An Introduction to Modern Vehicle Design Julian Happian-Smith 2001 'An Introduction to Modern Vehicle Design' provides a thorough introduction to the many aspects of passenger car design in one volume. Starting with basic principles, the author builds up analysis procedures for all major aspects of vehicle and component design. Subjects of current interest to the motor industry, such as failure prevention, designing with modern materials, ergonomics and control systems are covered in detail, and the author concludes with a discussion on the future trends in automobile design. With contributions from both academics lecturing in motor vehicle engineering and those working in the industry, "An Introduction to Modern Vehicle Design" provides students with an excellent overview and background in the design of vehicles before they move on to specialised areas. Filling the niche between the more descriptive low level books and books which focus on specific areas of the design process, this unique volume is essential for all students of automotive engineering. Only book to cover the broad range of topics for automobile design and analysis procedures Each topic written by an expert with many years experience of the automotive industry

The American Popular Ballad of the Golden Era, 1924-1950 Allen Forte 1995 In this pathbreaking book, Allen Forte uses modern analytical procedures to explore the large repertoire of beautiful love songs written during the heyday of American musical theater, the Big Bands, and Tin Pan Alley. Covering the work of such songwriters as Jerome Kern, Irving Berlin, Cole Porter, George Gershwin, Richard Rodgers, and Harold Arlen, he seeks to illuminate this extraordinary music indigenous to America by revealing its deeper organizational characteristics. In so doing, he aims to establish it as a unique corpus of music that deserves more intensive study and appreciation by scholars and connoisseurs in the broader fields of American popular music and jazz. Expressing much of the traditional tonality associated with European music in the eighteenth and nineteenth centuries, the love songs of the Golden Age are shown to draw on a rich variety of elements--popular harmony, idiomatic lyric-writing, and Afro-American dance rhythms. His analyses of such songs as "Embraceable You" or "Yesterdays" in particular exemplify his ability to convey the sublime, unpretentious simplicity of this great music.

World Economy and World Politics, 1924-1931 Gilbert Ziebura 1990-03-09 Among specialists, this book has long been regarded as one of the most important and insightful studies of the world economy in the decade prior to its catastrophic collapse in the early 1930s. Starting with an analysis of the `Versailles` and `Washington` systems, Ziebura examines the conditions and contradictions of the mid-1920s stabilisation policy. The US is seen to have acted as a hinge between the two systems, and the political significance of the Great Depression can therefore be seen to lie in the collapse of this American `hinge` role.

Streamlined Claude Lichtenstein 1994 Streamlining is a metaphor for progress, surprising in its formal diversity and breadth of content and meaning. It is not necessarily trying to achieve maximum speed, but aims to produce the highest possible degree of effectiveness; to this extent it has remained entirely up-to-date. But as an impetus it is a historical phenomenon that peaked twice, first in the thirties and then in the fifties.

Inflation and the Merchant Economy Peter J. Lyth 1990 This study focuses on a sample of occupational groups representative of the Mittelstand in the city of Hamburg - white-collar workers, artisans, retailers, civil servants and house owners - and examines the strains imposed by the inflationary conditions on each group, seriously questioning the commonly-held interpretation of the Inflation's effects and chronology.

Electric and Hybrid Cars Curtis D. Anderson 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

Against Automobility Steffen Bohm 2006-11-29 Despite its promise of freedom and autonomy, the ubiquity of the automobile has influenced unforeseen ecological, social, and political change. In *Against Automobility*, a panel of distinguished scholars take a critical look at the contradiction of the automobile. A critical account of the impact of the car on society, which is both liberated by and reliant upon motor vehicles. Written by a panel of distinguished scholars from varying disciplines in the humanities and social sciences. Examines automobility's effect on

environmental, social, and political issues. Will be of interest to those whose research focuses on geography, politics, consumption and cultural studies, critical theory, and the sociology of objects and everyday life.
