Cut and Fold Techniques for Pop-Up Designs Paul Jackson,2014-02-17 Introducing techniques for making pop-ups from one sheet of card, the third title in this series on paper engineering takes folding techniques into the third dimension. Each chapter introduces a new technical idea and shows how that technique can be adapted in many different ways, or combined with techniques from earlier chapters. These 3-D techniques can be incorporated into any design where typography and/or illustration are used, including mail-shots, personal publicity, invitations, business cards and greetings cards. With their emphasis on surface design over complex cutting, the pop-ups have an instant appeal for designers. Following the elegant, easy-to-follow style of Paul Jackson's other titles for Laurence King, *Cut and Fold Techniques for Pop-Up Designs* is an essential resource for marketing professionals and design students.

History of European Drama and Theatre Erika Fischer-Lichte,2002 This major study reconstructs the vast history of European drama from Greek tragedy through to twentieth-century theatre, focusing on the subject of identity. Throughout history, drama has performed and represented political, religious, national, ethnic, class-related, gendered, and individual concepts of identity. Erika Fischer-Lichte's topics include: * ancient Greek theatre * Shakespeare and Elizabethan theatre by Corneilli, Racine, Molière * the Italian commedia dell'arte and its transformations into eighteenth-century drama * the German Enlightenment - Lessing, Schiller, Goethe, and Lenz * romanticism by Kleist, Byron, Shelley, Hugo, de Vigny, Musset, Büchner, and Nestroy * the turn of the century - Ibsen, Strindberg, Chekhov, Stanislavski * the twentieth century - Craig, Meyerhold, Artaud, O'Neill, Pirandello, Brecht, Beckett, Müller. Anyone interested in theatre throughout history and today will find this an invaluable source of information.

Cut and Fold Techniques for Promotional Materials Paul Jackson,2013-03-04 *Cut and Fold Techniques for Promotional Materials* is a unique collection of over 40 attention-grabbing cut-and-fold designs that when printed and illustrated form memorable give-aways to promote and advertise services and products. The book provides a one-stop source for novelty promotional materials, many appearing in print for the first time. Some designs are interactive toys that turn inside out or reveal hidden faces when played with, others are more practical, offering ingenious ways to fold-up letters, brochures and posters, or to create novelty envelopes and leaflets. All the designs will enhance a message or presentation, grabbing attention in ways that simple printing can never achieve. Following the elegant, easy-to-follow style of Paul Jackson's other titles for Laurence King, *Cut and Fold Techniques for Promotional Materials* is an essential resource for marketing professionals and design students, and an inspirational guide to anyone looking to enhance the presentation of their product or service.

The Origami Home Mark Bolitho,2014-10-30 The Origami Home takes a high-design approach to the traditional Japanese art form to enable you to create the ultimate 'designer doll's house' made from paper. Origami expert Mark Bolitho explains how to make furniture and accessories for every room in the home, including armchairs and sofas, dining tables and chairs, a four-poster bed, a bookcase and a selection of designer-style lamps. The models are presented within room sets, each with its own interior style - from Shaker to Scandinavian, country to contemporary. Variations demonstrate how the choice of paper - floral, geometric, striped, pictorial or plain - influences the style of the finished piece, and will inspire you to create room sets in any style you choose. For each room set there are step-by-step folding instructions for the key pieces featured in the room. The back of the book holds a pocket containing a selection of origami papers to get you started. The mix of furniture designs, along with the unique and fun presentation style, will ensure that *The Origami Home* appeals to anyone with a passion for design and interiors, as well as origami and craft enthusiasts.

The Transformative Power of Performance Erika Fischer-Lichte,2008-06-05 In this book, Erika Fischer-Lichte traces the emergence of performance as 'an art event' in its own right. In setting performance art on an equal footing with the traditional art object, she heralds a new aesthetics. The peculiar mode of experience that a performance provokes - blurring distinctions between artist and audience, body and mind, art and life - is here framed as the breeding ground for a new way of understanding performing arts, and through them even wider social and cultural processes. With an introduction by Marvin Carlson, this translation of the original *Ästhetik des Performativen* addresses key issues in performance art, experimental theatre and cultural performances to lay the ground for a new appreciation of the artistic event.

Structural Packaging Paul Jackson,2012-02-13 Unlike other packaging titles, which simply provide templates to copy, this book enables designers of all packaging types to create 3-D packaging forms that are specific to their needs rather than based on an existing design. It teaches a simple 'net' construction system - a one-piece 2-D configuration of card seen when a 3-D package is opened out and flattened - which enables the designer to create a huge number of very strong 3-D packaging forms that are both practical and imaginative. Each chapter concludes with photographs and net drawings of 6-10 creative examples of packaging designs made using the principles outlined in the preceding chapter. *Structural Packaging* gives the reader an understanding of the underlying principles of packaging construction and the technical knowledge and confidence to develop a greater number of their own unusual and innovative designs than any comparable book. Dictionary of the Theatre Patrice Pavis,1998-01-01 An encyclopedic dictionary of technical and theoretical terms, the book covers all aspects of a semiotic approach to the theatre, with cross-referenced alphabetical entries ranging from absurd to word scenery.

Creaselighting Mark Bolitho,2020-11-13 *Creaselighting* was my third collection of models. It followed from *Origami Projects* and *More Origami projects*. The premise of the book was to develop a book around folding techniques rather than what the model was. The project explores folding techniques and different styles of folding. Central to the book is the question How do I fold? rather than, What am I folding?. For most of the projects the folding journey should be as interesting as the destination. I have tried to avoid complexity and kept all the models as simple and elegant as possible. My main consideration is producing models that are enjoyable to make. The next section starts to explore some of the themes in the book and gives a bit more background to the models themselves and why I have included them. Most of all, if you have got this far, I hope you enjoy the origami. It took several years to develop the models and ideas in *Creaselighting*. If you have any thoughts or comments, do let me know. In 2004 I embarked on working full time as an origami designer. This has given me many more opportunities to write and develop origami books. Although many of these were commissions and designed in conjunction with the respective publishers.

The Origami Home Mark Bolitho,2015-03-03 A One-of-a-Kind Approach to Origami Furniture The Origami Home brings together over thirty high-design origami furniture projects for the first time in one beautiful package. Accompanied by step-by-step instructions and full-color photos, these pieces cover a wide-range of styles and accessories for each room of the house, including: -Mid-Century Modern Dining Room -Kitsch 1950s Kitchen - Scandinavian Style Living Room -Contemporary Home Office Plus, with a variety of exciting colored and patterned folding papers included, crafters can personalize the style of a finished piece. Whether you're a novice improving your skills or an origami master interested in trying something new, this one-of-a-kind origami book will capture your imagination. 75 folding papers total: 65 sheets at 8 1/2 x 6 1/2 inches and 10 sheets at 17 x 13 inches

Adult Origami Nick Robinson,2004-09 This book reaches the parts that other origami books don't, plumbing previously uncharted depths, uniting the yin and yang bedfellows of an ancient Japanese artform and 21st century toilet humour. Readers who hitherto have only been able to make a humble paper aeroplane, will soon be able to impress their mates down the pub with a jaw-dropping ability to take a scrap of chaste, virgin paper and fashion something that is both artistic and crude. Working through a total of 16 projects, the cultural importance of each subject and the inspiration behind it is discussed, while the origami side of things is explained in simple, step-by-step Anglo-Saxon, with evocative line drawings. *Adult Origami* will soon have readers making giant sperm, novelty paper boobies or a fully moving schwanstucker, impressing friends and shocking polite family members everywhere.

Origami Projects Mark Bolitho,2020-11-13 *Origami Projects* is a collection of the early works of Mark Bolitho, with most of the featured models having been developed in the late 1970s to early 1980s. They came out of a time when there were very few origami books available and, despite its

ancient origins, was the beginning of modern more complex origami. It was, at the time relatively easy to come up with new designs by doodling or experimenting with repeatable patterns. Many of the models have been made organically. The Dinosaur and Dragon are made using similar folding techniques, this is then further developed in the Scorpion and Crab. The methodology of opening the point and squashing seems obvious and yet I haven't seen it replicated. This base is further developed in the follow up booklet More Origami Projects, which includes a squirrel and a more advanced scorpion. The collection also features some of my favourite designs, the flying goose is an action model. The hexahedron has a delightful mechanism and resolves and concludes neatly by tucking a tab into a pocket. Both of these models have an organic folding sequence that resolves to a point where no further folds can be made, the models appear to be complete. This is a principle I revisit in Creaselightning and my presentation at The Seventh International meeting of Origami in Science, Maths, and Education; (7OSME) in 2018. The Hexahedron, Puffa Fish, flying bird and four-legged box share a common feature as they are all 3D and are fully rendered, unlike the dragon, badger and Tyrannosaur. These models are 2D, effectively flat models, whereas the first examples have no open spaces.
