The Skin of Our Teeth Thornton Wilder 1972 "Winner of the Pulitzer Prize, this is the groundbreaking satiric fantasy follows the extraordinary Antrabus family down through the ages from the time of 'The War' surviving flood, fire, pestilence, locusts, the ice age, the pox and the double feature, a dozen subsequent wars and as many depressions. Theoretical Calculations of Pressure Broadening Coefficients for H2O Perturbed by Hydrogen Or Helium Gas National Aeronautics and Space Adm Nasa 2018-10-24 Halfwidths were calculated for H2O with H2 as a broadening gas and were estimated for He as the broadening species. The calculations used the model of Robert and Bonamy with parabolic trajectories and all relevant terms in the interaction potential. The calculations investigated the dependence of the halfwidth on the order of the atom-atom expansion, the rotational states, and the temperature in the range 200 to 400K. Finally, calculations were performed for many transitions of interest in the 5 micrometer window region of the spectrum. The resulting data will be supplied to Dr. R. Freedman for extracting accurate water mixing ratios from the analysis of the thermal channels for the Net Flux experiment on the Galileo probe. Gamache, Robert R. and Pollack, James B. Improvement of Topex/Poseidon and Jason-1 Geophysical Data Record for Global Change Studies and Coastal Applications National Aeronautics and Space Adm Nasa 2018-09-25 The Earth's modern climate change has been characterized by interlinked changes in temperature, CO2, ice sheets and sea level. Global sea level change is a critical indicator for study of contemporary climate change. Sea level rise appears to have accelerated since the ice sheet retreats have stopped some 5000 years ago and it is estimated that the sea level rise has been approx. 15 cm over the last century. Contemporary radar altimeters represent the only

technique capable of monitoring global sea level change with accuracy approaching 1 mm/yr and with a temporal scale of days and a spatial scale of 100 km or longer. This report highlights the major accomplishments of the TOPEX/POSEIDON (T/P) Extended Mission and Jason-1 science investigation. The primary objectives of the investigation include the calibration and improvement of T/P and Jason-1 altimeter data for global sea level change and coastal tide and circulation studies. The scientific objectives of the investigation include: (1) the calibration and improvement of T/P and Jason-1 data as a reference measurement system for the accurate cross-linking with other altimeter systems (Seasat, Geosat, ERS-1, ERS-2, GFO-1, and Envisat), (2) the improved determination and the associated uncertainties of the long-term (15-year) global mean sea level change using multiple altimeters, (3) the characterization of the sea level change by analyses of independent data, including tide gauges, sea surface temperature, and (4) the improvement coastal radar altimetry for studies including coastal ocean tide modeling and coastal circulation. Major accomplishments of the investigation include the development of techniques for low-cost radar altimeter absolute calibration (including the associated GPS-buoy technology), coastal ocean tide modeling, and the linking of multiple altimeter systems and the resulting determination of the 15-year (1985-1999) global mean sea level variations. The current rate of 15-year sea level rise observ

Beginning film studies Andrew Dix 2016-05-01 Beginning film studies offers the ideal introduction to this vibrant subject. Written accessibly and with verve, it ranges across the key topics and manifold approaches to film studies. Andrew Dix has thoroughly updated the first edition, and this new volume includes new case studies, overviews of recent developments in the discipline, and up-to-the-minute suggestions for further reading. The book begins by considering some of film's formal features - mise-en-scène, editing and sound - before moving outwards to narrative, genre, authorship, stardom and ideology. Later chapters on film industries and on film consumption - where and how we watch movies - assess the discipline's recent geographical 'turn'. The book references many film cultures, including Hollywood, Bollywood and contemporary Hong Kong. Case studies cover such topics as sound in *The Great Gatsby* and narrative in *Inception*. The superhero movie is studied; so too is Jennifer Lawrence. Beginning film studies is also interactive, with readers enabled throughout to reflect critically upon the field.
