Heinz Guderian

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Letters and Letter Fragments Jean de Pins,2007 R  unissant plus de cent trente lettres et fragments de lettres de la correspondance priv  e et diplomatique de l'humaniste toulousain Jean de Pins, Jan Pendergrass ouvre une perspective unique sur quelque quarante ans d'histoire fran  saise et europ  enne. Humaniste, juriste, diplomate et homme d'Eglise sous les r  gnes de Louis XII et Fran  ois Ier, de Pins fit de longues   tudes en France et en Italie du nord avant de devenir, tour    tour, s  nateur aux Parlements de Toulouse et Milan, puis ambassadeur fran  sais    Venise et    Rome. Consacr     v  que de Rieux en 1524, il se d  mit de ses fonctions parlementaires et finit ses jours    Toulouse, entour   d'  tudiants et de gens de lettres   pris de litt  rature classique. Cette   dition de sa correspondance r  v  le l'  tendue consid  rable de ses rapports, non seulement avec les repr  sentants de l'humanisme europ  en, mais aussi avec les chefs de la diplomatie fran  saise, avec des parlementaires, des gens de loi et d'Eglise exceptionnels.

The Da Vinci Globe Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds: a distinct globe with mysterious images, such as old ships, sailors, a volcano, a hybrid monster, pentimenti, waving patterns, conic individualised mountains, curving rivers, vigorous coastal lines, chiaroscuro and an unresolved triangular anagram, which remains an enigma. The globe is hand-engraved in great detail on ostrich egg shells from Pavia by a left-handed Renaissance genius of unquestionable quality. It shows secret knowledge of the map world from the time of Columbus, Cabral, Amerigo Vespucci and Leonardo da Vinci. Central and North America are covered by a vast ocean. The da Vinci globe originates from Florence and dates from 1504. It marks the first time ever that the names of countries such as Brazil, Germania, Arabia and Judea have appeared on a globe. A Leonardo drawing for this globe, showing the coast of the New World and Africa has been discovered in the British Library. This book brings the reader through a fabulous journey of scholars, maps, riddles, rebuses, iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe. It details 500 years of mystery, fine scholarship and expert forensic testing at numerous material science laboratories the world over. The da Vinci globe now takes its rightful place, surpassing the Lenox globe, its copper-cast identical twin, as the most mysterious globe of our time. As such, this monograph is an essential text in Leonardo studies and in the history of cartography.

The Naming of America Martin Waldseem  ller,2008 This new book features a facsimile of the 1507 World Map by Martin Waldseem  ller - the first map ever to display the name America - and tells the fascinating story behind its creation in 16th-century France and rediscovery 300 years later in the library of Wolfegg Castle, Germany, in 1901. It also includes a completely new translation and commentary to Martin Waldseem  ller and Matthias Ringmann's seminal cartographic text, the Cosmographiae Introductio, which originally accompanied the World Map. John Hessler considers answers to some of the key questions raised by the map's representation of the New World, including How was it possible for a small group of cartographers to have produced a view of the world so radical for its time and so close to the one we recognize today?; and What evidence did they possess to show the existence of the Pacific Ocean when neither Vasco Nunez de Balboa nor Ferdinand Magellan had yet reached it'. There are no easy answers, and yet, as this fascinating book reveals, this group of unknowns created some of the most important maps in the history of cartography, and afford us a glimpse into an age when accepted scientific and geographic principles fell away, spawning the birth of modernity.

Notes from the Hyena's Belly Nega Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

The Importance of Demographic and Geographical Factors on the Incidence and Outcome of Systemic Small Vessel Vasculitis Associated with Anti-Neutrophil Cytoplasmic Antibodies Maria Weiner,2019-11-04 The anti-neutrophil cytoplasmic antibody (ANCA)-associated vasculitides (AAV) comprise microscopic polyangiitis (MPA), granulomatosis with polyangiitis (GPA) and eosinophilic granulomatosis with polyangiitis (EGPA). Two serotypes are recognized: myeloperoxidase (MPO)-ANCA and proteinase 3 (PR3)-ANCA. Renal involvement is a common and severe manifestation associated with increased mortality. The incidence varies geographically, but studies are difficult to compare due to heterogeneous methodology and inclusion criteria. AAV is commonly found in the elderly, but there are little data on outcome and optimal treatment in the highest age groups. This thesis focuses on the epidemiology of AAV: incidence, geographical distribution, and outcome. In Paper I annual incidence rates and outcome were compared between nephritis in AAV and nephritis in systemic lupus erythematosus (SLE) in two geographically defined populations in Sweden. Even though SLE is twice as common as AAV, ANCA-associated nephritis outnumbered lupus nephritis by three to one, and was significantly more severe in terms of mortality and development of end stage renal disease. In Paper II associations between ANCA serotype and geographical and demographic factors were investigated in a large multi-centre study of 1408 patients with renal biopsy-proven AAV. PR3-ANCA was associated with male gender, younger age and higher glomerular filtration rate. PR3-ANCA was also associated with higher latitude and lower ultraviolet radiation levels, but analyses of subgroups suggested that genetic rather than environmental explanations might be more important for this geographical gradient. In Paper III a consecutive cohort of 151 elderly patients with MPA and GPA was studied with a focus on treatment, mortality and renal survival. Patients who had received immunosuppressive treatment with cyclophosphamide or rituximab had better survival rates compared to less intensively treated or untreated patients. Severely impaired renal function at diagnosis was associated with worse outcome in terms of both patient and renal survival. In Paper IV the elderly cohort was extended to 202 patients. In this study we found that treatment with cyclophosphamide or rituximab was associated with the development of less permanent organ damage, and not with higher utilization of in-hospital care. However, high doses of glucocorticoids were associated with fatal infections and treatment-related damage.

Overtourism Harald Pechlaner, Elisa Innerhofer, Greta Erschbamer, 2019-09-02 Overtourism explores a growing phenomenon in tourism that is currently creating tensions in both urban and rural tourist destinations worldwide. This volume proposes a framework for a series of possible solutions and management strategies for dealing with overtourism and the various negative impacts that large quantities of tourists can impose. Questioning the causes of this phenomenon – such as increased prosperity and mobility, technological development, issues of security and stigma for certain parts of the world, and so on – this book supposes that better visitor management strategies and distribution of tourists can offset the negative impacts of overtourism. Individual chapters focus on a range of destinations including Venice, Barcelona and Dubrovnik, as well as UNESCO cultural and natural heritage sites, where local political actors and public authorities are not always able to deal with the situation effectively. Integrating research and practice, this book will be of great interest to upper-level students, researchers and academics in tourism, development studies, cultural studies and sustainability, as well as professionals in the field of tourism management.

My First Beethoven Ludwig van Beethoven, 2018-03-13 Ludwig van Beethoven wrote numerous piano pieces to teach to his pupils. Still, today, his works are an integral part of piano lessons. My first Beethoven is perfect for pianists of every age to become acquainted with these works. This volume contains Beethoven's most popular and easiest piano pieces – from the frequently played Sonatinas in G and F major to Für Elise and the famous Moonlight Sonata. Ideal for music lessons and music-making at home! Great works for little masters!

Travel Marketing, Tourism Economics and the Airline Product Mark Anthony Camilleri, 2017-10-03 This book provides a comprehensive introduction to travel marketing, tourism economics and the airline product. At the same time, it provides an overview on the political, socio-economic, environmental and technological impacts of tourism and its related sectors. This publication covers both theory and practice in an engaging style, that will spark the readers' curiosity. Yet, it presents tourism and airline issues in a concise, yet accessible manner. This will allow prospective tourism practitioners to critically analyze future situations, and to make appropriate decisions in their workplace environments. Moreover, the book prepares undergraduate students and aspiring managers alike with a thorough exposure to the latest industry developments. "Dr. Camilleri provides tourism students and practitioners with a clear and comprehensive picture of the main institutions, operations and activities of the travel industry." Philip Kotler, S.C. Johnson & Son Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University, Evanston/Chicago, IL, USA "This book is the first of its kind to provide an insightful and well-structured application of travel and tourism marketing and economics to the airline industry. Student readers will find this systematic approach invaluable when placing aviation within the wider tourism context, drawing upon the disciplines of economics and marketing." Brian King, Professor of Tourism and Associate Dean, School of Hotel and Tourism Management, The Hong Kong Polytechnic University, Hong Kong "The remarkable growth in international tourism over the last century has been directly influenced by technological, and operational innovations in the airline sector which continue to define the nature, scale and direction of tourist flows and consequential tourism development. Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." Richard Sharpley, Professor of Tourism, School of Management, University of Central Lancashire, UK "The book's unique positioning in terms of the importance of and the relationships between tourism marketing, tourism economics and airline product will create a distinct niche for the book in the travel literature." C. Michael Hall, Professor of Tourism, Department of Management, Marketing and Entrepreneurship, University of Canterbury, Christchurch, New Zealand "A very unique textbook that offers integrated lessons on marketing, economics, and airline services. College students of travel and tourism in many parts of the world will benefit from the author's thoughtful writing style of simplicity and clarity." Liping A. Cai, Professor and Director, Purdue Tourism & Hospitality Research Center, Purdue University, West Lafayette, IN, USA "An interesting volume that provides a good coverage of airline transportation matters not always well considered in tourism books. Traditional strategic and operational issues, as well as the most recent developments and emerging trends are dealt with in a concise yet clear and rational way. Summaries, questions and topics for discussion in each chapter make it a useful basis for both taught courses or self-education." Rodolfo Baggio, Professor of Tourism and Social Dynamics, Bocconi University, Milan, Italy "This is a very useful introductory book that summarises a wealth of knowledge in an accessible format. It explains the relation between marketing and economics, and applies it to the business of airline management as well as the tourism industry overall." Xavier Font, Professor of Sustainability Marketing, School of Hospitality and Tourism Management, University of Surrey, UK and Visiting Professor, Hospitality Academy, NHTV Breda, Netherlands "This book addresses the key principles of tourism marketing, economics and the airline industry. It covers a wide range of theory at the same time as offering real-life case studies, and offers readers a comprehensive understanding of how these important industries work, and the underpinning challenges that will shape their future. It is suitable for undergraduate students as well as travel professionals, and I would highly recommend it." Clare Weeden, Principal Lecturer in Tourism and Marketing at the School of Sport and Service Management, University of Brighton, UK "In the current environment a grasp of the basics of marketing to diverse consumers is very important. Customers are possessed of sophisticated knowledge driven by innovations in business as well from highly developed technological advances. This text will inform and update students and those planning a career in travel and tourism. Mark Camilleri has produced an accessible book, which identifies ways to accumulate and use new knowledge to be at the vanguard of marketing, which is both essential and timely." Peter Wiltshier, Senior Lecturer & Programme Leader for Travel & Tourism, College of Business, Law and Social Sciences, University of Derby, UK "This contemporary text provides an authoritative read on the dynamics, interactions and complexities of the modern travel and tourism industries with a necessary, and much welcomed, mixture of theory and practice suitable for undergraduate, graduate and professional markets." Alan Fyall, Orange County Endowed Professor of Tourism Marketing, University of Central Florida, FL, USA
