The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to

respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

Mobility, shock, and firepower: The Emergence of the U.S. Army's Armor Branch, 1917-1945 Robert S. Cameron, 2008 From the Preface: The following pages provide a narrative analysis of the U.S. Army's development of armored organizations and their related doctrine, materiel, and training activities in the period 1917-1945. This period marked the emergence of clear principles of armored warfare that became the underpinning of the Armor Branch, influencing armored developments long after World War II ended. A unique style of mounted maneuver combat emerged that reflected a mix of tradition and innovation. In the process, American military culture changed, particularly through the adoption of combined-arms principles. Conversely, political actions, budgetary considerations, and senior leadership decisions also shaped the course of armor development. The emergence of an American armored force involved more than simply tank development. It included the creation of an armored division structure steeped in

combined-arms principles, organizational flexibility, and revolutionary command and control processes. Parallel developments included the establishment of specialized units to provide antitank, reconnaissance, and infantry support capabilities. Several Army branches played a role in determining the precise path of armored development, and one of them-the Cavalry-became a casualty as a result.

Bringing Order to Chaos Peter J Schifferle Editor,Peter Schifferle,2018-10-12 Volume 2, Bringing Order to Chaos: Combined Arms Maneuver in Large Scale Combat Operations, opens a dialogue with the Army. Are we ready for the significantly increased casualties inherent to intensive combat between large formations, the constant paralyzing stress of continual contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight?

U.S. Marines in Battle Timothy S. McWilliams,Nicolas J.

Schlosser, U. S. Marine Corps History Division, 2014-07-23 This is a study of the Second Battle of Fallujah, also known as Operation Al-Fajr and Operation Phantom Fury. Over the course of November and December 2004, the I Marine Expeditionary Force conducted a grueling campaign to clear the city of Fallujah of insurgents and end its use as a base for the anticoalition insurgency in western Iraq. The battle involved units from the Marine Corps, Army, and Iraqi military and constituted one of the largest engagements of the Iraq War. The study is based on interviews conducted by Marine Corps History Division field historians of battle participants and archival material. The book will be of primary interest to Marines, other service members, policy makers, and the faculty and students at the service schools and academies. Historians, veterans, high school through university history departments and students as well as libraries may be interested in this book as well. With full color maps and photographs.

The Targeter Nada Bakos, 2019-06-04 A CIA analyst's revealing and utterly engrossing account of the world of high-stakes foreign intelligence and her role within the campaign to stop top-tier targets inside Al-Qaida (Joby Warrick). In 1999, 30-year-old Nada Bakos moved from her lifelong home in Montana to Washington, D.C., to join the CIA. Quickly realizing her affinity for intelligence work, Nada was determined to rise through the ranks

of the agency first as an analyst and then as a Targeting Officer, eventually finding herself on the frontline of America's war against Islamic extremists. In this role, Nada was charged with determining if Iraq had a relationship with 9/11 and Al-Qaida, and finding the mastermind behind this terrorist activity: Abu Musab al-Zarqawi. Her team's analysis stood the test of time, but it was not satisfactory for some members of the Administration. In a tight, tension-packed narrative that takes the reader from Langley deep into Iraq, Bakos reveals the inner workings of the Agency and the largely hidden world of intelligence gathering post 9/11. Entrenched in the world of the CIA, Bakos, along with her colleagues, focused on leading U.S. Special Operations Forces to the doorstep of one of the world's most wanted terrorists. Filled with on-the-ground insights and poignant personal anecdotes, *The Targeter* shows us the great personal sacrifice that comes with intelligence work. This is Nada's story, but it is also an intimate chronicle of how a group of determined, ambitious men and women worked tirelessly in the heart of the CIA to ensure our nation's safety at home and abroad.

The Warrior Ethos and Soldier Combat Skills

Headquarters Department of the Army, 2017-12-19 Modern combat is chaotic, intense, and shockingly destructive. In your first battle, you will experience the confusing and often terrifying sights, sounds, smells, and dangers of the battlefield--but you must learn to survive and win despite them. You are part of a well-trained team, backed by the most powerful combined arms force, and the most modern technology in the world. You must keep faith with your fellow Soldiers, remember your training, and do your duty to the best of your ability. U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division,2017-02-05 This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also

cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the three-block war. Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' surge strategy in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story *How We Lost the War We Won*. In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the

Afghan mission from the Army. . . .
