Energiya-Buran Bart Hendrickx, Bert Vis, 2007-12-05 This absorbing book describes the long development of the Soviet space shuttle system, its infrastructure and the space agency's plans to follow up the first historic unmanned mission. The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system, and the operational, political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet.

Space Shuttle Launch System 1972-2004 Mark Lardas, 2012-09-20 The Space Shuttle is one of the oldest and most famous manned launch systems - the only launch vehicle that has been used for a longer period of time is the Soviet (now Russian) R-7 booster. By the start of the third millennium, the Space Shuttle had carried crews into space over 85 times. Although not a military structure, the Shuttle had been sold as an all-purpose launch system to be used jointly for military

and civilian purposes. Featuring full-colour photos throughout, this book covers the design, development and operational history of a unique vehicle.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

The Night Box Louise Greig, 2018-09-25 Soothing bedtime reading, this reassuring and magical evocation of nighttime encourages imaginative exploration and marks the debut of a talented poet and illustrator picture-book pair. When a little boy opens the Night Box, darkness swoops out, a fox uncurls, and a thousand stars sparkle and shine. Night flows freely then, cavorting and exploring, caring for all its creatures until morning comes, and it's time for Night to rest again. With its soothing cadences and air of quiet wonder, The Night Box is sure to charm any sleepy listener who wonders what happens between sunset and sunrise.

The Space Shuttle Piers Bizony, 2015-04 Get a full retrospective of all 134 flights, every mission, of the space shuttle program. This superbly designed and lavishly illustrated reissue of the best-selling hardcover book marks a special moment in history: the final mission of the space shuttle. Noted space and science author Piers Bizony's retrospective covers the entire space shuttle program that began in 1981 and ended in 2011. Every space shuttle mission is detailed, including all flights of the Columbia, Challenger, Discovery, Atlantis, and Endeavour spacecraft. The book also covers the development and design of the orbiter, as well as the technical specifications of the vehicle and details of its major assemblies and subassemblies. A full double-gatefold provides a large-scale technical drawing of the space shuttle. If you never got to watch the countdown clock in person during a space shuttle launch, The Space Shuttle is your chance to relive the history of America's first low Earth orbital spacecraft.

Helicopters of the Third Reich Steve Coates, Jean-Christophe Carbonel, 2002 This is the first major study of Germany's wartime helicopters in the English language and is the result of 15 years research. The book includes more than 350 stunning and rare photographs, most appearing in print for the first time. Alongside the narrative, the book includes first hand accounts and the illustrations are supplemented by superb technical drawings.

No Exit from Pakistan Daniel S. Markey, 2013-10-07 This book tells the story of the tragic and often tormented relationship between the United States and Pakistan. Pakistan's internal troubles have already threatened U.S. security and international peace, and Pakistan's rapidly growing population, nuclear arsenal, and relationships with China and India will continue to force it upon America's geostrategic map in new and important ways over the coming decades. This book explores the main trends in Pakistani society that will help determine its future; traces the wellsprings of Pakistani anti-American sentiment through the history of U.S.-Pakistan relations from 1947 to 2001; assesses how Washington made and implemented policies regarding Pakistan since the terrorist attacks on the United States on September 11, 2001; and analyzes how regional dynamics, especially the rise of China, will likely shape U.S.-Pakistan relations. It concludes with three options for future U.S. strategy, described as defensive insulation, military-first cooperation, and comprehensive cooperation. The book explains how Washington can prepare for the worst, aim for the best, and

avoid past mistakes.

Ectogenesis Scott Gelfand, John R. Shook, 2006 This book raises many moral, legal, social, and political, questions related to possible development, in the near future, of an artificial womb for human use. Is ectogenesis ever morally permissible? If so, under what circumstances? Will ectogenesis enhance or diminish women's reproductive rights and/or their economic opportunities?
