new means of reproduction, circulations, and reception.

Real Food, Real Fast Sam Stern, Susan Stern, 2008 Sam Stern, a British teenager, provides ideas and recipes for healthy snacks and meals. Divided into sections for when you have 5, 10, 15, 20, or 30 minutes.

The First Cut Fiona Corridan, Natasha Howes, Manchester Art Gallery, Djanogly Art Gallery, Southampton SeaCity Museum, 2012 Catalog of an exhibition held at Manchester Art Gallery, Oct. 5, 2012-Jan. 27, 2013; at Djanogly Art Gallery, Nottingham, Apr. 20-June 9, 2013; and at Southampton SeaCity Museum, Sept. 27, 2013-Jan. 5, 2014.

Gods, Guardians, and Lovers Vishakha N. Desai, Darielle Mason, 1993 Celestial lovers, guardian deities, gods, goddesses, semidivine and human forms bedeck the magnificent, elaborately sculpted medieval temples of northern India. This handsome catalog of an exhibition at the Asia Society in New York City explains that each temple, rich in symbolism and sacred geometry, was viewed as a microcosmic model of cosmic creation and order. Led by Desai, director of the Asia Society Galleries, and Mason of Boston's Museum of Fine Arts, six scholars discuss the historical background, patterns of royal patronage, architectural placement of images and Hindu stories and hymns as keys to the cult of temple images and to the medieval worship service, an elaborate multisensory experience. Nearly 200 color and black-and-white plates document a major architectural and sculptural legacy.

Bone Dance Emma Bull, 2009-07-07 Back in print, Bone Dance is a classic techno-fantasy from Emma Bull, author of the bestselling *Territory Sparrow's my name. Trader. Deal-maker. Hustler, some call me. I work the Night Fair circuit, buying and selling pre-nuke videos from the world before. I know how to get a high price, especially on Big Bang collectibles. But the hottest ticket of all is information on the Horsemen—the mind-control weapons that tilted the balance in the war between the Americas. That's the prize I'm after. But it seems I'm having trouble controlling my own mind. The Horsemen are coming.*
