A Different Home Kelly DeGarmo, John DeGarmo, 2014-01-21 A sensitive picture book to help ease the anxieties of foster children aged 4 to 10 entering placement. In *A Different Home*, Jessie tells us her story of being placed in foster care. At first she is worried and has lots of questions. The new home is not like her old home -- she has a different bedroom, different clothes, and there's different food for breakfast. She also misses her family. When Jim and Debbie, her foster parents, answer her questions she begins to feel better and see that this different home is kind of nice. Written in simple language and fully illustrated in color, this storybook is designed to help children in care, or moving into care, to settle in and answer some of the questions they may have. Accompanied by notes for adults on how to use the story with children, it will be a useful book for foster parents and caseworkers, as well as social workers, teachers and anyone else working with children in foster care.

Going Backwards Dale S. Rogers, Ronald S. Tibben-Lembke, 1999

A Hippy-Hoppy Toad Peggy Archer, 2018-03-20 From the illustrator of the award-winning *Sophie's Squash* comes a rollicking read-aloud featuring a very tiny toad who gets displaced as animals--and humans--brush past him on the road. In the middle of a puddle in the middle of a road on a teeter-totter twig sat a teeny-tiny toad. Snap! went the twig! Up went the toad! And he landed on a tree by the side of the road. It's hard to be a tiny toad minding your own business on a twig. First a bird pecks at him. . . . Then a bee buzzes. . . . Then a dog barks . . . and so on. And each time the toad is surprised by a buzz or a woof (or the toe of a sneaker!), he hops to a new location farther down the road. With fun sounds, clever rhymes, and an irresistible rhythm, this is the perfect story for sharing one-on-one or in a group.

The Golden Book of Chemistry Experiments Robert Brent, 2015-10-10 **BANNED:** The *Golden Book of Chemistry Experiments* was a children's chemistry book written in the 1960s by Robert Brent and illustrated by Harry Lazarus, showing how to set up your own home laboratory and conduct over 200 experiments. The book is controversial, as many of the experiments contained in the book are now considered too dangerous for the general public. There are apparently only 126 copies of this book in libraries worldwide. Despite this, it's known as one of the best DIY chemistry books ever published. The book was a source of inspiration to David Hahn, nicknamed the Radioactive Boy Scout by the media, who tried to collect a sample of every chemical element and also built a model nuclear reactor (nuclear reactions however are not covered in this book), which led to the involvement of the authorities. On the other hand, it has also been the inspiration for many children who went on to get advanced degrees and productive chemical careers in industry or academia.

Dragon Rampant Daniel Mersey, 2015-12-20 Whether you're a nameless Dark Lord looking to conquer the known world, a Champion of Light holding out against the forces of evil or a Northern barbarian facing claimants to a stolen throne, *Dragon Rampant* allows you to bring those battles to the tabletop. Developed from the popular *Lion Rampant* system, *Dragon Rampant* is a standalone wargame that recreates the great battles of Fantasy fiction. Scenarios, army lists, and full rules for magic and monsters give players the opportunity to command unruly orc warbands, raise armies of the undead, campaign across an antediluvian world as the warchief of a barbarian tribe, or exploit the power of mighty creatures and extraordinary sorcery. An army usually consists of 6–8 units comprised of 6–12 individually based figures. These small units move and fight independently, assuming that they follow your orders rather than just doing their own thing. Command and control is just as important on the battlefield as the power of a troll chieftain or the magic of an archmage.

Dumbing Down America James R. Delisle,2021-09-03 At a time when the U.S. education system consistently lags behind its international peers, Dumbing Down America shows exactly why America can't keep up by providing a critical look at the nation's schools through the eyes of the children whose minds are languishing in countless classrooms. Filled with specific examples of how gifted children are being shortchanged by a nation that believes smart kids will succeed on their own, Dumbing Down America packs a powerful message: If we want our nation to prosper, we must pay attention to its most intelligent youth. With more than 35 years of experience working with and for gifted children, author James R. Delisle provides a template of what can and must happen in America's schools if they are to fulfill their mission of educating every child to the fullest potential. Dumbing Down America is a must-read for any individual who believes that the unfulfilled promises to gifted children must begin to be met in America's schools today, not someday.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
