**Do Androids Dream of Electric Sheep?** Philip K. Dick,1975 By 2021, the Terminus War had driven mankind off-planet and entire species into extinction. Now only the rich can afford living creatures; others may buy amazingly realistic simulacra: horses, cats, sheep ... Even humans. These artificial people are so advanced it's impossible to tell them from true men and women--except for their lack of empathy. Without empathy, androids can--and do--kill their owners and blend into society, so they're illegal on Earth. It's Rick Deckard's job to find these rogues and retire them. But andys tend to fight back--with deadly results.

**On Point** Gregory Fontenot,E. J. Degen,David Tohn,2005 Den amerikanske hærs første officielle historiske beretning om operationerne i den anden Irakiske Krig, Operation Iraqi Freedom, (OIF). Fra forberedelserne, mobiliseringen, forlægningen af enhederne til indsættelsen af disse i kampene ved Talil og As Samawah, An Najaf og de afsluttende kampe ved Bagdad. Foruden en detaljeret gennemgang af de enkelte kampenheder(Order of Battle), beskrives og analyseres udviklingen i anvendte våben og doktriner fra den første til den anden Golf Krig.

**Cartridges and Firearm Identification** Robert E. Walker,2012-11-26 At a time when crime scene television shows are all the rage amongst the civilian population, knowledge of firearm forensics is of paramount importance to crime scene analysts, police detectives, and attorneys for both the prosecution and the defense.

Cartridges and Firearm Identification brings together a unique, multidisciplined approach to quest

*The Trade in Small Arms and Light Weapons on the Dark Web* United Nations,2019-01-31 This document summarizes the main findings and implications of the first empirical study investigating the scale and scope of arms trafficking on the dark web, which was conducted by RAND Europe and the University of Manchester from September 2016 to July 2017. There is an ongoing debate over the extent to which online black markets on the so-called dark web, the part of the Internet not searchable by traditional search engines and hidden behind anonymity software, facilitate arms trafficking. Details have emerged in the media following the Munich shooting in 2016 linking the weapons used by the attacker to vendors on dark web marketplaces (also known as cryptomarkets). Some media reports have also linked the Paris terrorist attacks in November 2015 to these platforms. While these reports appear to have raised concerns about the role of such dark web markets in arms trade, evidence on the subject is largely anecdotal, based on secondary data as reported after events such as terrorist attacks or successful law enforcement operations.

**First to Fight** V H Krulak,1999-02-22 In this riveting insider's chronicle, legendary Marine General Brute Krulak submits an unprecedented examination of U.S. Marines—their fights on the battlefield and off, their extraordinary esprit de corps. Deftly blending history with autobiography, action with analysis, and separating fact from fable, General Krulak touches the very essence of the Corps: what it means to be a Marine and the reason behind its consistently outstanding performance and reputation. Krulak also addresses the most basic but challenging question of all about the Corps: how does it manage to survive—even to flourish—despite overwhelming political odds and, as the general writes, an extraordinary propensity for shooting itself in the foot? To answer this question Krulak examines the foundation on which the Corps is built, a system of intense loyalty to God, to country, and to other Marines. He also takes a close look at Marines in war, offering challenging

accounts of their experiences in World War II, Korea, and Vietnam. In addition, he describes the Corps's relationship to other services, especially during the unification battles following World War II, and offers new insights into the decision-making process in times of crisis. First published in hardcover in 1984, this book has remained popular ever since with Marines of every rank.

**The Marines of Autumn** James Brady, 2007-04-01 War has been the inspiration of such great novels as *The Red Badge of Courage* and *A Farewell to Arms*, and daring feats of courage and tragic mistakes have been the foundation for such classic works. Now, for the first time ever, the Korean War has a novel that captures that courage and sacrifice. When Captain Thomas Verity, USMC, is called back to action, he must leave his Georgetown home, career, and young daughter and rush to Korea to monitor Chinese radio transmissions. At first acting in an advisory role, he is abruptly thrust into MacArthur's last daring and disastrous foray-the Chosin Reservoir campaign-and then its desperate retreat. Time magazine at the time recounted the retreat this way: The running fight of the Marines...was a battle unparalleled in U.S. military history. It had some aspects of Bataan, some of Anzio, some of Dunkirk, some of Valley Forge, and some of 'the retreat of the 10,000' as described in Xenophon's *Anabasis*. The *Marines of Autumn* is a stunning, shattering novel of war illuminated only by courage, determination, and Marine Corps discipline. And by love: of soldier for soldier, of men and their women, and of a small girl in Georgetown, whose father promised she would dance with him on the bridges of Paris. A child Captain Tom Verity fears he may never see again. In *The Marines of Autumn*, James Brady captures our imagination and shocks us into a new understanding of war.

**Anticipating Criminal Behaviour** Peter A. M. G. Kock, Peter de Kock, 2014 In the first decade of this century, the focus of law-enforcement agencies has shifted from prosecuting crime to anticipating crime. This approach emphasizes the discovery of narratives in crime-related data. However, while narratives are at the mainstay of entertainment, law, and politics, a scientific method by which narratives can be created - and subsequently be used to anticipate criminal behavior - still has to be established. In the creative industry, a narrative is generated by a scenario. A scenario describes the interactions between the characters and includes information - about behavior, goals, motivations, *modi operandi*, and resistances - that have to be overcome. Furthermore, a creative scenario is composed by a limited number of scenario components. In this book, a new and innovative scenario model is designed by which narratives in data can be detected. It introduces the ESC12 - the twelve Elementary Scenario Components - by which every conceivable narrative can be created. Moreover, the book introduces the ESC12 scenario model, a model that may support law enforcement agencies to effectively anticipate criminal behavior. The book's author, Peter A.M.G. de Kock, graduated as a filmmaker from the Film Academy of the Amsterdam School of the Arts in 1994, and has traveled all over the world as a professional photographer, cameraman, and film-director. In 2009, after receiving a Master degree in Criminal Investigation, he introduced creative scenarios to anticipate (terrorist) attacks. The operational results of his team were thought provoking, and he was invited to demonstrate his method of operation to prominent members of Dutch Parliament and the Ministry of Security and Justice. He was then offered the opportunity to pursue the use of scenarios to anticipate crime, as an external Ph.D. student at Tilburg University. This book is the result of his study.
