Pen & Ink James Hobbs
2019-06-01 Pen & Ink is packed with page after page of bite-sized creative sketching tips and accessible advice, and offers aspiring artists the freedom to dip in and out for practical information or

flick through for fresh inspiration and ideas. Exploring around 200 pieces of artwork by young contemporary artists, Pen & Ink highlights and examines the different techniques, qualities, and effects relating to each piece. Organized into chapters according to the technique exemplified (e.g. water soluble, mixed media) artwork is featured large and luscious, accompanied by extended captions, insightful tips, and practical advice. A detailed index at the front of the book also groups the paintings according to three main categories: Principles (e.g. composition), Media, Type of sketch (e.g. abstract), and Subject (e.g. nature). Listing each page where similar examples may be found, this category index enables the reader to

easily identify and cross reference subjects that have been painted in similar styles. Throughout the book, useful information and practical tips are provided on a wide range of topics such as tone, perspective, color, and much more besides. Readers are encouraged to discover the various ways in which similar subjects and styles are executed by different artists, while also being inspired to use the tips in the book as a way of building on their existing skills. Offering a bold, refreshing change from other run-of-the-mill art books, Pen & Ink adopts the unique approach of accessing practical information via the images, focusing on the way subjects can be treated using a whole range of different drawing techniques, rather than looking at

how to master one single style. This gives the reader a much wider skill set—allowing them to capture or create the essence of any image in a variety of different ways.

Guns in the Hands of Artists Jonathan Ferrara
2016-11-01 In the 1990s, the New Orleans murder rate exploded. In 1996, 350 people were killed—the highest number in the city's history, and the highest rate in the nation. In response to this crisis, gallery owner and artist Jonathan Ferrara and artist Brian Borrello, launched a powerful project: Guns in the Hands of Artists. Over sixty artists, including painters, glass artists, sculptors, photographers, and poets, used

decommissioned guns taken off the city streets via a gun buyback program to express a thought, make a statement, open a discussion, and to stimulate thinking about guns and gun violence in America. As gun violence continues to devastate the nation on a daily basis, *Guns in the Hands of Artists* reemerged in 2012 as a community-based social activist art project that has since traveled to six cities across the US. Using art as a mirror for life and interweaving the works of thirty diverse artists with the voices of seventeen national thought leaders, this book is an important outgrowth of the exhibition and an extension of its efforts to employ art as a vehicle for dialogue, as a call to action, and—ultimately—as an

agent of change. Essays by: Walter Isaacson, Senator Tim Kaine, Lupe Fiasco, Richard Ford, Joe Nocera, Trymaine Lee, Lolis Eric Elie, John M. Barry, Dan Cameron, Lucia McBath, Harry Shearer, Jonathan Ferrara, Brian Borrello, Maria Cuomo Cole, Michael Waldman, E. Ethelbert Miller, Mayor Mitchell J. Landrieu, Congresswoman Gabrielle Giffords and Captain Mark Kelly.

The Hidden Mia Roth Čerina 2019 What constitutes the invisible layers of an architecture school? The EAAE Annual Conference of 2019 is titled 'The Hidden School?', aiming to discuss an architecture school's

true character, the substance and the quality of architectural education in the broadest sense, and that which is beyond the stated curricula, yet? whether concretely manifested or subliminally perceived? embodies the culture of the school. The conference, hosted in 2019 by the Faculty of Architecture in Zagreb, focuses upon the subliminal quality of architectural education, that which is beyond the stated curricula and is hard to document through quality evaluation procedures. It can be observed through several indicative aspects, often contributing to the identification of what makes the 'true' spirit or substantial quality of the school and uniqueness or peculiarity of its educational path. It can also be the tacit

meaning situated between the lines of the syllabus, or generated by the students that contribute to it and the educators that personify it, the various shapes of informal learning, or the spaces it takes place in. Irving Harper Michael Maharam 2013-02-12 An intimate monograph of the professional and personal creations of a midcentury design legend. Irving Harper is the most famous designer you have never heard of. Working as an associate at the office of George Nelson in the 1950s and '60s, Harper was

responsible for such icons of midcentury design as the Marshmallow sofa, the Ball clock, and numerous Herman Miller textile designs. Harper's unrecognized contribution to this seminal era of design, and his incredible paper sculptures (made in his spare time to "relieve stress"), are presented for the first time in this book. An essay by design critic Julie Lasky introduces Harper's commercial design work, recognizable designs from graphics to domestic goods to furniture that are still coveted and appreciated today, designed for the offices of Raymond Loewy, George Nelson, and then his own studio Harper + George. The second part of the book documents Harper's extensive paper sculptures, which have

never been exhibited. More than three hundred works fill Harper's house and barn in Rye, New York, where this array of fantastical people and animal sculptures was created from modest and inexpensive materials as diverse as spaghetti and toothpicks in addition to paper. Images of Harper's home, filled with furniture and objects of his own design as well as his paper sculptures, offer a rare glimpse into a Modern design enthusiast's paradise. Offering insight into an important era of American design as well as the prolific output of a creative mind, this book promises to be the first to recognize Irving Harper's contribution to the field and will appeal to fans of Modern design.

Creaselighting Mark Bolitho 2020-11-13
Creaselighting was my third collection of models. It followed from Origami Projects and More Origami projects. The premise of the book was to develop a book around folding techniques rather than what the model was. The project explores folding techniques and different styles of folding. Central to the book is the question "How do I fold?" rather than, "What am I folding?". For most of the projects the folding journey should be as interesting as the destination. I have tried to avoid complexity and kept all the models as simple and elegant as possible. My

main consideration is producing models that are enjoyable to make. The next section starts to explore some of the themes in the book and gives a bit more background to the models themselves and why I have included them. Most of all, if you have got this far, I hope you enjoy the origami. It took several years to develop the models and ideas in Creaselighting. If you have any thoughts or comments, do let me know. In 2004 I embarked on working full time as an origami designer. This has given me many more opportunities to write and develop origami books. Although many of these were commissions and designed in conjunction with the respective publishers. *Grafity's Wall Expanded Edition* Ram V 2020-04-07
When an aspiring street artist "Grafity" sees

the illegal tenements outside his home destroyed, he finds in the debris, a lone, standing wall--one that'll go on to become a summer-long canvas for the lives of four friends getting by and growing up in the constantly changing and challenging environment that is the city of Mumbai. As Grafity's mural on the wall grows, it chronicles the lives of his friends--Jay, a young man with dreams of being a rapper lured into the dangerous path of a gangster. Chasma, a bright but awkward boy who chronicles his struggles as an outsider trying to belong in this city, by writing letters to strangers, to the city itself. And Saira, who comes to Mumbai with Bollywood dreams but must first survive the reality in this place of gangsters, con-men, friends and lovers. As

the long Mumbai summer comes to a close, hearts are broken and leaps of faith, taken. This coming-of-age tale set in Mumbai's loving, unforgiving and chaotic embrace, is a unique exploration of that entirely universal experience--the falling, soaring, the grave permanence and fleeting transience of our adolescent years. From rising comic book stars Anand R. K. and Ram V (Paradiso, These Savage Shores, Batman Secret Files). Listed as the #3 best graphic novel of 2018 by Paste Magazine, enjoy this expanded edition featuring extra content!

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried
2019-04-05 This book explores the practicality of using

the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated

technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.
