Murder in the Gunroom Henry Beam Piper,2022-08-09 The Lane Fleming collection of early pistols and revolvers was one of the best in the country. When Fleming was found dead on the floor of his locked gunroom, a Confederate-made Colt-type percussion .36 revolver in his hand, the coroner's verdict was death by accident. But Gladys Fleming had her doubts. Enough at any rate to engage Colonel Jefferson Davis Rand--better known just as Jeff--private detective and a pistol-collector himself, to catalogue, appraise, and negotiate the sale of her late husband's collection.

Raising Red Flags N.R. Jenzen-Jones,Jonathan Ferguson,2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct

weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith, 2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.

The Best Caliber Wars James M Volo, 2019-05 Guns can be very effective tools, but they are each of limited utility. There is no one weapon that is perfect for every purpose. Private persons may own a number of guns that fulfill a variety of functions. Ballistics is important for soldiers, law enforcement, sportsmen, and anyone who seeks to protect their life, their home, their family, or their workplace. If you are among these, this book is for you. Not surprisingly, gun owners and firearms enthusiasts are often part of a social gun culture in which certain facts, trends, and fads circulate and evolve with time, some stirring intense loyalty among shooters even when the realities suggest otherwise. For the average gun user some very popular myths, misconceptions, and miscalculations concerning ballistics and the terminal effects of bullets are strongly held, and it is not the purpose of this discussion to demonstrate why they are or are not true, only to lay out the parameters of the debate so that the readers can make their own judgments with increased confidence. The origin of ballistics is in the study of the flight path of projectiles, but its domain has been expanded in modern times. Among the modern ballistic sciences are areas of interest concerning how ammunition and weapons operate.

Targeted Therapies for Lung Cancer Ravi Salgia, 2019-06-26 This book contextualizes translational research and provides an up to date progress report on therapies that are currently being targeted in lung cancer. It is now well established that there is tremendous heterogeneity among cancer cells both at the inter- and intra-tumoral level. Further, a growing body of work highlights the importance of targeted therapies and personalized medicine in treating cancer patients. In contrast to conventional therapies that are typically administered to the average patient regardless of the patient's genotype, targeted therapies are tailored to patients with specific

traits. Nonetheless, such genetic changes can be disease-specific and/or target specific; thus, the book addresses these issues manifested in the somatically acquired genetic changes of the targeted gene. Each chapter is written by a leading medical oncologist who specializes in thoracic oncology and is devoted to a particular target in a specific indication. Contributors provide an in-depth review of the literature covering the mechanisms underlying signaling, potential cross talk between the target and downstream signaling, and potential emergence of drug resistance.

Anticipating Criminal Behaviour Peter A. M. G. Kock, Peter de Kock, 2014 In

the first decade of this century, the focus of law-enforcement agencies has shifted from prosecuting crime to anticipating crime. This approach emphasizes the discovery of narratives in crime-related data. However, while narratives are at the mainstay of entertainment, law, and politics, a scientific method by which narratives can be created – and subsequently be used to anticipate criminal behavior – still has to be established. In the creative industry, a narrative is generated by a scenario. A scenario describes the interactions between the characters and includes information – about behavior, goals, motivations, *modi operandi*, and resistances – that have to be overcome. Furthermore, a creative scenario is composed by a limited number of scenario components. In this book, a new and innovative scenario model is designed by which narratives in data can be detected. It introduces the ESC12 – the twelve Elementary Scenario Components – by which every conceivable narrative can be created. Moreover, the book introduces the ESC12 scenario model, a model that may support law enforcement agencies to effectively anticipate criminal behavior. The book's author, Peter A.M.G. de Kock, graduated as a filmmaker from the Film Academy of the Amsterdam School of the Arts in 1994, and has traveled all over the world as a professional photographer, cameraman, and film-director. In 2009, after receiving a Master degree in Criminal Investigation, he introduced creative scenarios to anticipate (terrorist) attacks. The operational results of his team were thought provoking, and he was invited to demonstrate his method of operation to prominent members of Dutch Parliament and the Ministry of Security and Justice. He was then offered the opportunity to pursue the use of scenarios to anticipate crime, as an external Ph.D. student at Tilburg University. This book is the result of his study. The Combined Action Platoons Michael Peterson, 1989-06-26 This is the first comprehensive history for the academic reader of the Combined Action Program (CAP) in Vietnam. Created as a response by the U.S. Marines to what was known as the other war in Vietnam, the CAP Program was comprised of platoons each combining a fourteen man marine rifle squad, a navy corpsman, and a platoon of South Vietnamese militia. These CAP units were unique to the war. Their function was to capture and hold rather than to search and destroy. While the main forces of the Army and Marines all too often waged war on the Vietnamese hamlets, the CAP marines waged war from the hamlets. Their intent was to keep the hamlet intact. The uniqueness of the CAP Program justifies this study not only from an historical and political perspective but also sociologically. The CAP Marines were among the few Americans who lived with the Vietnamese in their own setting for long periods of time, developing community projects and civic action programs. The 1980s has brought about a resurgence of valuable research, the declassification of official documentation, and most important, an emotional distance from the trauma of defeat. The author takes full advantage of these conditions to present a thorough and comprehensive history and civic program analysis. Many critics of the Vietnam War now agree that the tactics of the Combined Action Program were among the most promising of the war. The CAP Marines fought a deadly and personal war with the Viet Cong and the North Vietnamese Army. In this volume, the author achieves his twofold objective. He not only provides a valuable historical account of the Program, but also analyzes the civic action and community development projects undertaken by the CAP Marines. His study is done with an eye to the future as U.S. counterinsurgency has again found expression in other Third

World conflicts.

A Gentlemen's Guide to Style and Self-defense in the Old American West
James M. Volo, Ph.d., 2016-05-24 The Old West has had a powerful impact on the concept of gentlemanly masculinity among Americans. To behave like a gentleman may mean little or much. To spend large sums of money like a gentleman may be of no great praise, but to conduct ones self like a gentleman implies a high standard even for those without financial means. For almost two centuries, the frontiersman has been a standard of rugged individualism and stoic bravery for the American male. Provider, protector, counselor, and knight errant to the weak or helpless, men on the frontier stood apart. Newspapers, Dime Novels, and Wild West Shows helped to form the popular view of Old West masculinity in the later 19th century. Novels and short stories served this purpose in the first half of the 20th century, but it was films and TV that cemented the image of the Old west that most post WWII Baby Boomers have today. The study of film and other media representations has been a particularly energetic field for masculinity research. However, western films are not so much about the West as they are about the Westerner. He stands alone, heroic, powerful, and seeking justice and order. The Westerner is the last gentleman and Westerns are probably the last art form in which the concept of honor retains its strength. Directors and screenwriters, ultimately having overcome the simplistic shoot-em-up, used the genre to explore the pressing subjects of their day like racism, nationalism, capitalism, family, and honor, issues more deeply meshed with the concept of manliness than simply wearing a gun belt and Stetson hat. Fear

not, Old West purists! For those traditionalists among you, these pages are filled with authentic designs, facts, weapons, and tales from the mid 1800s to the turn of the century and slightly beyond. Here are some of the roots of the most popular holsters, fashions, weapons, cartridges, and myths preferred by collectors and reenactors. So-called Cowboy Action enthusiasts, NRA members, and armchair generals will find sections of this work devoted to their hobbies, and while stodgy academics might cringe, Old West historians will have their obsessions somewhat mollified. Nonetheless, the current author grew up in the days of Shoot'em-up Saturdays at the movies, prime time TV Westerns, and those wondrous sights and sounds of Cowboy gunfights with cap guns on a hillside and Indian encounters on the pavement during a childhood when neither activity was considered politically incorrect. Few other authors in this genre have a resume that includes formal training in science, weapons, and horsemanship; nor have they actually been a horse wrangler, ridden in a troop of cavalry, and reenacted a mounted charge with dozens of others, Hollywood cameras running, revolvers or swords in hand. Nonetheless, there comes a time when we are all too old and too fat to jump rail fences with horses (True Grit) and must retire to our easy chairs to write. What follows is a serious (if a bit nostalgic) effort at history by a critically noted author and widely published historian with the proper credentials and practical experience to attempt to carry it off. Cling to your Bibles and to your guns, partner! Dudes need not apply.
