[Socially Responsible Higher Education](#) Budd L. Hall 2021 "Is the university contributing to our global crises or does it offer stories of hope? Much recent debate about higher education has focused upon rankings, quality, financing and student mobility. The COVID-19 pandemic, the climate crisis, the calls for decolonisation, the persistence of gender violence, the rise of authoritarian nationalism, and the challenge of the United Nations Sustainable Development Goals have taken on new urgency and given rise to larger questions about the social relevance of higher education. In this new era of uncertainty, and perhaps opportunity, higher education institutions can play a vital role in a great transition or civilisational shift to a newly imagined world. Socially Responsible Higher Education: International Perspectives on Knowledge Democracy shares the experiences of a broadly representative and globally dispersed set of writers on higher education and social responsibility, broadening perspectives on the democratisation of knowledge. The editors have deliberately sought examples and viewpoints from parts of the world that are seldom heard in the international literature. Importantly, they have intentionally chosen to achieve a gender and diversity balance among the contributors. The stories in this book call us to take back the right to imagine, and 'reclaim' the public purposes of higher education"--

[Water+Ink Coloring Book Winter 2020](#) Kim Winberry 2019-07-22 I begin my paintings with a sketch and application of colorful/bright pigment and water to the paper. I disrupt the blends with salt or water, watching as one color blossoms in water, as another color starts to travel across the paper. I utilize India Ink to demarcate changes, also adding swirls other artifacts, in the aim to achieve whimsy. My coloring books are my paintings! I run the paintings through filters and drop the color from them, leaving the lines so that you can add your own color. But wait, there's more... I've added an Augmented Reality component to this. Wonder what colors I used for that piece in the corner there? Take out your phone, download the Zappar app from your app store and "zap" the code. What happens? At the very least an image of the original painting will pop up and you can see what it looks like, side by side with the coloring page. Beyond that, you'll meet Mist, my liaison to the AR world. She will be a recurring character in all my AR work. Stay tuned and enjoy.

[Experimental Architecture in Los Angeles](#) Aaron Betsky 1991 "Experimental Architecture in Los Angeles presents, for the first time, the recent work of twenty-two of the most innovative, creative, and challenging young architects on the West Coast of the United States. Each architect, in one way or another, is the spiritual child of Frank Gehry and of the second generation of California architects, such as Morphosis and Eric Owen Moss, who followed in his footsteps. Gehry expresses his support for this third generation of architects in his introduction to this volume." "Each architect or firm--among them Michele Sae, AKS Runo, Josh Schweitzer, Guthrie + Buresh, Koning Eizenberg, and COA--is presented in an individual chapter with lavish illustrations accompanied by a brief outline and analysis of the work. Three critical essays, each addressing a different aspect of these architects' relationship to the West Coast, and to Los Angeles in particular, make this volume an indispensable guide to the latest developments in one of architecture's most exciting centers of activity."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. [From Cave Man to Cave Martian](#) Manfred "Dutch" von Ehrenfried 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

[Jugaad Time](#) Amit S. Rai 2019-02-05 In India, the practice of jugaad—finding workarounds or hacks to solve problems—emerged out of subaltern strategies of negotiating poverty, discrimination, and violence but is now celebrated in management literature as a disruptive innovation. In Jugaad Time Amit S. Rai explores how jugaad operates within contemporary Indian digital media cultures through the use of the mobile phone. Rai shows that despite being co-opted by capitalism to extract free creative labor from the workforce, jugaad is simultaneously a practice of everyday resistance, as workers and communities employ hacks to oppose corporate, caste, and gender power. Locating the tensions surrounding jugaad—as both premodern and postdigital, innovative and oppressive—Rai maps how jugaad can be used to undermine neoliberal capitalist media ecologies and nationalist politics.

**Teaching Design** Meredith Davis 2017-07-11 An Expertly Written Guidebook to Teaching Design at All Levels

*Teaching Design* provides a practical foundation for teaching about and through design. The exploding interest in design and design thinking calls for qualified faculty members who are well prepared for a variety of institutional settings and content areas. While designers know their disciplines, they frequently lack experience in constructing responsive curricula and pedagogies for rapidly evolving professions. And while K-12 educators are trained for the classroom, their ability to transform teaching and learning through design is limited by a shortfall in professional literature. Davis's extensive experience in education offers a detailed path for the development of curricula. The book addresses writing objectives and learning outcomes that succeed in the counting-and-measuring culture of institutions but also meet the demands of a twenty-first-century education. An inventory of pedagogical strategies suggests approaches to learning that serve both college professors and K-12 teachers who want to actively engage students in critical and creative thinking. Sections on assessment make the case for performance-based activities that provide credible evidence of student learning. Davis also discusses the nature of contemporary problems and teaching strategies that are well matched to growing complexity, rapid technological change, and increased demand for interdisciplinary engagement. Examples in *Teaching Design* span the design disciplines and draw on Davis's experience in teaching seminars for college faculty, graduate courses for design students seeking academic careers, and workshops for K-12 teachers converting their classrooms into centers for innovation.

George H. Douglas 2004-08-05 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in, lived in, and visited them. Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers, but attention is also given to the steelworkers who built them, the financiers who put up the money, and the daredevils who attempt to "conquer" them in some inexplicable pursuit of fame. The impact of the skyscraper on popular culture, particularly film and literature, is also explored.
