**Urban Inequality and Segregation in Europe and China** Gwilym Pryce, Ya Ping Wang, Yu Chen, Jingjing Shan, Houkai Wei, 2021-11-16 This open access book explores new research directions in social inequality and urban segregation. With the goal of fostering an ongoing dialogue between scholars in Europe and China, it brings together an impressive team of international researchers to shed light on the entwined processes of inequality and segregation, and the implications for urban development. Through a rich collection of empirical studies at the city, regional and national levels, the book explores the impact of migration on cities, the related problems of social and spatial segregation, and the ramifications for policy reform. While the literature on both segregation and inequality has traditionally been dominated by European and North American studies, there is growing interest in these issues in the Chinese context. Economic liberalization, rapid industrial restructuring, the enormous growth of cities, and internal migration, have all reshaped the country profoundly. What have we learned from the European and North American experience of segregation and inequality, and what insights can be gleaned to inform the burgeoning interest in these issues in the Chinese context? How is China different, both in terms of the nature and the consequences of segregation inequality, and what are the implications for future research and policy? Given the continued rise of China's significance in the world, and its recent declaration of war on poverty, this book offers a timely contribution to scholarship, identifying the core insights to be learned from existing research, and providing important guidance on future directions for policy makers and researchers.

Zibuyu, "What The Master Would Not Discuss",

according to Yuan Mei (1716 - 1798): A Collection of Supernatural Stories (2 vols) Paolo Santangelo,2013-07-04 Zibuyu, a collection of supernatural stories, is a work with different reading levels, which allows to uncover several deep trends, taboos and fantasies of late imperial intellectual circles. With translation and commentary.

Run of the Red Queen Dan Breznitz,Michael Murphree,2011-01-01 This work closely examines the strengths and weaknesses of the Chinese economic system to discover where the nation may be headed and what the Chinese experience reveals about emerging market economies.

**Cultural Evolution** Peter J. Richerson,Morten H. Christiansen,2013-11-01 Leading scholars report on current research that demonstrates the central role of cultural evolution in explaining human behavior. Over the past few decades, a growing body of research has emerged from a variety of disciplines to highlight the importance of cultural evolution in understanding human behavior. Wider application of these insights, however, has been hampered by traditional disciplinary boundaries. To remedy this, in this volume leading researchers from theoretical biology, developmental and cognitive psychology, linguistics, anthropology, sociology, religious studies, history, and economics come together to explore the central role of cultural evolution in different aspects of human endeavor. The contributors take as their guiding principle the idea that cultural evolution can provide an important integrating function across the various disciplines of the human sciences, as organic evolution does for biology. The benefits of adopting a cultural evolutionary perspective are demonstrated by contributions on social systems,

technology, language, and religion. Topics covered include enforcement of norms in human groups, the neuroscience of technology, language diversity, and prosociality and religion. The contributors evaluate current research on cultural evolution and consider its broader theoretical and practical implications, synthesizing past and ongoing work and sketching a roadmap for future cross-disciplinary efforts. Contributors Quentin D. Atkinson, Andrea Baronchelli, Robert Boyd, Briggs Buchanan, Joseph Bulbulia, Morten H. Christiansen, Emma Cohen, William Croft, Michael Cysouw, Dan Dediu, Nicholas Evans, Emma Flynn, Pieter François, Simon Garrod, Armin W. Geertz, Herbert Gintis, Russell D. Gray, Simon J. Consumer-Citizens of China Kelly Tian, Lily Dong, 2010-11-01 A PDF version of this book is available for free in open access via [www.tandfebooks.com](http://www.tandfebooks.com) as well as the OAPEN Library platform, [www.oapen.org](http://www.oapen.org). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book presents a comprehensive examination of Chinese consumer behaviour and challenges the previously dichotomous interpretation of the consumption of Western and non-Western brands in China. The dominant position is that

Chinese consumers are driven by a desire to imitate the lifestyles of Westerners and thereby advance their social standing locally. The alternative is that consumers reject Western brands as a symbolic gesture of loyalty to their nation-state. Drawing from survey responses and in depth interviews with Chinese consumers in both rural and urban areas, Kelly Tian and Lily Dong find that consumers situate Western brands within select historical moments. This embellishment attaches historical meanings to Western brands in ways that render them useful in asserting preferred visions of the future China. By highlighting how Western brands are used in contests for national identity, *Consumer-Citizens of China* challenges the notion of the patriot's paradox and answers scholars' questions as to whether Chinese nationalists today allow for a Sino-Western space where the Chinese can love China without hating the West. *Consumer-Citizens of China* will be of interest to students and scholars of business studies, Chinese and Asian Studies and Political Science. Kelly Tian is Professor of Marketing and holds the Anderson Chair of Business at New Mexico State University. Lily Dong is Associate Professor of Marketing at the University of Alaska at Fairbanks.

**Precarious Creativity** Michael Curtin, Kevin Sanson, 2016-02-17 *Precarious Creativity* examines the seismic changes confronting media workers in an age of globalization and corporate conglomeration. This pathbreaking anthology peeks behind the hype and supposed glamor of screen media industries to reveal the intensifying pressures and challenges workers face. The authors take on crucial issues and provide insightful case studies of workplace dynamics regarding creativity, collaboration, exploitation, and cultural difference. Furthermore, they investigate working conditions and

organizing efforts on all six continents, offering comprehensive analysis of contemporary screen media labor in places such as Lagos, Prague, Hollywood, and Hyderabad, across a range of job categories that includes visual effects, production services, and adult entertainment. With contributions from John Caldwell, Vicki Mayer, Herman Gray, Tejaswini Ganti, and others, this collection offers timely critiques of media globalization and broader debates about labor, creativity, and precarity. "Every case study is an eye-opener, and no other book comes close in assessing the plight of creative workers in the era of global conglomerate Hollywood." -THOMAS SCHATZ, University of Texas at Austin "A corrective to previous, U.S.-centric attempts to understand the global media economy by offering a bracing look at the dark underbelly of life for most media workers today." -DENISE MANN, University of California, Los Angeles "A balanced and comprehensive portrayal of the reshaping of the contours of work and industry organization under the twin circumstances of digital disruption and a globalizing media system." -TOM O'REGAN, The University of Queensland

MICHAEL CURTIN is a professor of Film and Media Studies at University of California, Santa Barbara. KEVIN SANSON is a Lecturer in Entertainment Industries at Queensland University of Technology in Australia.

**Trying Not to Try** Edward Slingerland,2014-03-04 A deeply original exploration of the power of spontaneity—an ancient Chinese ideal that cognitive scientists are only now beginning to understand—and why it is so essential to our well-being Why is it always hard to fall asleep the night before an important meeting? Or be charming and relaxed

on a first date? What is it about a politician who seems wooden or a comedian whose jokes fall flat or an athlete who chokes? In all of these cases, striving seems to backfire. In *Trying Not To Try*, Edward Slingerland explains why we find spontaneity so elusive, and shows how early Chinese thought points the way to happier, more authentic lives. We've long been told that the way to achieve our goals is through careful reasoning and conscious effort. But recent research suggests that many aspects of a satisfying life, like happiness and spontaneity, are best pursued indirectly. The early Chinese philosophers knew this, and they wrote extensively about an effortless way of being in the world, which they called *wu-wei* (ooo-way). They believed it was the source of all success in life, and they developed various strategies for getting it and hanging on to it. With clarity and wit, Slingerland introduces us to these thinkers and the marvelous characters in their texts, from the butcher whose blade glides effortlessly through an ox to the wood carver who sees his sculpture simply emerge from a solid block. Slingerland uncovers a direct line from *wu-wei* to the Force in *Star Wars*, explains why *wu-wei* is more powerful than flow, and tells us what it all means for getting a date. He also shows how new research reveals what's happening in the brain when we're in a state of *wu-wei*—why it makes us happy and effective and trustworthy, and how it might have even made civilization possible. Through stories of mythical creatures and drunken cart riders, jazz musicians and Japanese motorcycle gangs, Slingerland effortlessly blends Eastern thought and cutting-edge science to show us how we can live more fulfilling lives. *Trying Not To Try* is mind-expanding and deeply pleasurable, the perfect antidote to our striving modern culture.

**Systems** Dorina C. Petriu, Nicolas Rouquette, Øystein Haugen, 2010-09-27 This book is part II of a two-volume work that contains the refereed proceedings of the 13th International Conference on Model Driven Engineering Languages and Systems, MODELS 2010, held in Oslo, Norway, during October 3-8, 2010. The 54 revised full papers presented were carefully reviewed and selected from 252 submissions. The papers are organized in topical sections on genericity and generalization, model migration and incremental manipulation, modeling model transformations, verifying consistency and conformance, taming modeling complexity, modeling user-system interaction, model-driven quality assurance, managing variability, multi-modeling approaches, distributed/embedded software development, (de)composition and refactoring, model change, (meta)models at runtime, requirements engineering, slicing and model transformations, incorporating quality concerns in MDD, model-driven engineering in practice, and modeling architecture.

**Participatory Design** Susanne Bødker, Christian Dindler, Ole Sejer Iversen, 2022-05-31 This book introduces Participatory Design to researchers and students in Human-Computer Interaction (HCI). Grounded in four strong commitments, the book discusses why and how Participatory Design is important today. The book aims to provide readers with a practical resource, introducing them to the central practices of Participatory Design research as well as to key references. This is done from the perspective of Scandinavian Participatory Design. The book is meant for students, researchers, and practitioners who are interested in Participatory Design for research studies, assignments in HCI classes, or as part of an industry project. It is structured around 11 questions arranged in 3

main parts that provide the knowledge needed to get started with practicing Participatory Design. Each chapter responds to a question about defining, conducting, or the results of carrying out Participatory Design. The authors share their extensive experience of Participatory Design processes and thinking by combining historical accounts, cases, how-to process descriptions, and reading lists to guide further readings so as to grasp the many nuances of Participatory Design as it is practiced across sectors, countries, and industries.

Automotive User Interfaces Gerrit Meixner, Christian Müller, 2017-02-27 This book focuses on automotive user interfaces for in-vehicle usage, looking at car electronics, its software of hidden technologies (e.g., ASP, ESP), comfort functions (e.g., navigation, communication, entertainment) and driver assistance (e.g., distance checking). The increased complexity of automotive user interfaces, driven by the need for using consumer electronic devices in cars as well as autonomous driving, has sparked a plethora of new research within this field of study. Covering a broad spectrum of detailed topics, the authors of this edited volume offer an outstanding overview of the current state of the art; providing deep insights into usability and user experience, interaction techniques and technologies as well as methods, tools and its applications, exploring the increasing importance of Human-Computer-Interaction (HCI) within the automotive industry Automotive User Interfaces is intended as an authoritative and valuable resource for professional practitioners and researchers alike, as well as computer science and engineering students who are interested in automotive interfaces.

Interaction Design and Children Juan Pablo Hourcade, 2008 Interaction Design and Children surveys

the research on children's cognitive and motor development, safety issues related to technologies and design methodologies and principles. It also provides an overview of current research trends in the field of interaction design and children and identifies challenges for future research.

*Religion in Human Evolution* Robert N.

Bellah, 2011-09-15 This ambitious book probes our biological past to discover the kinds of lives that human beings have imagined were worth living. Bellah's theory goes deep into cultural and genetic evolution to identify a range of capacities (communal dancing, storytelling, theorizing) whose emergence made religious development possible in the first millennium BCE.

**State and Religion in China** Anthony C. Yu, 2005 In *State and Religion in China*, Anthony Yu takes a fresh look at Chinese religion and its relation to politics. He argues, against those who claim that Chinese politics has been traditionally secular, or even that the Chinese traditionally had no religion that religion has deep roots in the Chinese past, and that the Chinese state has from its creation always interfered in religious matters.

*Photogrammetric Computer Vision* Wolfgang

Förstner, Bernhard P. Wrobel, 2016-10-04 This textbook offers a statistical view on the geometry of multiple view analysis, required for camera calibration and orientation and for geometric scene reconstruction based on geometric image features. The authors have backgrounds in geodesy and also long experience with development and research in computer vision, and this is the first book to present a joint approach from the converging fields of photogrammetry and computer vision. Part I of the book provides an introduction to estimation theory, covering aspects such as Bayesian estimation, variance components, and sequential

estimation, with a focus on the statistically sound diagnostics of estimation results essential in vision metrology. Part II provides tools for 2D and 3D geometric reasoning using projective geometry. This includes oriented projective geometry and tools for statistically optimal estimation and test of geometric entities and transformations and their relations, tools that are useful also in the context of uncertain reasoning in point clouds. Part III is devoted to modelling the geometry of single and multiple cameras, addressing calibration and orientation, including statistical evaluation and reconstruction of corresponding scene features and surfaces based on geometric image features. The authors provide algorithms for various geometric computation problems in vision metrology, together with mathematical justifications and statistical analysis, thus enabling thorough evaluations. The chapters are self-contained with numerous figures and exercises, and they are supported by an appendix that explains the basic mathematical notation and a detailed index. The book can serve as the basis for undergraduate and graduate courses in photogrammetry, computer vision, and computer graphics. It is also appropriate for researchers, engineers, and software developers in the photogrammetry and GIS industries, particularly those engaged with statistically based geometric computer vision methods.

*Optical Design for Biomedical Imaging* Rongguang Liang, 2010 Designing an efficient imaging system for biomedical optics requires a solid understanding of the special requirements of the optical systems for biomedical imaging and the optical components used in the systems.

However, a lack of reference books on optical design (imaging and illumination) for biomedical imaging has led to some inefficient systems. This book fills the gap between biomedical optics and optical design by addressing the fundamentals of biomedical optics and optical engineering, and biomedical imaging systems. The first half provides a brief introduction to biomedical optics and then covers the fundamentals of optics, optical components, light sources, detectors, optical imaging system design, and illumination system design. This also includes important issues related to biomedical imaging, such as autofluorescence from optical materials. The second half of the text covers various biomedical imaging techniques and their optical systems, along with design examples.
