The Rapture of the Nerds
Cory Doctorow 2012-09-04
A tale set at the end of the twenty-first century finds the planet's divided hominid population subjected to

the forces of a splintery metaconsciousness that inundates networks with plans for cataclysmic technologies, prompting an unwitting jury member to participate in a grueling decision.

Interdiction in Southern Laos, 1960-1968 Jacob Van Staaveren 2005-01-01

Throughout the War in Southeast Asia, Communist forces from North Vietnam infiltrated the isolated, neutral state of Laos. Men and supplies crossed the mountain passes and travelled along an intricate web of roads and jungle paths known as the Ho Chi Minh Trail to the Viet Cong insurgents in South Vietnam. American involvement in Laos began with photo-reconnaissance missions and, as the war in Vietnam intensified, expanded to a series of

air-ground operations from bases in Vietnam and Thailand against fixed targets and infiltration routes in southern Laos. U.S. Air Force leaders and aircrews flying interdiction missions over Laotian territory faced a unique set of challenges. Their efforts were plagued by political controversies, daunting weather, rugged terrain, a tenacious foe, and above all a bewildering array of rules of engagement limiting the effectiveness of air operations. Interdiction in Southern Laos, 1960-1968 examines this complex operational environment. Many of these issues- particularly those relevant to conducting a politically sensitive, limited war from foreign bases, with a commitment to minimizing civilian casualties-are still

relevant today and for the foreseeable future as the modern Air Force meets its responsibilities in an ever-changing global environment. Richard P. Hallion Air Force Historian

T2: Rising Storm S.M. Stirling 2009-10-13
Following the critically

praised *T2: Infiltrator*, *T2: Rising Storm* continues the bestselling Terminator adventures, reaching new heights of action, drama, and suspense. Hunted for years, Sarah and John Connor have waged a grave battle to save humanity from destruction. They and they alone can keep the apocalyptic Judgment Day—the day when sentient machines move to destroy their human creators—from occurring. Aided by Dieter von Rossbach, an ex-counterterrorism operative who will eventually be used as the physical model for the T-101 Terminator units, the Connors have sabotaged the Cyberdyne research facility and stopped a deadly I-950 Infiltrator unit from completing her mission. But the war is far from over, and now the heroes have been separated.

Severely injured—both mentally and physically—and recuperating under military surveillance, Sarah Connor must face her deepest fears...alone.

Meanwhile, von Rossbach, hunted by both the CIA and his former allies, begins a delicate mission to recruit supporters and arms support for the coming battle. Aided by a beautiful and brilliant MIT student, John Connor starts a desperate campaign across the United States and Central America to prepare an unsuspecting human race for the dark times ahead. For the original I-950 Infiltrator unit left a contingency plan—and, unbeknownst to our heroes, more Infiltrators have initiated their own clandestine operations, including the hunt to

terminate the Connors. And this time, despite all their efforts, the brave heroes may not be able to stop the future war between human and machine. Cyberdyne Corporation is not the only one with plans for the computer network, and hidden far away in a top secret military base, a fledgling Skynet takes its first steps toward sentience...and toward the rise of the machines and the termination of all human life.

Artificial Intelligence and Games Georgios N. Yannakakis 2018-02-17
This is the first textbook dedicated to explaining how artificial intelligence (AI) techniques can be used in and for games.

After introductory chapters that explain the background and key techniques in AI and games, the authors explain how to use AI to play games, to generate content for games and to model players. The book will be suitable for undergraduate and graduate courses in games, artificial intelligence, design, human-computer interaction, and computational intelligence, and also for self-study by industrial game developers and practitioners. The authors have developed a website (<http://www.gameaibook.org>) that complements the material covered in the book with up-to-date exercises, lecture slides and reading.

The Naked and the Dead
Norman Mailer 2013-10-15
Hailed as one of the finest novels to come

out of the Second World War, *The Naked and the Dead* received unprecedented critical acclaim upon its publication and has since enjoyed a long and well-deserved tenure in the American canon. This fiftieth anniversary edition features a new introduction created especially for the occasion by Norman Mailer. Written in gritty, journalistic detail, the story follows a platoon of Marines who are stationed on the Japanese-held island of Anopopei. Composed in 1948 with the wisdom of a man twice Mailer's age and the raw courage of the young man he was, *The Naked and the Dead* is representative of the best in twentieth-century American writing.

Cities Under Siege

Stephen Graham

2011-11-01 Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, Cities Under Siege traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of

Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism.'

2016-06-28 The Laundry Files' "fast-paced blend of espionage thrills, mundane office comedy and Lovecraftian horror" (SFX) continues as Hugo Award-winning author Charles Stross assigns a day trader to a permanent position on the night shift... After stumbling upon the algorithm that turned him and his fellow merchant bankers into vampires, Alex Schwartz was drafted by the Laundry, Britain's secret counter-occult agency that's humanity's first line of defense against the forces of darkness. Dependent on his new employers for

his continued existence—as Alex has no stomach for predatory blood-sucking—he has little choice but to accept his new role as an operative-in-training. For his first assignment, Alex is dispatched to Leeds to help assess the costs of renovating a 1950s Cold War bunker for use as the Laundry's new headquarters.

Unfortunately, Leeds is Alex's hometown, and the thought of breaking the news to his parents that he's left banking for the Civil Service, while hiding his undead condition, is causing him more anxiety than learning how to live as a vampire secret agent preparing to confront multiple apocalypses. Alex's only saving grace is Cassie Brewer, a drama student appearing in the local goth festival who is inexplicably attracted

to him despite his awkward personality and massive amounts of sunblock. But Cassie has secrets of her own—secrets that make Alex's nightlife behaviors seem positively normal...

in its U.S. Army

Campaigns of the Vietnam

War series, Transition,

November 1968-December

1969, by Adrian G.

Traas. The author

discusses the gradual

reduction of the U.S.

Army's involvement in

Vietnam that began after

Richard M. Nixon was

elected president in

November 1968. Even as

U.S. and South

Vietnamese forces

battled an increasingly-

elusive enemy, Army

officials stepped up

efforts to create a

South Vietnamese

military strong enough to defend their nation with only minimal support from American troops. In the spring of 1969, President Nixon announced his plan for the phased withdrawal of U.S. forces from South Vietnam, a policy quickly dubbed "Vietnamization." As the American public's support for the war continued to erode, U.S. military leaders spent the remainder of 1969 preparing for further troop reductions and the inevitable turnover of bases and equipment to South Vietnamese forces.

The Praetorian STARShip : the untold story of the Combat Talon 2001

Jerry Thigpen's study on the history of the Combat Talon is the

first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on

the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force

became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Defending Air Bases in an Age of Insurgency

Shannon Caudill 2014-08

This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The

authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield. *Sharpening the Combat Edge* Lieutenant Julian Ewell 2015-10-26 "Sharpening the Combat Edge" focuses on the use

of analysis in combat operations and concentrates on the utilization of techniques in situations with which the authors are personally familiar. It covers primarily the systematic blending of military judgment, data collection, and simple problem solving techniques as used in the 9th Infantry Division and II Field Force, Vietnam, 1968-1970. The approach is rather tentative because it was not possible in many cases to determine exactly what factors made the operations go so well. Rather the authors have laid out the most important and interesting factors in the hopes that the readers will be stimulated and perhaps decide for themselves what the critical points were.
