Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Women Making Art Marsha Meskimmon,2012-11-12 Women have been making art for centuries, yet their work has been seen as secondary or has gone unrecognized altogether. *Women Making Art* asks why this is so, and what it would take for us to realize the extent of women's extraordinary contribution to the arts. Marsha Meskimmon mobilizes contemporary feminist thinking to reconsider how and why women have made art. She examines work by a wide range of women artists from different cultures and historical periods, including Rebecca Horn, Rachel Whiteread, Shirin Neshat and Maya Lin, emphasizing the diversity of women's art and the importance of differences between women.

Words Painting Music Todd Board,2021-04 We all have our own mythology, that is, our coherent system of meaning and value. Too often our myth remains safe, habitual, reductionist, and unexamined. In my sample-of-one experience, the most expansive and honest inner life emerges when we tire-kick our myths, and wade into a creative blank space not to find pat answers, but to interrogate our myth and see what recurs, and links, and echoes when you step away. As much as possible, this is a five-sense experience, which invites language, images, sounds, and other senses to engage and reflect each other. Occasionally, this process will politely nudge the inner life aside and generate some fairly memorable outer-life perceptions and experiences. *Words Painting Music* attempts to capture some of this flavor.

Introducing Transformational Grammar Jamal Ouhalla,1999 The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar, it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition introduces students with no previous training to Transformational Grammar. Covering the framework known as Principles and Parameters as well as the more recent framework known as Minimalism, it includes a range of new exercises, making it ideal for students at all levels.
