From Cave Man to Cave Martian Manfred "Dutch" von

Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and

supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Convergence Culture Henry Jenkins, 2008-09 “What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this.” —Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as “civil society” and “hegemony” are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of “grand explanatory schemes,” the unity of theory and practice, and a

focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: “Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society.” The rigor of Santucci’s examination of Gramsci’s life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

Notes from the Hyena's Belly Nega Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Stratonauts Manfred "Dutch" von Ehrenfried, 2013-12-13 Just what does it take to be a stratonaut, soaring to higher and higher altitudes of Earth's atmosphere? Brave men and women have reached extreme heights in balloons, aircraft and rocket ships over the past two centuries, from the first untethered balloon flight to the first flights in the newly defined stratosphere, through to the present flights that continue to set new records. This book defines the altitudes related to the stratosphere, how it changes with latitude and the effects on ascending aviators. Also described is how over time technology enabled aircraft and balloons to achieve higher altitudes. The book shows the clear influence of the military on designs that initially focused on speed and maneuverability, but only later on reaching new altitudes. The early flights into the troposphere and eventually the mid to upper reaches of the stratosphere are chronicled, with great emphasis on flight operations. This includes decompression, bailouts, inertia coupling, ejections, catastrophic disintegration, crashes and deaths. Although the book highlights major altitude attempts and records, it also focuses on the life-threatening problems confronting the would-be stratonaut and the causes of many of their deaths. In doing so, it tries to define just what it takes to be a stratonaut.

Introducing Transformational Grammar Jamal Ouhalla, 1999 The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar,

it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition introduces students with no previous training to Transformational Grammar. Covering the framework known as Principles and Parameters as well as the more recent framework known as Minimalism, it includes a range of new exercises, making it ideal for students at all levels.

Treasure Yourself Miranda Kerr, 2012-12-03 In *Treasure Yourself*, international supermodel Miranda Kerr offers her own view on how her generation and those following can achieve greater health and happiness. Miranda believes that one of the most powerful tools to facilitate change is positive affirmation and she has collected over 100 affirmations from some of the world's most inspirational authors including Louise L. Hay, Wayne W. Dyer, Deepak Chopra and many more.

Exploring the Martian Moons Manfred "Dutch" von Ehrenfried, 2017-04-11 This book explores the once popular idea of 'Flexible Path' in terms of Mars, a strategy that would focus on a manned orbital mission to Mars's moons rather than the more risky, expensive and time-consuming trip to land humans on the Martian surface. While currently still not the most popular idea, this mission would take advantage of the operational, scientific and engineering lessons to be learned from going to Mars's moons first. Unlike a trip to the planet's surface, an orbital mission avoids the dangers of the deep gravity well of Mars and a very long stay on the surface. This is analogous to Apollo 8 and 10, which preceded the landing on the Moon of Apollo 11. Furthermore, a Mars orbital mission could be achieved at least five years, possibly 10 before a landing mission. Nor would an orbital mission require all of the extra vehicles, equipment

and supplies needed for a landing and a stay on the planet for over a year. The cost difference between the two types of missions is in the order of tens of billions of dollars. An orbital mission to Deimos and Phobos would provide an early opportunity to acquire scientific knowledge of the moons and Mars as well, since some of the regolith is presumed to be soil ejected from Mars. It may also offer the opportunity to deploy scientific instruments on the moons which would aid subsequent missions. It would provide early operational experience in the Mars environment without the risk of a landing. The author convincingly argues this experience would enhance the probability of a safe and successful Mars landing by NASA at a later date, and lays out the best way to approach an orbital mission in great detail. Combining path-breaking science with achievable goals on a fast timetable, this approach is the best of both worlds--and our best path to reaching Mars safely in the future.

Taste of Salt Frances Temple, 1994-08-05 Every Life Makes a Story Djo has a story: Once he was one of Titid's boys, a vital member of Father Jean-Bertrand Aristide's election team, fighting to overthrow military dictatorship in Haiti. Now he is barely alive, the victim of a political firebombing. Jeremie has a story: Convent-educated Jeremie can climb out of the slums of Port-au-Prince. But she is torn between her mother's hopes and her own wishes for herself ... and for Haiti. Father Jean-Bertrand Aristide has a story: A dream of a new Haiti, one in which every person would have a decent life ... a house with a roof ... clean water to drink ... a good plate of rice and beans every day ... a field to work in. At Aristide's request, Djo tells his story to Jeremie -- for Titid believes in the power of all of their stories to make change. As Jeremie listens to Djo, and to her own heart, she knows that they will begin a new story, one that is all their

own, together.

Stopping the Noise in Your Head Dr Reid Wilson, 2016-08-11 'So many of us live with a constant soundtrack of worry. This brilliant new book knows exactly how to deal with it.' Viv Groskop, *The Pool* We all know that worrying causes us to retreat, to avoid and to focus excessively on threat - so how do we stop it? Enter Dr Reid Wilson. Warm, engaging and remarkably entertaining, *Stopping the Noise in Your Head* proposes a ground-breaking approach to overcoming anxiety and worry and will help you to shut down the endless negative cycle of 'Will I... ? Should I... ? What if...?' voices for good. Using ground-breaking strategies and drawing on a range of sources - from fire-fighters and fitness instructors to Sir Isaac Newton and Muhammad Ali - Dr Reid Wilson will help you shift your perspective, step towards challenges and regain control of your life.

Abuela's Weave Omar S. Castaeda, 1995-09 A 1993 Parent's Choice Award honoree, this story about the importance of family pride and personal endurance introduces children to the culture of Guatemala through the eyes of little Esperanza, who works with her abuela--her grandmother--on weavings to sell at the public market. Full color throughout.
