The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

Japan and Britain after 1859 Olive Checkland, 2003-08-29 In the years following Japan's long period of self-imposed isolation from the world, Japan developed a new relationship with the West, and especially with Britain,

where relations grew to be particularly close. The Japanese, embarrassed by their perceived comparative backwardness, looked to the West to learn modern industrial techniques, including the design and engineering skills which underpinned them. At the same time, taking great pride in their own culture, they exhibited and sold high quality products of traditional Japanese craftsmanship in the West, stimulating a thirst for, and appreciation of, Japanese arts and crafts. This book examines the two-way bridge-building cultural exchange which took place between Japan and Britain in the years after 1859 and into the early years of the twentieth century. Topics covered include architecture, industrial design, prints, painting and photographs, together with a consideration of Japanese government policy, the Japan-Britain Exhibition of 1910, and commercial spin-offs. In addition, there are case studies of key individuals who were particularly influential in fostering British-Japanese cultural bridges in this period.

The Nanjing Massacre Angie Timmons, 2017-12-15 While World War II is well known for genocide, the war itself eclipsed key events that preceded and contributed to the greater conflict. This book explores the Nanjing massacre, a mass murder and rape committed by Japanese soldiers in China during the Second Sino-Japanese War. This conflict would later merge into World War II

itself. Sidebars highlight topics such as the Japanese destruction of military records about the massacre and Chinese general Chiang Kai-shek. A timeline chronicles the Chinese decision to move operations from Shanghai to Nanjing and the harrowing events that transpired.

Nuclear War Raymond G. Wilson, 2014 Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a

tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. --Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohno, 1986 America can do whatever we set our mind to. --Barack Obama

Whirlwind Barrett Tillman, 2010-03-02 WHIRLWIND is the first book to tell the complete, awe-inspiring story of the Allied air war against Japan—the most important strategic bombing campaign in history. From the audacious Doolittle raid in 1942 to the atomic bombing of Hiroshima and Nagasaki in 1945, award-winning historian Barrett Tillman recounts the saga from the

perspectives of American and British aircrews who flew unprecedented missions over thousands of miles of ocean, as well as of the generals and admirals who commanded them. Whether describing the experiences of bomber crews based in China or the Marianas, fighter pilots on Iwo Jima, or carrier aviators at sea, Tillman provides vivid details of the lives of the fliers and their support personnel. Whirlwind takes readers into the cockpits and gun turrets of the mighty B-29 Superfortress, the largest bomber built up to that time. Tillman dramatically re-creates the sweep of wartime emotions that crews endured on fifteen-hour missions, grappling with the extreme tedium of cramped spaces and with adrenaline spikes in flak-studded skies, knowing that a bailout would put them at the mercy of a merciless enemy or an unforgiving sea. A major character is the controversial and brilliant General Curtis LeMay, who rewrote strategic bombing tactics. His command's fire-bombing missions incinerated fully half of Tokyo and many other cities, crippling Japan's industry while still failing to force surrender. Whirlwind examines the immense logistics and construction efforts necessary to support Superfortresses in Asia and the Mariana Islands, as well as the tireless efforts of engineers to build huge air bases from scratch. It also describes the unheralded missions that American bomber crews flew from the Aleutian Islands to Japan's northernmost Kuril Islands. Never has the Japanese side of the story been so thoroughly examined. If Washington, D.C., represented a "second front" in Army-Navy rivalry, the situation in Tokyo approached a

full-contact sport. Tillman's description of Japan's willfully inadequate approach to civil defense is eye-opening. Similarly, he examines the mind-set in Tokyo's war cabinet, which ignored the atomic destruction of Hiroshima and Nagasaki, requiring the emperor's personal intervention to avert a ghastly Allied invasion. Tillman shows how, despite the Allies' ultimate success, mistakes and shortsighted policies made victory more costly in lives and effort. He faults the lack of a unified command for allowing the Army Air Forces and the Navy to pursue parochial goals at the expense of the larger mission, and he questions the premature commitment of the enormously sophisticated B-29 to the most primitive theater in India and China. Whirlwind is one of the last histories of World War II written with the contribution of men who fought in it. With unexcelled macro- and microperspectives, Whirlwind is destined to become a standard reference on the war, on multiservice operations, and on the human capacity for individual heroism and national folly.

Community Computing and Support Systems Toru Ishida, 2003-05-20 The widespread use of global networks like the Internet and mobile computing have made worldwide computing over virtual communities a reality. This is the first book devoted to community computing. It is based on the Kyoto Meeting on Social Interaction and Communityware, held in Kyoto, Japan, in June 1998. The 24 revised full papers presented together with an introduction to the emerging field were carefully selected and revised for inclusion in the book.

The book is divided in parts on models and concepts, methodologies for large scale trials, sharing knowledge and preferences, supporting social interaction, and agent technologies in communities.

Special Notice to Mariners ,

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors

of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's

Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Making of the "Rape of Nanking" Takashi Yoshida, 2009-03-04 On December 13, 1937, the Japanese army attacked and captured the Chinese capital city of Nanjing, planting the rising-sun flag atop the city's outer walls. What occurred in the ensuing weeks and months has been the source of a tempestuous debate ever since. It is well known that the Japanese military committed wholesale atrocities after the fall of the city, massacring large numbers of Chinese during the both the Battle of Nanjing and in its aftermath. Yet the exact details of the war crimes--how many people were killed during the battle? How many after? How many women were raped? Were prisoners executed? How unspeakable were the acts committed?--are the source of controversy among Japanese, Chinese, and American historians to this day. In *The Making of the Rape of Nanking* Takashi Yoshida examines how views of the Nanjing Massacre have evolved in history writing and public memory in Japan, China, and the United States. For these nations, the question of how to treat the legacy of Nanjing--whether to deplore it, sanitize it, rationalize it, or even ignore it--has aroused passions revolving around ethics, nationality, and historical identity. Drawing on a rich analysis of Chinese, Japanese, and American history textbooks and newspapers, Yoshida traces the evolving--and often conflicting--understandings of the Nanjing Massacre, revealing how changing

social and political environments have influenced the debate. Yoshida suggests that, from the 1970s on, the dispute over Nanjing has become more lively, more globalized, and immeasurably more intense, due in part to Japanese revisionist history and a renewed emphasis on patriotic education in China. While today it is easy to assume that the Nanjing Massacre has always been viewed as an emblem of Japan's wartime aggression in China, the image of the Rape of Nanking is a much more recent icon in public consciousness. Takashi Yoshida analyzes the process by which the Nanjing Massacre has become an international symbol, and provides a fair and respectful treatment of the politically charged and controversial debate over its history.

Reflections on the Fukushima Daiichi Nuclear Accident Joonhong Ahn,Cathryn Carson,Mikael Jensen,Kohta Juraku,Shinya Nagasaki,Satoru Tanaka,2014-12-01 This book focuses on nuclear engineering education in the post-Fukushima era. It was edited by the organizers of the summer school held in August 2011 in University of California, Berkeley, as part of a collaborative program between the University of Tokyo and UC Berkeley. Motivated by the particular relevance and importance of social-scientific approaches to various crucial aspects of nuclear technology, special emphasis was placed on integrating

nuclear science and engineering with social science. The book consists of the lectures given in 2011 summer school and additional chapters that cover developments in the past three years since the accident. It provides an arena for discussions to find and create a renewed platform for engineering practices, and thus nuclear engineering education, which are essential in the post-Fukushima era for nurturing nuclear engineers who need to be both technically competent and trusted in society.
