The Disappearing Spoon Sam Kean, 2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? *The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

DOOM Dan Pinchbeck, 2013-06-18 In December 1993, gaming changed forever. id Software's seminal shooter DOOM was released, and it shook the foundations of the medium. Daniel Pinchbeck brings together the complete story of DOOM for the first time. This book takes a look at the early days of first-person gaming and the video game studio system. It discusses the prototypes and the groundbreaking technology that drove the game forward and offers a detailed analysis of gameplay and level design. Pinchbeck also examines DOOM's contributions to wider gaming culture, such as online multiplayer and the modding community, and the first-person gaming genre, focusing on DOOM's status as a foundational title and the development of the genre since 1993. Pinchbeck draws extensively from primary data: from the game itself, from the massive fan culture surrounding the title, and from interviews with the developers who made it. This book is not only the definitive work on DOOM but a snapshot of a period of gaming history, a manifesto for a development ethos, and a celebration of game culture at its best.

Archaeology Anthropology and Interstellar Communication Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the

Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly 'unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Immigration Policy and the Terrorist Threat in Canada and the United States A. Alexander Moens, Martin Collacott, 2008 In June 2007, the Fraser Institute held a conference in Toronto, Ontario, titled, Immigration Policy, Border Controls, and the Terrorist Threat In Canada and the United States. The chapters in this volume, which arose from this conference, raise fundamental questions about weaknesses in Canada's current immigration policies and procedures. The contributors to this volume identify serious threats and weaknesses in the immigration, asylum, and border regimes from both Canadian and American perspectives. The authors are not opposed to effectively managed immigration or allowing genuine refugees who pose no security threat to enter the country through a well-vetted system. All believe that the vast majority of immigrants pose no danger, but are simply seeking to improve their freedom and prosperity. Nevertheless given the stakes raised by terrorist attacks, the entry of even a small number of potentially dangerous individuals should warrant major attention and policy review.--BOOK JACKET.

Warfare in the American Homeland Joy James, 2007-07-20 The United States has more than two million people locked away in federal, state, and local prisons. Although most of the U.S. population is non-Hispanic and white, the vast majority of the incarcerated—and policed—is not. In this compelling collection, scholars, activists, and current and former prisoners examine the sensibilities that enable a penal democracy to thrive. Some pieces are new to this volume; others are classic critiques of U.S. state power. Through biography, diary entries, and criticism, the contributors collectively assert that the United States wages war against enemies abroad and against its own people at home. Contributors consider the interning or policing of citizens of color, the activism of radicals, structural racism, destruction and death in New Orleans following Hurricane Katrina, and the FBI Counterintelligence Program designed to quash domestic dissent. Among the first-person accounts are an interview with Dhoruba Bin Wahad, a Black Panther and former political prisoner; a portrayal of life in prison by a Plowshares nun jailed for her antinuclear and antiwar activism; a discussion of the Puerto Rican Independence Movement by one of its members, now serving a seventy-year prison sentence for sedition; and an excerpt from a 1970 letter by the Black Panther George Jackson chronicling the abuses of inmates in California's Soledad Prison. *Warfare in the American Homeland* also includes the first English translation of an excerpt from a pamphlet by Michel Foucault and others. They argue that the 1971 shooting of George Jackson by prison guards was a murder premeditated in response to human-rights and justice organizing by black and brown prisoners and their supporters. Contributors. Hishaam Aidi, Dhoruba Bin Wahad (Richard Moore), Marilyn Buck, Marshall Eddie Conway, Susie Day, Daniel Defert, Madeleine Dwertman, Michel Foucault, Carol Gilbert, Sirène Harb, Rose Heyer, George Jackson, Joy James, Manning Marable, William F. Civilian Jihad M. Stephan,2009-12-07 This book examines the role of nonviolent civil resistance in challenging tyranny and promoting democratic-self rule in the greater Middle East using case studies and analyses of how religion, youth, women, technology and external actors have influenced the outcome of civil resistance in the region.

No Medium Craig Dworkin,2013-02-15 Close readings of ostensibly “blank” works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated subjects of photographs. Reexamining the famous case of John Cage's *4'33"*, Dworkin links Cage's composition to Rauschenberg's *White Paintings*, Ken Friedman's *Zen for Record* (and Nam June Paik's *Zen for Film*), and other works, offering also a “guide to further listening” that surveys more than 100 scores and recordings of “silent” music. Dworkin argues that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media: interpretive activities taking place in socially inscribed space.
