Tortured Cardboard Philip E. Orbanes 2019-07-23 The term “tortured cardboard” sums up what happens to cardboard

when making a board game (bound, cut, folded, punched). And, as you’ll learn, great board games often reflect whatever “tortures” culture. Each gained

immortality after a chaotic beginning and a chance survival. Why? Because—be it chess, backgammon, Clue®, Monopoly®, Scrabble®, Settlers of Catan®, or one of ten others featured in this book—each is replete with “lessons” applicable to achievement in your life. As the twenty-first century gathers momentum, our love affair with board games continues to strengthen. They involve us, they refine social skills, and they teach great lessons applicable in real life. “Tortuous” is the journey of every great board game, from birth in chaotic times, through survival by mere chance, to raging popularity and eventual

immortality. Tortured Cardboard reveals how the great ones came to endure and—all fun aside—how each teaches us something about our own behavior while providing “rules” that can work in your life.

Perspective Drawing Ernest Norling 1989 Perspective is one of the most important concepts for an artist to understand. In this valuable beginnerÆs guide, acclaimed artist Ernest Norling teaches you how to use perspective to create a sense of depth and realism in your artwork. Perspective covers techniques for drawing in one-, two-, and three-point perspective, as well as information on how to use

vanishing points and the horizon line to establish believable depth. Special attention is given to learning to draw circles, cylinders, and people in perspective. Whether you specialize in drawing— even cartooning or animation— or painting in acrylic, pastel, oil, or watercolor, a good working knowledge of perspective is essential. Don't be surprised if you find yourself referring to this essential guide again and again!

Unshaken Francine Rivers
2001-03-01 Book 3 in the 5-
book biblical historical fiction
series by the New York Times
bestselling author of *Redeeming
Love* and *A Voice in the Wind*.

She gave up everything, expecting nothing, and God honored her. Meet Ruth, one of the five women in the lineage of Christ. Her loyalty—especially toward her mother-in-law Naomi—helped her to persevere in the face of tragedy, and God gave her a second chance at love. Readers will be encouraged by the truth that God will faithfully provide for His children even when all hope seems lost. *Unshaken* is book three in the popular *Lineage of Grace* series about five unlikely women who changed eternity. “Francine Rivers spins a tale that’s not only true to history, but satisfying to the heart.”
—Romantic Times This novella

includes an in-depth Bible study perfect for personal reflection or group discussion.

Curved-Folding Origami Design

Jun Mitani 2019-03-27 The origami introduced in this book is based on simple techniques.

Some were previously known by origami artists and some were discovered by the author.

Curved-Folding Origami Design

shows a way to explore new area of origami composed of curved folds. Each technique is

introduced in a step-by-step fashion, followed by some beautiful artwork examples. A

commentary explaining the theory behind the technique is placed at the end of each

chapter. Features Explains the

techniques for designing curved-folding origami in seven chapters Contains many

illustrations and photos (over 140 figures), with simple instructions Contains photos of

24 beautiful origami artworks, as well as their crease patterns Some basic theories behind the

techniques are introduced **Wild Flowers of Britain** Margaret Erskine Wilson 2016-07-13

Margaret Erskine Wilson, late President of Kendal Natural History Society, was a keen

amateur botanist and water-colourist. In 1999, she donated to the Society 150 sheets of

water-colour paintings representing a thousand British and Irish plants in flower and in

fruit, painted in situ over many years and in various places. At the time she donated the paintings to Kendal Natural History Society, she wrote: Begun in 1943/4 for a friend who said, 'I might learn the names of flowers if you drew them for me, in the months they're in flower!' The result is this beautiful, previously unpublished book of all her accurate and informative illustrations, painted over a period of 45 years. Over a thousand British and Irish flowers are represented in this book and it still today serves Margaret Erskine Wilson's original purpose - it is an easy way to learn the names of our

delicate and beautiful wild flowers.

Sibley's Raptors of North America 2010-09 The majestic raptors of North America are artfully displayed in this premium wall poster. Illustrated by the world's premiere bird artist, this work features illustrations of 32 species of raptors, including the black vulture, the snail kite, the ferruginous hawk, the American kestrel, and the peregrine falcon. Juveniles, adults, and regional populations of each species are shown in relative scale, both perched and in flight?to give the viewer an impression of the differences in sizes. This splendid piece of

artwork makes an ideal gift for both birdwatchers interested in identifying raptors and casual observers alike.

Raptors of Texas Charles Craig

Farquhar 2022-04-29 Diurnal

raptors--birds of prey that hunt during the day--include easily recognizable birds like eagles,

hawks, or falcons. They may be seen perched on highway signs,

electrical poles, or soaring

overhead in urban and rural

spaces across North America.

Here, avian ecology and raptor

experts C. Craig Farquhar and

Clint W. Boal present the first comprehensive volume on these birds of prey in Texas. Given the state's size, location, and biodiversity, it is not surprising that Texas leads other states in the documented number of raptor species. The introductory chapters of *Raptors of Texas* provide information on raptor ecology, evolution, behavior, morphology, and the unique conservation challenges raptors face in Texas and elsewhere. Detailed species descriptions of Texas' regularly occurring diurnal raptors come next, illustrated with life-like graphite drawings and accompanied by unique, up-to-date range maps. Additionally,

shorter entries for rare raptors sighted in the state are provided. This reference is a must-have for serious birders, ornithologists, avian ecologists, and wildlife professionals who want to know more about these birds of prey and the important roles they play in our urban and rural environments alike.

The Romance of King Arthur and His Knights of the Round Table
Sir Thomas Malory 2016-11-16
Sir Thomas Malory's *Le Morte d'Arthur* is the basis for the vast

literature concerning King Arthur and his Knights of the Round Table. Malory compiled, translated, and edited the tales from earlier French sources, and all later authors who added to Arthurian legend are indebted to his work. This handsome edition features 16 of Arthur Rackham's finest color illustrations, and Malory's text was edited for modern readers by English scholar Alfred W. Pollard. An essential treasury edition for any collector of Arthurian myths or Rackham enthusiast. Film fans will also cherish this deluxe hardcover: the stories have inspired numerous movie adaptations, including the 2017 release

Knights of the Roundtable: King Arthur, directed by Guy Ritchie and starring Charlie Hunnam, Jude Law, Eric Bana, Djimon Hounsou, and Annabelle Wallis.

3D Origami Art Jun Mitani

2017-12-19 Easily Create

Origami with Curved Folds and Surfaces Origami—making

shapes only through

folding—reveals a fascinating

area of geometry woven with a

variety of representations. The

world of origami has progressed

dramatically since the advent of

computer programs to perform

the necessary computations for

origami design. 3D Origami Art

presents the design methods

underlying 3D creations derived

from computation. It includes

numerous photos and design drawings called crease patterns,

which are available for

download on the author's

website. Through the book's

clear figures and descriptions,

readers can easily create

geometric 3D structures out of a

set of lines and curves drawn

on a 2D plane. The author uses

various shapes of sheets such

as rectangles and regular

polygons, instead of square

paper, to create the origami.

Many of the origami creations

have a 3D structure composed

of curved surfaces, and some of

them have complicated forms.

However, the background

theory underlying all the

creations is very simple. The

author shows how different origami forms are designed from a common theory.

The Three Edwards Thomas B. Costain 2011-11-23 THE THREE EDWARDS, third in Thomas B. Costain's survey of Britain under the Plantagenets, covers the years between 1272 and 1377 when three Edwards ruled England. Edward I brought England out of the Middle Ages. Edward II had a tragic reign but gave his country Edward III, who ruled gloriously, if violently.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had

come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Medical Anthropology Andrea S.

Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and

survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health,

behavioral disease,
aging, race/racism and health,
mental health, and healers and
healing.

The Raptors of Arizona Richard L. Glinski 2021-11-16

Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species, and for those watching the skies the additional sighting of a bird of prey is a reward in itself. The Grand Canyon state boasts the most dramatic assortment of raptors in North America: hawks, eagles, falcons, kites, and owls, plus vultures and condors. Here can be found nearly all the raptor species of the continental United States and also established populations of species associated with Mexico,

such as the Gray Hawk, Common Black-Hawk, Zone-tailed Hawk, and Whiskered Screech-Owl. Arizona's raptors are found in an unrivaled diversity of habitats, from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs, where the gigantic California Condor was introduced in 1996. Yet many species live in habitats that are now jeopardized by degradation or development, making an understanding and appreciation of raptors crucial to their survival. The Raptors of Arizona brings together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and

syntheses on Arizona's 42 raptor species, with an emphasis on aspects of their natural history in Arizona. A chapter on each bird includes its description, a range map, and information on its distribution, habitat, life history, and status. Additional chapters cover conservation, habitats, where and when to watch raptors, and the sport of falconry. The book is enhanced by 42 full-color illustrations by Richard Sloan, one of the premier wildlife artists in North America, whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project. Co-published with the Arizona Game and Fish

Department.

Paper Panda's Guide to Papercutting Louise Firchau 2016-11-02 This book has Paper Panda's very distinctive stamp on it and begins with a design section which takes the reader through a very personal account of what inspires her, how she works, and how Paper Panda came about. The techniques involved in papercutting are fairly simple and easy to explain, and this is covered through step-by-step demos. There is a design section, taking readers through the design process itself and including numerous examples of Louise's papercut designs. Starting with the themes and

subjects that inspire her, it explains how she creates finished artwork suitable for papercutting, followed by how to make the template itself, and how to use the papercut to make cards, framed pictures, and so on. The aim of this section will be not only to provide readers with an insight into Paper Panda's creative world, but also to inform and inspire people to design papercuts for themselves. There are 20 papercut projects in the book; five from Paper Panda herself and five each from three of Paper Panda's design colleagues (Sarah Trumbauer, Louise Dyer and Suzy Taylor - all accomplished papercutters

with online presences). Each project will consist of a template, which will be reproduced full-size at the back of the book, and a finished paper cut, together with some step-by-step instructions. The designs will be simple enough for beginners, though attractive and interesting enough to inspire more advanced paper cutters. The projects themselves will include cards, decorations, and mounted and framed pictures to hang on the wall, all using a variety of colored and patterned papers to show off Paper Panda and friends' distinctive and beautiful designs to their best advantage. Origami Sea Life John Montroll

One Place after Another Miwon Kwon 2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility

encapsulated in Richard Serra's famous dictum "to remove the work is to destroy the work" is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic

problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

Moon Shot Alan Shepard 2011-05-03 New York Times bestseller for fans of First Man:

A “breathtaking” insider history of NASA’s space program—from astronauts Alan Shepard and Deke Slayton (Entertainment Weekly). On October 4, 1957, the Soviet Union launched Sputnik I, and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation’s most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA’s effort to conquer space, and Moon Shot is their inside account of what many

call the twentieth century's greatest feat—landing humans on another world. Collaborating with NBC's veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America's space exploration from the time of Shepard's first flight until he and eleven others had walked on the moon.
