Logical Reasoning Bradley Harris Dowden, 1993
This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and

the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

The Russian Cosmists George M. Young, 2012-08-01 In the nineteenth and early twentieth century, a controversial school of Russian religious and scientific thinkers emerged, united in the conviction that humanity was entering a new stage of evolution and must assume a new, active, managerial role in the cosmos. The ideas of the Cosmists have in recent decades been rediscovered and embraced by many Russian intellectuals. In the first account in English of this fascinating tradition, George M. Young offers a dynamic and wide-ranging examination of the lives and ideas of the Russian Cosmists.

The Power of Stars Bryan E. Penprase, 2017-05-05
Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular "Archaeoastronomy of Skyscrapers" section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and China. With the rapid pace

of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.

Gilded Age Ivan Franceschini, Nicholas Loubere, 2018-04-01 According to the Chinese zodiac, 2017 was the year of the 'fire rooster', an animal often associated with the mythical fenghuang, a magnificently beautiful bird whose appearance is believed to mark the beginning of a new era of peaceful flourishing. Considering the auspicious symbolism surrounding the fenghuang, it is fitting that on 18 October 2017, President Xi Jinping took to the stage of the Nineteenth Party Congress to proclaim the beginning of a 'new era' for Chinese socialism. However, in spite of such ecumenical proclamations, it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities. Migrant workers, for one, remain disposable. Lawyers, activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world. This Yearbook traces the stark new 'gilded age' inaugurated by the Chinese Communist Party. It does so through a collection of more than 40 original essays on labour, civil society and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

China Dreams Jane Golley, Linda Jaivin, Ben

Hillman, Sharon Strange, 2020-04-16 The year 2019 marked a number of significant anniversaries for the People's Republic of China (PRC), each representing different 'Chinese dreams'. There was the centennial of the May Fourth Movement – a dream of patriotism and cultural renewal. The PRC celebrated its seventieth anniversary – a dream of revolution and national strength. It was also thirty years since the student-led Protest Movement of 1989 – dreams of democracy and free expression crushed by government dreams of unity and stability. Many of these 'dreams' recurred in new guises in 2019. President Xi Jinping tightened his grip on power at home while calling for all citizens to 'defend China's honour abroad'. Escalating violence in Hong Kong, the ongoing suppression of Uyghurs in Xinjiang, and deteriorating Sino-US relations dominated the headlines. Alongside stories about China's advances in artificial intelligence and genetically modified babies and its ambitions in the Antarctic and outer space, these issues fuelled discussion about what Xi's own 'China Dream' of national rejuvenation means for Chinese citizens and the rest of the world. The China Story Yearbook: China Dreams reflects on these issues and more. It surveys the dreams, illusions, aspirations, and nightmares that coexisted (and clashed) in 2019 in China and beyond. As ever, we take a cross-disciplinary perspective that recognises the inextricable links between economy, politics, culture, history, language, and society. The Yearbook, with its accessible analysis of the main events and trends of the year, is an

essential tool for understanding China's growing power and influence around the world.

Cape Cod Stories Joseph Crosby Lincoln, 1907 Cape Cod Stories by Joseph Lincoln Crosby, first published in 1907, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

A Hedonist Manifesto Michel Onfray, 2015-11-10 Michael Onfray passionately defends the potential of hedonism to resolve the dislocations and disconnections of our melancholy age. In a sweeping survey of history's engagement with and rejection of the body, he exposes the sterile conventions that prevent us from realizing a more immediate, ethical, and embodied life. He then lays the groundwork for both a radical and constructive politics of the body that adds to debates over morality, equality, sexual relations, and social engagement, demonstrating how philosophy, and not just modern scientism, can contribute to a humanistic ethics. Onfray attacks Platonic idealism and its manifestation in Judaic, Christian, and Islamic belief. He warns of the lure of attachment to the purportedly eternal,

immutable truths of idealism, which detracts from the immediacy of the world and our bodily existence. Insisting that philosophy is a practice that operates in a real, material space, Onfray enlists Epicurus and Democritus to undermine idealist and theological metaphysics; Nietzsche, Bentham, and Mill to dismantle idealist ethics; and Palante and Bourdieu to collapse crypto-fascist neoliberalism. In their place, he constructs a positive, hedonistic ethics that enlarges on the work of the New Atheists to promote a joyful approach to our lives in this, our only, world.

Introductory Grammar of Amharic Wolf Leslau, 2000
This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic

transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Mithraic Societies: From Brotherhood to Religion's Adversary - (b&w) Abolala Soudavar, 2018-02-21 Although by its title, this book seems to be about a specialized topic, the spread of Mithraic societies and its avatars, in

time and geographical expanse, much enhances its relevancy. From Roman legionaries to chivalry orders, from dervish circles to guild organizations, and from Freemasons to French revolutionaries, the hierarchy of Mithraic societies, their initiation rites, and their oaths of secrecy, provided a model for brotherhood organization that was efficient, but also flexible; they could adapt their philosophy to the prevailing politico-religion conditions of the day, because they did not worship any particular god, but could also be comrades in arms with nascent religious movements, such as with Christianity. Mithra was the initial guarantor of their oath, and if need be it could be replaced by Jesus, Allah or any other divinity. Their òreligionó was their brotherhood, and as such they usually provided a counter-balance to the power elite, and had the potential to become politically active.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the

astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.
