Science and Decisions National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Improving Risk Analysis Approaches Used by the U.S. EPA, 2009-03-24 Risk assessment has become a dominant public policy tool for making choices, based on limited resources, to protect public health and the environment. It has been instrumental to the mission of the U.S. Environmental Protection Agency (EPA) as well as other federal agencies in evaluating public health concerns, informing regulatory and technological decisions, prioritizing research needs and funding, and in developing approaches for cost-benefit analysis. However, risk assessment is at a crossroads. Despite advances in the field, risk assessment faces a number of significant challenges including lengthy delays in making complex decisions; lack of data leading to significant uncertainty in risk assessments; and many chemicals in the marketplace that have not been evaluated and emerging agents requiring assessment. *Science and Decisions* makes practical scientific and technical recommendations to address these challenges. This book is a complement to the widely used 1983 National Academies book, *Risk Assessment in the Federal Government* (also known as the Red Book). The earlier book established a framework for the concepts and conduct of risk assessment that has been adopted by numerous expert committees, regulatory agencies, and public health institutions. The new book embeds these concepts within a broader framework for risk-based decision-making. Together, these are essential references for those working in the regulatory and public health fields.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational

design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Twelve Years a Slave Solomon Northup, 2013 Film
in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was

a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Towards a Nordic textile strategy David Palm, Maria Elander, David Watson, Nikola Kiørboe, Hanna Salmenperä, Helena Dahlbo, Katja Moliis, Kari-Anne Lyng, Clara Valente, Stefán Gíslason, Haben Tekie, Tomas Rydberg, 2014 This report is the primary outcome from Part I of the project "Towards a Nordic textile strategy - Collection, sorting, reuse and recycling of textiles" initiated by the Nordic Waste Group (NAG). The report for Part 2 will be published in December 2014. This report summarizes the work carried out in 2013. The three subreports will be the basis for the work to be performed in 2014. The reports for 2013 are:

- International market survey of textile flows in the Nordic region and the market for collection, sorting, preparing for reuse, reselling and waste management of textiles.
- Collection and sorting systems A total of 19 collection systems are compared for collection flows, contamination levels, cost, suitability of collected textile and availability for the consumer. Four sorting systems are described.
- Technology review of sorting and recycling of textiles that describes available and future technology.

The report is part of the Nordic Prime Ministers' overall green growth initiative: "The Nordic Region - leading in green growth." Read more in the web magazine "Green Growth the Nordic Way" at www.norden.org/greengrowth.

Cultural Industries and the Production of Culture
Dominic Power, Allen J. Scott, 2004-08-05 Cutting-edge perspectives

on the functioning of cultural industries are offered in this volume, which explores the media, entertainment and artistic sectors. Contributors place these industries in the new economy and suggest ways in which they can contribute to urban and regional economic and social development.

Drawing Architecture ,2013-10-18 We are in the second decade of the 21st century and, as with most things, the distinction between digital and analogue has become tired and inappropriate. This is also true in the world of architectural drawing, which paradoxically is enjoying a renaissance supported by the graphic dexterity of the computer. This new fecundity has produced a contemporary glut of stunning architectural drawings and representations that could rival the most recent outpouring of architectural vision in the 1960s, 1970s and 1980s. Indeed, there is much to learn by comparing the then and the now. The contemporary drawing is often about its ability to describe the change, fluctuations and mutability of architecture in relation to the virtual/real 21st-century continuum of architectural space. Times have changed, and the status of the architectural drawing must change with them. This reassessment is well overdue, and this edition of AD will be the catalyst for such re-examination. Features the work of: Pascal Bronner, Bryan Cantley, Peter Cook, Perry Kulper, CJ Lim, Tom Noonan, Dan Slavinsky, Neil Spiller, Peter Wilson, Nancy Wolf, Lebbeus Woods and Mas Yendo. Contributors include: Nic Clear, Mark Garcia, Simon Herron and Mark Morris.

Animation and Advertising Malcolm Cook,Kirsten Moana Thompson,2019-12-17 Throughout its history, animation has been fundamentally shaped by its application to promotion and marketing, with animation playing a vital role in advertising history. In individual case study chapters this book addresses, among others, the role of promotion and advertising for anime, Disney, MTV, Lotte Reiniger, Pixar and George Pal, and highlights American, Indian, Japanese, and European examples. This

collection reviews the history of famous animation studios and artists, and rediscovers overlooked ones. It situates animated advertising within the context of a diverse intermedial and multi-platform media environment, influenced by print, radio and digital practices, and expanding beyond cinema and television screens into the workplace, theme park, trade expo and urban environment. It reveals the part that animation has played in shaping our consumption of particular brands and commodities, and assesses the ways in which animated advertising has both changed and been changed by the technologies and media that supported it, including digital production and distribution in the present day. Challenging the traditional privileging of art or entertainment over commercial animation, *Animation and Advertising* establishes a new and rich field of research, and raises many new questions concerning particular animation and media histories, and our methods for researching them.

Recycling of Polymers Raju Francis, 2016-12-19 *Recycling of Polymers* This timely reference on the topic is the only book you need for a complete overview of recyclable polymers. Following an introduction to various polymer structures and their resulting properties, the main part of the book deals with different methods of recycling. It discusses in detail the recycling of such common polymers as polyethylene, polypropylene and PET, as well as rubbers, fibers, engineering polymers, polymer blends and composites. The whole is rounded off with a look at future technologies and the toxicological impact of recycled polymers. An indispensable reference source for those working in the field, whether in academia or industry, and whether newcomers or advanced readers.

Sounds and the City B. Lashua, K. Spracklen, S. Wagg, 2014-05-27 This book explores the ways in which Western-derived music connects with globalization, hybridity, consumerism and the flow of cultures. Both as local terrain and as global crossroads, cities remain fascinating spaces of cultural

contestation and meaning-making via the composing, playing, recording and consumption of popular music.

The Book of Pook Pook,2018-03-19 The complete collection of writings by the legend himself!A few years ago there was a man who posted on a PUA forum called So Suave and had his own blog called Pook's Mill. His basic message was that the PUA techniques were too simple, and focused on external manipulations, and focusing on others rather than focusing on yourself and your own masculinity.Sadly Pook disappeared from the scene, but his teachings live on in this ebook.

Use of Recycled Plastics in Eco-efficient Concrete Fernando Pacheco-Torgal,Jamal Khatib,Francesco Colangelo,Rabin Tuladhar,2018-11-21 Use of Recycled Plastics in Eco-efficient Concrete looks at the processing of plastic waste, including techniques for separation, the production of plastic aggregates, the production of concrete with recycled plastic as an aggregate or binder, the fresh properties of concrete with plastic aggregates, the shrinkage of concrete with plastic aggregates, the mechanical properties of concrete with plastic aggregates, toughness of concrete with plastic aggregates, modulus of elasticity of concrete with plastic aggregates, durability of concrete with plastic aggregates, concrete plastic waste powder with enhanced neutron radiation shielding, and more, thus making it a valuable reference for academics and industrial researchers. Describes the main types of recycled plastics that can be applied in concrete manufacturing Presents, for the first time, state-of-the art knowledge on the properties of conventional concrete with recycled plastics Discusses the technological challenges for concrete manufactures for mass production of recycled concrete from plastic waste

Revolutionaries at Sony Reiji Asakura,2000 This is the story of Ken Kutaragi and how he gathered a team of colleagues and used corporate resources to bring his dream to fruition. It examines his passion for a change in technology, his work to sell

the concept and how he kept the project alive.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Drawing Parallels Ray Lucas,2019-04-29 Drawing Parallels

expands your understanding of the workings of architects by looking at their work from an alternative perspective. The book focuses on parallel projections such as axonometric, isometric, and oblique drawings. Ray Lucas argues that by retracing the marks made by architects, we can begin to engage more directly with their practice as it is only by redrawing the work that hidden aspects are revealed. The practice of drawing offers significantly different insights, not easily accessible through discourse analysis, critical theory, or observation. Using James Stirling, JJP Oud, Peter Eisenman, John Hejduk, and Cedric Price as case studies, Lucas highlights each architect's creative practices which he analyses with reference to Bergson's concepts of temporality and creativity, discussing the manner in which creative problems are explored and solved. The book also draws on a range of anthropological ideas including skilled practice and enchantment in order to explore why axonometrics are important to architecture and questions the degree to which the drawing convention influences the forms produced by architects. With 60 black-and-white images to illustrate design development, this book would be an essential read for academics and students of architecture with a particular interest in further understanding the inner workings of the architectural creative process.

Fire in the Ashes Jonathan Kozol, 2013-09-03 In this powerful and culminating work about a group of inner-city children he has known for many years, Jonathan Kozol returns to the scene of his previous prize-winning books, and to the children he has vividly portrayed, to share with us their fascinating journeys and unexpected victories as they grow into adulthood. For nearly fifty years, Jonathan has pricked the conscience of his readers by laying bare the savage inequalities inflicted upon children for no reason but the accident of being born to poverty within a wealthy nation. But never has his intimate acquaintance with his subjects been more apparent, or more stirring, than in *Fire in the Ashes*, as Jonathan tells the stories of young men and women who have

come of age in one of the most destitute communities of the United States. Some of them never do recover from the battering they undergo in their early years, but many more battle back with fierce and often jubilant determination to overcome the formidable obstacles they face. As we watch these glorious children grow into the fullness of a healthy and contributive maturity, they ignite a flame of hope, not only for themselves but also for our society.

Sissy Dreams: From Boyfriend to Girlfriend Paul Zante, Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

Overcoming School Refusal Joanne Garfi, 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Ectogenesis Scott Gelfand, John R. Shook, 2006 This book raises many moral, legal, social, and political, questions related to possible development, in the near future, of an artificial womb for

human use. Is ectogenesis ever morally permissible? If so, under what circumstances? Will ectogenesis enhance or diminish women's reproductive rights and/or their economic opportunities? These are some of the difficult and crucial questions this anthology addresses and attempts to answer.
