Crossing Design Boundaries Paul Rodgers, Libby Brodhurst, Duncan Hepburn, 2006-02-01 This book presents over 100 papers from the 3rd Engineering & Product Design Education International Conference dedicated to the subject of exploring novel approaches in product design education. The theme of the book is Crossing Design Boundaries which reflects the editors' wish to incorporate many of the disciplines associated with, and integral to, modern product design and development pursuits. Crossing Design Boundaries covers, for example, the conjunction of anthropology and design, the psychology of design products, the application of soft computing in wearable products, and the utilisation of new media and design and how these can be best exploited within the current product design arena. The book includes discussions concerning product design education and the cross-over into other well established design disciplines such as interaction design, jewellery design, furniture design, and exhibition design which have been somewhat under represented in recent years. The book comprises a number of sections containing papers which cover highly topical and relevant issues including Design Curriculum Development, Interdisciplinarity, Design Collaboration and Team Working, Philosophies of Design Education, Design Knowledge, New Materials and New Technologies in Design, Design Communication, Industrial Collaborations and Working with Industry, Teaching

and Learning Tools, and Design Theory.

Computation and Human Experience Philip Agre, 1997-07-28 By paying close attention to the metaphors of artificial intelligence and their consequences for the field's patterns of success and failure, this text argues for a reorientation of the field away from thought and toward activity. It offers a critical reconstruction of AI research.

The Art of Critical Making Rosanne Somerson, Mara Hermano, 2013-09-11 Describes the world's leading approach to art and design taught at Rhode Island School of Design At Rhode Island School of Design students are immersed in a culture where making questions, ideas, and objects, using and inventing materials, and activating experience all serve to define a form of critical thinking—albeit with one's hands—i.e. critical making. The Art of Critical Making, by RISD faculty and staff, describes fundamental aspects of RISD's approach to critical making and how this can lead to innovation. The process of making taught at RISD is deeply introspective, passionate, and often provocative. This book illuminates how RISD nurtures the creative process, from brief or prompt to outcome, along with guidance on the critical questions and research that enable making great works of art and design. Explores the conceptual process, idea research, critical questions, and iteration that RISD faculty employ to educate students to generate thoughtful work Authors are from the faculty and staff of the Rhode Island School of Design, which consistently

ranks as the number one fine arts and design college in the United States The Art of Critical Making shows you how context, materials, thought processes, and self-evaluation are applied in this educational environment to prepare creative individuals to produce dynamic, memorable, and meaningful works.

Social Science, Technical Systems, and Cooperative Work Geoffrey Bowker, Susan Leigh Star, Les Gasser, William Turner, 2014-05-12 This book is the first to directly address the question of how to bridge what has been termed the great divide between the approaches of systems developers and those of social scientists to computer supported cooperative work--a question that has been vigorously debated in the systems development literature. Traditionally, developers have been trained in formal methods and oriented to engineering and formal theoretical problems; many social scientists in the CSCW field come from humanistic traditions in which results are reported in a narrative mode. In spite of their differences in style, the two groups have been cooperating more and more in the last decade, as the people problems associated with computing become increasingly evident to everyone. The authors have been encouraged to examine, rigorously and in depth, the theoretical basis of CSCW. With contributions from field leaders in the United Kingdom, France, Scandinavia, Mexico, and the United States, this volume offers an exciting overview of the cutting edge of research and theory. It constitutes a solid foundation for the rapidly coalescing field of social informatics.

Divided into three parts, this volume covers social theory, design theory, and the sociotechnical system with respect to CSCW. The first set of chapters looks at ways of rethinking basic social categories with the development of distributed collaborative computing technology-- concepts of the group, technology, information, user, and text. The next section concentrates more on the lessons that can be learned at the design stage given that one wants to build a CSCW system incorporating these insights--what kind of work does one need to do and how is understanding of design affected? The final part looks at the integration of social and technical in the operation of working sociotechnical systems. Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the great divide not only should be a thing of the past, it should never have existed in the first place.

MoneyLab Reader 2. Overcoming the Hype Inte Gloerich, Geert Lovink, Patrick de Vries, 2018

Evil Media Matthew Fuller, Andrew Goffey, 2012-08-17 A philosophical manual of media power for the network age. Evil Media develops a philosophy of media power that extends the concept of media beyond its tried and trusted use in the games of meaning, symbolism, and truth. It addresses the gray zones in which media exist as corporate work systems, algorithms and data structures, twenty-first century self-improvement manuals, and pharmaceutical techniques. Evil Media invites the reader to explore and understand the abstract infrastructure of the present day. From

search engines to flirting strategies, from the value of institutional stupidity to the malicious minutiae of databases, this book shows how the devil is in the details. The title takes the imperative "Don't be evil" and asks, what would be done any differently in contemporary computational and networked media were that maxim reversed. Media here are about much more and much less than symbols, stories, information, or communication: media do things. They incite and provoke, twist and bend, leak and manage. In a series of provocative stratagems designed to be used, *Evil Media* sets its reader an ethical challenge: either remain a transparent intermediary in the networks and chains of communicative power or become oneself an active, transformative medium.

Lucky Hans and Other Merz Fairy Tales Kurt Schwitters, 2009 Kurt Schwitters revolutionized the art world in the 1920s with his Dadaist Merz collages, theater performances, and poetry. But at the same time he was also writing extraordinary fairy tales that were turning the genre upside down and inside out. *Lucky Hans and Other Merz Fairy Tales* is the first collection of these subversive, little-known stories in any language and the first time all but a few of them have appeared in English. Translated and introduced by Jack Zipes, one of the world's leading authorities on fairy tales, this book gathers thirty-two stories written between 1925 and Schwitters's death in 1948--including a complete English-language recreation of *The Scarecrow*, a children's book illustrated with avant-garde typography that Schwitters created with Kate Steinitz and De Stijl

founder Theo van Doesburg. *Lucky Hans and Other Merz Fairy Tales* also includes brilliant new illustrations that evoke the 1920s, 1930s, and 1940s. Schwitters wrote these darkly humorous, satirical, and surreal tales at a time when traditional German fairy tales were being co-opted by the Nazis. Filled with sharp critiques of German life during the Weimar and early Nazi eras, Schwitters's tales are rich with absurdist events and insist that not everyone--and perhaps not anyone--lives happily ever after. In *Lucky Hans*, the starving protagonist tries to catch a rabbit only to have it shed its fur like a coat and run off naked into the forest. In other tales, a sarcastic gypsy stands in for a fairy godmother and an army recruit is arrested for growing to monstrous size. *Lucky Hans and Other Merz Fairy Tales* is a delightfully strange and surprising book.

C'Lick Me Katrien Jacobs, 2007 *C'Lick Me: A Netporn Studies Reader* is an anthology that collects the best material from two years of debate from The Art and Politics of Netporn 2005 conference to the 2007 C'Lick Me festival. The C'Lick Me reader opens the field of 'Internet pornography'. Based on non-conventional approaches and mixing academics, artists and activists, it reclaims a critical post-enthusiastic, post-censorship perspective on netporn, a dark field that has been dominated thus far by dodgy commerce and filtering. The C'Lick Me reader covers the rise of the netporn society from the Usenet underground to the blogosphere, analyses economic data and search engine traffic, compares sex work

with the work of fantasy, disability and accessibility. The reader also expands the notion of digital desire beyond the predictable boundaries of the porn debate and depicts a broader libidinal spectrum ranging from fetish subcultures to digital alienation, from code pornography to war pornography. *C'Lick Me* concludes by re-contextualising queer discourse into a post-porn scenario.

Critical Vehicles Krzysztof Wodiczko, 1999

Critical Vehicles is the first book in English to collect Wodiczko's own writings on his projects. Wodiczko has stated that his principal artistic concern is the displacement of traditional notions of community and identity in the face of rapidly expanding technologies and cultural miscommunication. In these writings he addresses such issues as urbanism, homelessness, immigration, alienation, and the plight of refugees. Fusing wit and sophisticated political insight, he offers the artistic means to help heal the damages of uprootedness and other contemporary troubles.

Adversarial Design Carl DiSalvo, 2015-08-21 An exploration of the political qualities of technology design, as seen in projects that span art, computer science, and consumer products. In *Adversarial Design*, Carl DiSalvo examines the ways that technology design can provoke and engage the political. He describes a practice, which he terms "adversarial design," that uses the means and forms of design to challenge beliefs, values, and what is taken to be fact. It is not simply applying design to politics—attempting to improve

governance for example, by redesigning ballots and polling places; it is implicitly contestational and strives to question conventional approaches to political issues. DiSalvo explores the political qualities and potentials of design by examining a series of projects that span design and art, engineering and computer science, agitprop and consumer products. He views these projects—which include computational visualizations of networks of power and influence, therapy robots that shape sociability, and everyday objects embedded with microchips that enable users to circumvent surveillance—through the lens of agonism, a political theory that emphasizes contention as foundational to democracy. DiSalvo's illuminating analysis aims to provide design criticism with a new approach for thinking about the relationship between forms of political expression, computation as a medium, and the processes and products of design.

Open Design Now Bas van Abel, 2011 Digital information about physical products and the availability of production tools and facilities transforms design into an open discipline

Critical Point of View Geert Lovink, Nathaniel Tkacz, 2011 For millions of internet users around the globe, the search for new knowledge begins with Wikipedia. The encyclopedia's rapid rise, novel organization, and freely offered content have been marveled at and denounced by a host of commentators. This book moves beyond unflagging praise, well-worn facts, and questions about its reliability and accuracy, to unveil the complex, messy, and controversial realities of a

distributed knowledge platform. The essays, interviews and artworks brought together in this reader form part of the overarching 'Critical Point of View' research initiative, which began with a conference in Bangalore (January 2010), followed by events in Amsterdam (March 2010) and Leipzig (September 2010). With an emphasis on theoretical reflection, cultural difference and indeed, critique, contributions to this collection ask: What values are embedded in Wikipedia's software? On what basis are Wikipedia's claims to neutrality made?

Heal Your Knees Robert L. Klapper, Lynda Huey, 2004-07-25 Put an end to knee pain! An esteemed surgeon and a water therapy expert team up to tell you the essentials about your knees, how to get them back into shape, and how to prevent further pain and injury. Through careful explanation, they examine each part of the healing process—from basic function to long-term exercises—guiding you to a pain-free life. With detailed information on a variety of healing options, you will learn how to make the right decisions for your knees, understand when and why surgery is appropriate, and how simple exercise in your living room and in the pool can speed the post-surgical healing process.

Hertzian Tales Anthony Dunne, 2008-09-26 How design can improve the quality of our everyday lives by engaging the invisible electromagnetic environment in which we live. As our everyday social and cultural experiences are increasingly

mediated by electronic products—from intelligent toasters to iPods—it is the design of these products that shapes our experience of the electrosphere in which we live. Designers of electronic products, writes Anthony Dunne in *Hertzian Tales*, must begin to think more broadly about the aesthetic role of electronic products in everyday life. Industrial design has the potential to enrich our daily lives—to improve the quality of our relationship to the artificial environment of technology, and even, argues Dunne, to be subverted for socially beneficial ends. The cultural speculations and conceptual design proposals in *Hertzian Tales* are not utopian visions or blueprints; instead, they embody a critique of present-day practices, mixing criticism with optimism. Six essays explore design approaches for developing the aesthetic potential of electronic products outside a commercial context—considering such topics as the post-optimal object and the aesthetics of user-unfriendliness—and five proposals offer commentary in the form of objects, videos, and images. These include *Electroclimates*, animations on an LCD screen that register changes in radio frequency; *When Objects Dream...*, consumer products that dream in electromagnetic waves; *Thief of Affection*, which steals radio signals from cardiac pacemakers; *Tuneable Cities*, which uses the car as it drives through overlapping radio environments as an interface of hertzian and physical space; and the *Faraday Chair: Negative Radio*, enclosed in a transparent but radio-opaque shield. Very little has changed in the world of design since Hertzian

Tales was first published by the Royal College of Art in 1999, writes Dunne in his preface to this MIT Press edition: Design is not engaging with the social, cultural, and ethical implications of the technologies it makes so sexy and consumable. His project and proposals challenge it to do so.

Design Noir Anthony Dunne, Fiona Raby, 2021-06-03

The first book to be published on the work of their partnership (in 2001), *Design Noir* is the essential primary source for understanding the theoretical and conceptual underpinnings for Dunne & Raby's work. Consisting of three elements - a 'manifesto' on the possibilities of designing with and for the 'secret life' of electronic objects; notes for an embryonic network of critical designers and, most famously, the presentation of the Placebo Project - a prototype for a critical design poetics enacted around electronic furniture-objects - *Design Noir* offers an in-depth exploration of one of the most seminal design projects of the last two decades, one that arguably initiated speculating through design in its contemporary forms. By detailing the logic and character of the objects that were constructed; the involvement of users with these objects over-time, and in the creation of a new kinds of spatially and temporally distributed moments of critique and engagement with things, *Design Noir* presents the case-study of the Placebo project as a far more complex and subtler project than is often thought. As a bold and in many ways unprecedented experiment in design writing and book designing, *Design Noir* is itself an instance of the speculative propositional design it expounds.

The Routledge Companion to Media Studies and Digital Humanities Jentery Sayers, 2018-05-01

Although media studies and digital humanities are established fields, their overlaps have not been examined in depth. This comprehensive collection fills that gap, giving readers a critical guide to understanding the array of methodologies and projects operating at the intersections of media, culture, and practice. Topics include: access, praxis, social justice, design, interaction, interfaces, mediation, materiality, remediation, data, memory, making, programming, and hacking.
