**The Architect Says** Laura S. Dushkes  
2012-10-03 If there's anything architects like doing more than designing buildings, it's talking about architecture. Whether musing about their inspirations (a blank sheet of paper, the sun hitting the

side of a building), expanding on each other's thoughts (on materials, collaboration, clients, and constraints), or dishing out a clever quip, architects make good copy. The Architect Says is a colorful compendium of quotations from more than one hundred of history's most opinionated design minds. Paired on page spreads like guests at a dinner party-an architect of today might sit next to a contemporary or someone from the eighteenth century-these sets of quotes convey a remarkable depth and diversity of thinking. Alternately wise and amusing, this elegant gem of a book makes the perfect gift for architects, students, and anyone curious about the ideas and personalities that have helped shape our built world.  
The Affordable House David John

Carnivale 2005-09-16 Noted Staten Island architect and preservationist David Carnivale presents dozens of affordable yet elegant home plans in twenty-five traditional architectural styles, historically accurate but with modern amenities quietly incorporated. Each design is full described and illustrated by exquisite pen-and-ink renderings. Colonial, Cape Cod, Tudor, Federal, Victorian, Queen Anne, Shingle, Gothic & Greek Revival homes are all featured, and blueprints are quickly available at modest cost from the author of these imaginative dwellings. From structures emanating the soothing restraints and serenity of 18th century colonials sporting subtle, crisp details- the reader is carried away on a journey through many eras and will soon forget the

crudely utilitarian and pretentious boxes builders construct today. The Affordable House will service quality well as a reference book, a source for your blueprints, or as a thoughtful gift. The Architect is always available to answer reader's questions at (718) 667-4270.

**The Book of Baphomet** Julian Vayne 2012-08 You hold in your hands the material result of many years' hard craft. This Book contains some of the secrets of Life itself; or rather, the occult deity of Life on Earth, Baphomet. Horned, vital, beautiful, awe full, our aeons old Chaos Magick idol finds a name from the Knights' Templar, then goes incognito through the Enlightenment (when flourished those great natural philosophers beloved of science historians), before emerging via devil worship and

witchcraft into this era of Deep Ecology. Darwin could have used a picture of Baphomet as his frontispiece, to demonstrate the one flesh from which all species originate. Contacting this Great Spirit, the anima mundi, allows access to a new way of ordering the world, with fresh visions of how and why we could live. Here the authors weave strands from their lives into a rich tapestry of images, which might give you a pointer or two towards your own self-realisation, whilst amusing, entertaining, and instructing along the way. Revolution, evolution, leap beyond the apocalypse to the Now!

Jetee Janet Harbord 2009 "Chris

Marker's *La Jetee* (1962) is considered one of the greatest experimental films of all time. This short film - a compelling science-fiction story composed almost entirely of black-and-white photographs - has been praised by cultural theorists, artists and film-goers alike." "Janet Harbord focuses on the film's influential circular treatment of time, the power of its voice-over narration and the qualities of stillness and movement in its images. She examines the pace and shifting rhythm of the various editing techniques employed in the work, the use of sound as a key affective device and the relationship of film to animation - in the sense of things brought to life. Harbord moves deftly from close readings of the film to discussions of broader

cultural issues, navigating within La Jetee's prospect of a post-apocalyptic future, where humanity searches to save itself through experiments in time." --Book Jacket. *Skyscrapers* George H. Douglas 2004-08-05 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in, lived in, and visited them. Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers, but attention is also given to the steelworkers who built them, the financiers who put up the money, and the daredevils who attempt to "conquer" them in some inexplicable pursuit of fame. The impact of the skyscraper on popular culture, particularly film and literature, is also explored.

**Russian San Francisco** Lydia B. Zaverukha 2009-12-01 Even before San Francisco was founded as a city, Russian visitors, explorers, and scientists sailed to the area and made contact with both the indigenous people and representatives of the Spanish government. Although the Russian commercial colony of Fort Ross closed in 1842, the Russian presence in San Francisco continued and the community expanded to include churches, societies, businesses, and newspapers. Some came seeking opportunity, while others were fleeing religious or political persecution. In the 1920s, San Francisco's Russian population grew exponentially as refugees of the Russian Revolution and civil war arrived, and by the 1950s, a vibrant and culturally rich Russian

A(c)migrA(c) community was thriving in San Francisco. Today the 75,000 Russian speakers who live in the San Francisco Bay Area continue to pass on their heritage to their children.

**How to Age** Anne Karpf 2015-01-06 THE SCHOOL OF LIFE IS DEDICATED TO EXPLORING LIFE'S BIG QUESTIONS IN HIGHLY-PORTABLE PAPERBACKS, FEATURING FRENCH FLAPS AND DECKLE EDGES, THAT THE NEW YORK TIMES CALLS "DAMNABLY CUTE." WE DON'T HAVE ALL THE ANSWERS, BUT WE WILL DIRECT YOU TOWARDS A VARIETY OF USEFUL IDEAS THAT ARE GUARANTEED TO STIMULATE, PROVOKE, AND CONSOLE. Society has a deep fear of ageing, and showing your age is increasingly one of our most pervasive taboos. Old age in modern life is widely viewed as either a time of inevitable decline or something to be resisted, denied or

overcome. In *How to Age*, sociologist and award-winning journalist Anne Karpf urges us to radically change our narrative. Exploring how our outlook on ageing is historically determined and culturally defined, Karpf draws upon revealing case studies to suggest how ageing can be an actively enriching time of immense growth. She argues that if we can recognize growing older as an inevitable part of the human condition, then the great challenge of ageing turns out to be none other than the challenge of living. In *How to Age*, learn how ageing isn't about your wardrobe or physical fitness, but a determination to live fully at every age and stage of life.

*Ipoh, the Untold Story* Henry Berbar 2019

***Achtung-Panzer!*** Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz

Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris. **Pangeometry** Nikolaï Ivanovich Lobachevskiï 2010 Lobachevsky wrote

Pangeometry in 1855, the year before his death. This memoir is a resume of his work on non-Euclidean geometry and its applications and can be considered his clearest account on the subject. It is also the conclusion of his life's work and the last attempt he made to acquire recognition. The treatise contains basic ideas of hyperbolic geometry, including the trigonometric formulae, the techniques of computation of arc length, of area and of volume, with concrete examples. It also deals with the applications of hyperbolic geometry to the computation of new definite integrals. The techniques are different from those found in most modern books on hyperbolic geometry since they do not use models. Besides its historical importance, Lobachevsky's Pangeometry

is a beautiful work, written in a simple and condensed style. The material that it contains is still very alive, and reading this book will be most useful for researchers and for students in geometry and in the history of science. It can be used as a textbook, as a sourcebook, and as a repository of inspiration. The present edition provides the first complete English translation of Pangeometry available in print. It contains facsimiles of both the Russian and the French original versions. The translation is accompanied by notes, followed by a biography of Lobachevsky and an extensive commentary.

**Mogworld** Yahtzee Croshaw 2018-05-29

In a world full to bursting with would-be heroes, Jim couldn't be less interested in saving the day. His

fireballs fizzle. He's awfully grumpy. Plus, he's been dead for about sixty years. When a renegade necromancer wrenches him from eternal slumber and into a world gone terribly, bizarrely wrong, all Jim wants is to find a way to die properly, once and for all. On his side, he's got a few shambling corpses, an inept thief, and a powerful death wish. But he's up against tough odds: angry mobs of adventurers, a body falling apart at the seams – and a team of programmers racing a deadline to hammer out the last few bugs in their AI. \*Mogworld is the debut novel from video-game icon Yahtzee Croshaw (Zero Punctuation)! With an exclusive one-chapter preview of Yahtzee Croshaw's next novel, Jam—coming to bookstores in October 2012! \*Ben "Yahtzee"

**PhotoTherapy Techniques** Judy Weiser  
2018-11-09 PhotoTherapy techniques use personal snapshots and family photos to connect with feelings, thoughts, and memories during therapy and counselling sessions, in ways that words alone cannot do. PhotoTherapy Techniques: Exploring the Secrets of Personal Snapshots and Family Albums is the most comprehensive introduction to the field of PhotoTherapy available - and it is an excellent substitute for taking an introductory training

workshop! This book, now in its second edition, explains and demonstrates each of the major techniques involved, and provides theoretical rationale from both psychology and art therapy contexts. It also includes many photo-illustrated client examples, case transcripts, and practical experiential "starter" exercises so that readers can immediately begin using these techniques in their own practice. PhotoTherapy Techniques has been reviewed in many professional mental health journals and numerous public-media articles, generated a lot of positive feedback from readers, and is used as a text for university courses as well as being selected as the text for "Continuing Education" licensing credit courses for numerous mental health

professions (through distance education programs).

*Frank Lloyd Wright Paper Models*

2017-07-03 Frank Lloyd Wright (1867–1959) is the most renowned and popular architect and designer in America. His buildings, including Fallingwater and New York's Guggenheim Museum, are iconic landmarks. Now you can create 14 of his best loved buildings using the art of kirigami (cutting and folding). Each project features step-by-step instructions and a template that you remove from the book. You follow the lines on the template, cutting and folding to make your own model. All you need is a craft knife, a cutting mat, and a ruler. Clear cutting tips help you with the tricky stages, while photos of the finished model show you the final design. To

make things easier, the most intricate parts of the templates are pre-die-cut. Then simply display your finished model and admire your handiwork. Suitable for folding experts and beginners alike, Frank Lloyd Wright Paper Models is a must for Wright fans and architectural model enthusiasts.

### **Profiles in Operations Research**

Arjang A. Assad 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted

our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in

the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development

of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. "I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork

which will serve to immortalise [stet] the pioneers of O.R. for many years to come." \*For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

The Pennsylvania Barn Robert F. Ensminger 2003-04-28 In his widely acclaimed The Pennsylvania Barn, Robert Ensminger provided the first comprehensive study of an important piece of American vernacular architecture—the forebay bank barn, better known as the Pennsylvania barn or the Pennsylvania German barn. Now, in this revised edition, Ensminger has continued his diligent fieldwork and archival research into the origins, evolution, and distribution in North America of this significant agricultural structure. Including an

entire chapter of new material, 85 new illustrations, and updates to previous chapters, this edition of Ensminger's classic work will appeal to students and scholars in cultural and historical geography, folklore and vernacular architectural history, and American studies, as well as to general readers.

*Brutal London* Zupagrafika 2016-10-25  
Appealing to fans of architecture, this ingeniously designed book lets you build replicas of some of London's iconic post-war concrete structures while learning about their place in the city's architectural history. In

this fun and intellectually stimulating book, readers can recreate a number of London's most renowned Brutalist buildings. Opening with an informative history of the origins and philosophy of Brutalist architecture, the book then focuses on 9 buildings, including the Barbican Estate, Robin Hood Gardens, Balfron Tower and the National Theatre. The first part of the book looks at the significance of each of these buildings, with a short chapter on each, complete with texts and images. The second part of the book consists of a series of 9 pre-cut and folded buildings, printed on heavy card stock, that readers can detach and construct with easy-to-follow instructions. At once fun and informative, this unique book offers a challenging and entertaining

approach to architecture."

The Guns of Easter Gerard Whelan  
2013-08-16 It is 1916 and Europe is at war. From the poverty of the Dublin slums twelve-year-old Jimmy Conway sees it all as glorious, and loves the British Army for which his father is fighting. But when war comes to his own streets Jimmy's loyalties are divided. The rebels occupy the General Post Office and other parts of the city, and Jimmy's uncle is among them. Dublin's streets are destroyed, business comes to a halt. In an attempt to find food for his family, Jimmy crosses the city, avoiding the shooting, weaving through the army patrols, hoping to make it home before curfew. But his quest is not easy and danger threatens at every corner.

**Made In Malaysia** Alexandra Wong  
2014-08-01 When Alexandra Wong left her corporate job to pursue her dream of being a writer, she didn't expect to open a treasure chest of experiences. Culture shock and curtains of mosquitoes give way to familial warmth at an Iban longhouse. A French former nuclear scientist who embraced Malaysia as his second home makes a weekend in Gua Musang even more memorable. Pointers on how to be a serious and caring teacher emerge from one of her school's naughtiest girls. And stirring displays of chivalry help Alexandra see titled and supposedly aloof public figures in a different light. From the generosity of food vendors and selflessness of bus and taxi drivers

to innumerable life lessons learnt from friends both old and new, she knew from the very start she was chasing something far more precious than her dream. A compilation of her popular Navel Gazer columns in The Star and other stories, Made in Malaysia is about one woman's journey of discovery across a historically and culturally rich and diverse land.

**Face Recognition Across the Imaging Spectrum** Thirimachos Bourlai  
2016-02-12 This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and

hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

**Lessons in Hope** George Weigel  
2017-09-19 A preeminent authority on the Catholic Church and papal biographer describes what he learned from chronicling the life of Pope John Paul II In *Lessons in Hope*, George Weigel tells the story of his

unique friendship with St. John Paul II. As Weigel learns the pope "from inside," he also offers a firsthand account of the tumult of post-Vatican II Catholicism and the Cold War's endgame, introducing readers to the heroes who brought down European communism. Later, he shows us the aging pope grappling with the post-9/11 world order and teaching new lessons in dignity through his own suffering. A deeply humane portrait of an eminent scholar learning a saint, *Lessons in Hope* is essential reading for anyone seeking a fuller understanding of a world-changing pope.

*American Synagogues* Samuel Gruber  
2003 *American Synagogues* is the first book to explore the exceptional architecture of modern American synagogues in the twentieth century, and this intriguing book relates the fascinating history of the Jewish people in America and how it is expressed in twentieth-century synagogue design. The book features all new photography of synagogues in many styles from a dozen states, many never before published in any form. The synagogues were designed by European masters, the best-known modern American architects, and by important contemporary architects including Frank Lloyd Wright, Philip Johnson, and Minoru Yamasaki.  
Mathematics, Poetry And Beauty Ron

Aharoni 2014-12-23 What does mathematics have to do with poetry? Seemingly, nothing. Mathematics deals with abstractions while poetry with emotions. And yet, the two share something essential: Beauty. "Euclid alone has looked on beauty bare," says the title of a poem by Edna St. Vincent Millay. A winner of the CHOICE Outstanding Academic Title 2015, "Mathematics, Poetry and Beauty" tries to solve the secret of the similarity between the two domains. It tries to explain how a mathematical argument and a poem can move us in the same way. Mathematical and poetic techniques are compared, with the aim of showing how they evoke the same sense of beauty. The reader may find that, as Bertrand Russell said, "Mathematics, rightly viewed, possesses not only truth, but

supreme beauty – a beauty hold and austere, like that of sculpture ... sublimely pure, and capable of a stern perfection such as only the

greatest art can show.”
