Ijrvet International Journal for Research in Vocational Education and Training Michael Gessler, Karen Evans, Johanna Lasonen, 2019-01-07 The International Journal for Research in Vocational Education and Training (IJRVET) is a double blind peer-reviewed journal for VET-related research. This journal provides full open electronic access to its content on the principle that making research freely available to the science community and the public supports a greater global exchange of knowledge and the further development of expertise in the field of Vocational Education and Training (understood in a wide sense and also known as e.g. TVET Technical Vocational Education and Training, Professional Education and Training, Career and Technical Education, Workforce Education). All articles can also be downloaded from the IJRVET Homepage: <http://www.ijrvet.net>. IJRVET covers all topics of VET-related research from Career and Technical Education (CTE) and Initial Vocational Education and Training (IVET) to Workforce Education and Continuing Vocational Education and Training (CVET). The Nature of Code Daniel Shiffman, 2024-09-03 All aboard The Coding Train! This beginner-friendly creative coding tutorial is designed to grow your skills in a fun,

hands-on way as you build simulations of real-world phenomena with “The Coding Train” YouTube star Daniel Shiffman. How can we use code to capture the unpredictable properties of nature? How can understanding the mathematical principles behind our physical world help us create interesting digital environments? Written by “The Coding Train” YouTube star Daniel Shiffman, *The Nature of Code* is a beginner-friendly creative coding tutorial that explores a range of programming strategies for developing computer simulations of natural systems—from elementary concepts in math and physics to sophisticated machine-learning algorithms. Using the same enthusiastic style on display in Shiffman’s popular YT channel, this book makes learning to program fun, empowering you to generate fascinating graphical output while refining your problem-solving and algorithmic-thinking skills. You’ll progress from building a basic physics engine that simulates the effects of forces like gravity and wind resistance, to creating evolving systems of intelligent autonomous agents that can learn from their mistakes and adapt to their environment. *The Nature of Code* introduces important topics such as: Randomness Forces and vectors Trigonometry Cellular automata and fractals Genetic algorithms Neural networks Learn from an expert how to transform your beginner-level skills into writing well-organized, thoughtful programs that set the stage for further experiments in generative design. NOTE: All examples are written with p5.js, a JavaScript library for creative coding, and are available on the book's website.

A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

Profiles in Operations Research Arjang A. Assad, Saul I. Gass, 2011-06-28 *Profiles in Operations Research: Pioneers and Innovators* recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called

operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [sic] the pioneers of O.R. for many years to come. *For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

Elements of Parametric Design Robert Francis Woodbury, 2010 Pushed by practices wanting to produce

novelty, computer-aided design systems are increasingly parametric - they represent designs that change with their input data. Such systems give more control and capability to designers, but require much more comprehensive understanding to be used effectively. This book teaches what new knowledge and skills designers need in order to master the parametric and how they can learn and use them.

This book provides practical guidance regarding different equipment, techniques, stages and challenges which might be encountered as part of this process. Throughout the text there is an emphasis on spatial design in numerous forms and interpretations - in the street, the studio, the theatre or exhibition space, as well as the representation of spatial relationships with smell. Contributions, originate across different geographical areas, academic disciplines and professions. This is crucial reading for students, academics and practitioners working in olfactory design.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in

1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Lynching in the West, 1850-1935 Ken Gonzales-Day, 2006 This visual and textual study of lynchings that took place in California between 1850 and 1935 shows that race-based lynching in the United States reached far beyond the South.

The Checkout Girl Susan Zettell, 2008 It's 1970, and the optimism of Trudeaumania is starting to give way to fears of wage and price controls. In Varnum, Ontario, where the smell of industry is the smell of money, a lot of that money's heading south, just like Bobby Orr. The Checkout Girl is the story of Kathy Rausch, whose life these days is something that just seems to happen to her. After sneaking out on her boyfriend in Vancouver, Kathy moves back to Varnum and hides out in the basement of her high school buddy, Penny Lehman, in a room she shares with Penny's skittish boa constrictor, Freddie. When

Kathy isn't checking out groceries, she practices hockey drills. And when she isn't practicing, she's warding off advances from fellow basement dweller Little Barry Bender, ignoring her well-meaning mother Connie, hanging out with her best friend, champion baton twirler Darlyn Smola, and dealing a bit of marijuana for Penny's husband Pete. But when Kathy stumbles upon a brutal murder she is finally driven to put her hockey stick where her heart is: on the ice.

Securing the Future of U.S. Air Transportation

National Research Council, Transportation Research Board, Studies and Information Services, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Aeronautics Research and Technology for Vision 2050, 2003-12-18 As recently as the summer of 2001, many travelers were dreading air transportation because of extensive delays associated with

undercapacity of the system. That all changed on 9/11, and demand for air transportation has not yet returned to peak levels. Most U.S. airlines continue to struggle for survival, and some have filed for bankruptcy. The situation makes it difficult to argue that strong action is urgently needed to avert a crisis of undercapacity in the air transportation system. This report assesses the visions and goals for U.S. civil aviation and technology goals for the year 2050.

Materializing Six Years Catherine Morris,Brooklyn Museum,2012-08-24 Lucy R. Lippard's famous book, itself resembling an exhibition, is now brought full circle in an exhibition (and catalog) resembling her book. "Conceptual art, for me, means work in which the idea is paramount and the material form is secondary, lightweight, ephemeral, cheap, unpretentious and/or 'dematerialized.'" —Lucy R. Lippard, *Six Years* In 1973 the critic and curator Lucy R. Lippard published *Six Years*, a book with possibly the longest subtitle in the bibliography of art: The dematerialization of the art object from 1966 to 1972: a cross-reference book of information on some esthetic boundaries: consisting of a bibliography into which are inserted a fragmented text, art works, documents, interviews, and symposia, arranged chronologically and focused on so-called conceptual or information or idea art with mentions of such vaguely designated areas as minimal, anti-form, systems, earth, or process art, occurring now in the Americas, Europe, England, Australia, and Asia (with occasional political overtones) edited and annotated by Lucy R. Lippard. *Six Years*, sometimes referred to as a conceptual art object itself, not only described and embodied the new type of art-making that Lippard was intent on identifying and cataloging, it also exemplified a new way of criticizing and curating art.

Nearly forty years later, the Brooklyn Museum takes Lippard's celebrated experiment in curated concatenation as a template, turning a book that resembled an exhibition into an exhibition materializing the ideas in her book. The artworks and essays featured in this publication recall the thrill that was tangible in Lippard's original documentation, reminding us that during the late sixties and early seventies all possible social and material parameters of art (making) were played with, worked over, inverted, reduced, expanded, and rejected. By tracing Lippard's own activities in those years, the book also documents the early blurring of boundaries among critical, curatorial, and artistic practices. With more than 200 images of work by dozens of artists (printed in color throughout), this book brings Lippard's curatorial experiment full circle.
