Raising Red Flags N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

The Craft of Scientific Presentations Michael Alley, 2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Optical Design for Biomedical Imaging Rongguang Liang, 2010 Designing an efficient imaging system for biomedical optics requires a solid understanding of the special requirements of the optical systems for biomedical imaging and the optical components used in the systems. However, a lack of reference books on optical design (imaging and illumination) for biomedical imaging has led to some inefficient systems. This book fills the gap between biomedical optics and optical design by addressing the fundamentals of biomedical optics and optical engineering, and biomedical imaging systems. The first half provides a brief introduction to biomedical optics and then covers the fundamentals of optics, optical components, light sources, detectors, optical imaging system design, and illumination system design. This also includes important issues related to biomedical imaging, such as autofluorescence from optical materials. The second half of the text covers various biomedical imaging techniques and their optical systems, along with design examples.

Introduction to Micromachining Vinod Kumar Jain, 2014-05-29 Introduction to Micromachining discusses the working principles, the laboratory models developed and the applications of different individual micromachining processes. It basically deals with two classes of u-machining processes: First category deals with those processes used for shaping and sizing of microproducts and macroproducts, for example, electrochemical micromachining, electrodischarge micromachining, laser beam micromachining, diamond turning etc. The

second class of u-machining processes includes u-/ nano-finishing techniques useful for both u and macro products. These processes include abrasive flow machining, magnetic abrasive finishing, magnetic float polishing, etc. This book is an outcome of joint efforts by a group of Professors and Researchers from the renowned institutions from different countries, involved in high level research in related areas. They have written chapters in this book useful for the undergraduate and postgraduate students as a text book, and as a reference book for those involved in the research work in u-machining area. NEW TO THE SECOND EDITION: Eight new chapters Review questions to help both the teachers and students Solved problems, objective questions, multiple choice questions and short questions These facets of the second edition of the book make it a suitable textbook.
