The Discursive Power of Memes in Digital Culture

Bradley E. Wiggins, 2019-02-25 Shared, posted, tweeted, commented upon, and discussed online as well as off-line, internet memes represent a new genre of online communication, and an understanding of their production, dissemination, and implications in the real world enables an improved ability to navigate digital culture. This book explores cases of cultural, economic, and political critique levied by the purposeful production and consumption of internet memes. Often images, animated GIFs, or videos are remixed in such a way to incorporate intertextual references, quite frequently to popular culture, alongside a joke or critique of some aspect of the human experience. Ideology, semiotics, and intertextuality coalesce in the book's argument that internet memes represent a new form of meaning-making, and the rapidity by which they are produced and spread underscores their importance.

Professions Gerald P. Koocher, Patricia Keith-Spiegel, 2016 Revised edition of the authors' Ethics in psychology and the mental health professions, 2008.

The Power of American Governors

Thad Kousser, Justin H. Phillips, 2012-09-17 With limited authority over state lawmaking, but ultimate responsibility for the performance of government, how effective are governors in moving their programs through the legislature? This book advances a new theory about what makes chief executives most successful and explores this theory through original data. Thad Kousser and Justin H. Phillips argue that negotiations over the budget, on the one hand, and policy bills on the other are driven by fundamentally different dynamics. They capture these dynamics in models informed by interviews with gubernatorial

advisors, cabinet members, press secretaries and governors themselves. Through a series of novel empirical analyses and rich case studies, the authors demonstrate that governors can be powerful actors in the lawmaking process, but that what they're bargaining over – the budget or policy – shapes both how they play the game and how often they can win it.

Memes in Digital Culture Limor

Shifman, 2013-10-04 Taking “Gangnam Style” seriously: what Internet memes can tell us about digital culture. In December 2012, the exuberant video “Gangnam Style” became the first YouTube clip to be viewed more than one billion times. Thousands of its viewers responded by creating and posting their own variations of the video—“Mitt Romney Style,” “NASA Johnson Style,” “Egyptian Style,” and many others. “Gangnam Style” (and its attendant parodies, imitations, and derivations) is one of the most famous examples of an Internet meme: a piece of digital content that spreads quickly around the web in various iterations and becomes a shared cultural experience. In this book, Limor Shifman investigates Internet memes and what they tell us about digital culture. Shifman discusses a series of well-known Internet memes—including “Leave Britney Alone,” the pepper-spraying cop, LOLCats, Scumbag Steve, and Occupy Wall Street's “We Are the 99 Percent.” She offers a novel definition of Internet memes: digital content units with common characteristics, created with awareness of each other, and circulated, imitated, and transformed via the Internet by many users. She differentiates memes from virals; analyzes what makes memes and virals successful; describes popular meme genres; discusses memes as new modes of political participation in democratic and nondemocratic regimes; and examines memes as agents of globalization. Memes, Shifman argues, encapsulate some of the most fundamental aspects

of the Internet in general and of the participatory Web 2.0 culture in particular. Internet memes may be entertaining, but in this book Limor Shifman makes a compelling argument for taking them seriously.

Pantomime Terror John Hutnyk, 2014-02-28

Pantomime is a theatrical form that has come to rule our everyday lives as terror. In the early years of the 21st century, a dissembling political demonology has sometimes placed otherwise merely lyrical musicians in a volatile predicament. The discussion here is of Fun-da-Mental's Aki Nawaz portrayed as a 'suicide rapper', Asian Dub Foundation striking poses from the street in support of youth in Paris and Algiers, and M.I.A., born free fighting immigration crackdown with atrocity video. Along the way, bus bombs, comedy circuits, critical theory, Arabian Nights, Bradley Wiggins, Dinarzade, Karl Marx, Paris boulevards, Molotov, Mao, the Eiffel Tower, reserve armies, lists, Richard Wagner, Samina Malik, Slavoj Žižek, Freudian slips, red-heads, Guantanamo. The book offers some sharp critiques of our contemporary complacency, and the failures of theory as more than ten years of war on terror turns anxiety at home and drone-strike assassinations abroad into a normal everyday. This pantomime is a terror story told over and over to distract from the workings of a despotic power. The need for an adequate (winning) counter-narrative was never more clear.

Ethics in Psychology Gerald P. Koocher, Patricia

Keith-Spiegel, 1998 Written in a highly readable and accessible style, this new edition retains the key features that have contributed to its

popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality. Ethics in Psychology and the Mental Health Professions will be important reading for practitioners and students in training.--BOOK JACKET.

The International Olympic Committee and the Olympic System Jean-Loup Chappelet, 2008-08-18 When the athletes enter the stadium and the Olympic flame is lit, the whole world watches. Billions will continue to follow the events and to share in the athletes' joys and sorrows for the next sixteen days. Readers of this book, however, will watch forthcoming editions of the Olympic Games in a completely different light. Unlike many historical or official publications and somewhat biased commercial works, it provides -- in a clear, readable form -- informative and fascinating material on many aspects of what Olympism is all about: its history, its organization and its actors. Although public attention is often drawn to various issues surrounding this planetary phenomenon -- whether concerning the International Olympic Committee, the athletes, the host cities or even the scandals that have arisen -- the Olympic System as such is relatively little known. What are its structures, its goals, its resources? How is it governed and regulated? What about doping, gigantism, violence in the stadium? In addition to providing a wealth of information on all these subjects, the authors also show how power, money and image have transformed Olympism over the decades. They round off the work with thought-provoking reflections regarding the future of the Olympic System and the obstacles it must overcome in order to survive.

This approach, celebrating now 15 years after developing the first GDV instrument, has a strong scientific foundation with thousands of researchers, doctors and practitioners using it in the world. Electrophotonic methods allow to study Energy Fields of humans, water, materials and environment. Conceptual background and practical approaches are presented in this book.

The Next Step , 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as exponential technologies--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Contributors include Aubrey D.N.J. de Grey, Jonathan Rossiter, Joseph A. Paradiso, Kevin Warwick, Huma Shah, Ramón López de Mántaras, Helen Papagiannis, Jay David Bolter, Maria Engberg, Robin Hanson, Stuart Russell, Darrell M. West, Francisco González, Chris Skinner, Steven Monroe

Collaborative Learning and New Media Christian Ludwig, Kris Van de Poel, 2017 This book explores collaboration in the foreign language classroom through the use of new media. An essential resource for applied linguists and practising teachers/teacher trainees in secondary/higher education, the contributions combine theoretical, empirical and practical insights.

Common Sense Mathematics: Second Edition Ethan D. Bolker, Maura B. Mast, 2021-01-21 Ten years from now, what do you want or expect your students to remember from your course? We realized that in ten years what matters will be how students approach a problem using the tools they carry with them—common sense and common knowledge—not the particular mathematics we chose for the curriculum. Using our text, students work regularly with real data in moderately complex everyday contexts, using mathematics as a tool and common sense as a guide. The focus is on problems suggested by the news of the day and topics that matter to students, like inflation, credit card debt, and loans. We use search engines, calculators, and spreadsheet programs as tools to reduce drudgery, explore patterns, and get information. Technology is an integral part of today's world—this text helps students use it thoughtfully and wisely. This second edition contains revised chapters and additional sections, updated examples and exercises, and complete rewrites of critical material based on feedback from students and teachers who have used this text. Our focus remains the same: to help students to think carefully—and critically—about numerical information in everyday contexts.

Global Nutrition Report 2014 International Food Policy Research Institute, 2014-11-13 At the 2013 Nutrition for Growth Summit in London, 96 signatories (governments, civil society organizations, donors, United Nations agencies, and businesses) agreed to support the creation of an annual report on global nutrition that would be authored by an independent expert group, in partnership with a large number of contributors. The first edition of this report, the Global Nutrition Report 2014, puts a spotlight on worldwide progress by the 193 member countries of the United Nations in improving their nutrition status, identifies bottlenecks to change, highlights opportunities for action, and contributes to strengthened nutrition accountability on country and global levels.

Indigenous Knowledge Production Marcus Woolombi Waters, 2018-05-16 Despite many scholars noting the interdisciplinary approach of Aboriginal knowledge production as a methodology within a broad range of subjects - including quantum mathematics, biodiversity, sociology and the humanities - the academic study of Indigenous knowledge and people is struggling to become interdisciplinary in its approach and move beyond its current label of 'Indigenous Studies'. Indigenous Knowledge Production specifically demonstrates the use of autobiographical ethnicity as a methodological approach, where the writer draws on lived experience and ethnic background towards creative and academic writing. Indeed, in this insightful volume, Marcus Woolombi Waters investigates the historical connection and continuity that have led to the present state of hostility witnessed in race relations around the world; seeking to

further one's understanding of the motives and methods that have led to a rise in white supremacy associated with ultra-conservatism. Above all, Indigenous Knowledge Production aims to deconstruct the cultural lens applied within the West which denies the true reflection of Aboriginal and Black consciousness, and leads to the open hostility witnessed across the world. This monograph will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields such as Sociology of Knowledge, Anthropology, Cultural Studies, Ethnography and Methodology.

Sport Policy in China Jinming Zheng, Shushu Chen, Tien-Chin Tan, Barrie Houlihan, 2018-08-30
Acknowledging China's established status as a global sporting superpower, this is the first book to systematically investigate sport policy in that country. With a focus on sport development in the most recent three decades, *Sport Policy in China* explores a wide range of topics in Chinese sport, including elite sport development, professional sports, major sports events, sport for all, the political context within which sport is interiorised and the distinctive sporting status of Hong Kong. It examines the debates around policy, globalisation, diplomacy and soft power, as well as the significance of the principle of 'one country, two systems'. With international appeal, this book is a valuable resource for students and researchers in the fields of sport policy, sport management, sport development and sport sociology.

The Death of Marco Pantani Matt Rendell, 2012-11-15
The intimate biography of the charismatic Tour de France winner Marco Pantani, now updated to include the 2014 and 2015 investigation into Pantani's death. National Sporting Club Book of the Year Shortlisted for the William Hill Sports Book of the Year Award 'An

exhaustively detailed and beautiful book . . . a fitting, ambivalent tribute - to the man, and to the dark heart of the sport he loved' Independent On Valentine's day 2004, Marco Pantani was found dead in a cheap hotel. It defied belief: Pantani, having won the rare double of the Giro d'Italia and the Tour de France in 1998, was regarded as the only cyclist capable of challenging Lance Armstrong's dominance. Only later did it emerge that Pantani had been addicted to cocaine since 1999. Drawing on his personal encounters with Pantani, as well as exclusive access to his psychoanalysts, and interviews with his family and friends, Matt Rendell has produced the definitive account of an iconic sporting figure.

Learn Better Ulrich Boser, 2019-09-03 For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being

smart is not an innate ability—learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

Riis Bjarne Riis, Lars Steen Pedersen, 2012 In 1996 Danish cycling legend Bjarne Riis won the Tour de France. Eleven years later he called a press conference and confessed to taking performance-enhancing drugs in order to achieve the ultimate cycling triumph. In *Riis*, his sensational autobiography – already an acclaimed bestseller in Denmark and Germany – the notoriously private Dane bares his soul. From the shy, young daydreamer who fell in love with cycling as an eight-year-old, to the hardened, regular user of banned blood booster EPO. While never shirking the seriousness of his actions Riis does attempt to explain the pressures and attitudes within cycling at the time that let him down a dark path that he now condemns. Brutally honest and as furiously fast-paced as one of his breakaways from the peloton, *Riis* is a powerful insight into the life and mind of one of the sport's key figures as well as a window into the world of professional road racing. There are not many people who have been involved in cycling to the extent that Riis has over the last 30 years and readers will be surprised by how open the normally taciturn Dane has been in his autobiography. If you liked Fignon's *We Were Young and Carefree* this book will certainly appeal to you.
